Substantial Substrata Vs Insufficient Substrata:

Essential Difference James Blachowicz, 2012-08-02 Finalist for the 2015 John N Findlay Award in Metaphysics presented by the Metaphysical Society of America Is metaphysics possible This book argues that the greatest threat to its viability derives from a self destructive formalism If what is essential to the nature of physical entities are the properties they have in common as formalism holds the inevitable result will be a reductionist collapse leaving only being or physical matter or some other underlying ground In *Essential Difference* James Blachowicz first constructs a one to one historical parallel between the modern crisis surrounding formalism Hume Kant Hegel and the ancient version Parmenides Plato Aristotle focusing on the principles of differentiation and individuation that underlie Aristotle's and Hegel's antireductionist programs He then proposes a contemporary metaphysical theory of emergence in the context of recent philosophy of science This theory founded on the principle of the nonderivability of actual states from possible states holds that the differences among physical biological and mental phenomena are essential to any metaphysics *Essential Difference* is the only focused treatment of this problem and is itself essential for any understanding of the nature of metaphysics

Syrianus: On Aristotle Metaphysics 13-14 Syrianus, 2014-04-22 Until the launch of this series in 1985 the 15 000 volumes of the ancient Greek commentators on Aristotle written mainly between 200 and 600 AD constituted the largest corpus of extant Greek philosophical writings not translated into English or other European languages Syrianus originally from Alexandria moved to Athens and became the head of the Academy there after the death of Plutarch of Athens Syrianus attacked Aristotle in his commentary on Books 13 and 14 of the *Metaphysics* just as his pupil Proclus was to do later in his commentaries on Plato This is because in *Metaphysics* 13 14 Aristotle himself was being thoroughly polemical towards Platonism in particular against the Academic doctrine of Form numbers and the whole concept of separable number In reply Syrianus gives an account of mathematical number and of geometrical entities and of how all of these are processed in the mind which was to influence Proclus and all subsequent Neoplatonists
