*Family Law, Gender and the State* Alison Diduck, Felicity Kaganas, 2012-02-07 The third edition of this work on family law comprising text cases and materials provides not only an explication of legal principle but also explores primarily from a feminist perspective some of the assumptions about and constructions of gender sexual orientation class and culture that underlie the law It examines the ideology of the family and in particular the role of the law in contributing to and reproducing that ideology Structured around the themes of equality welfare and family privacy the book aims to offer the benefits of a textbook while also giving students a wide ranging set of materials for classroom discussion As well as providing a firm grounding in family law the text sets the law in its social and historical context and encourages a critical approach by students to the subject It provides an ideal introduction to family law for undergraduates but will be equally helpful for postgraduate students of family law for whom it provides a challenging selection of materials set within a theoretical framework rich in ideas and arguments Review of the second edition Diduck and Kaganas examine legal developments to shed light on society principally by investigating the ways in which family law constructs and regulates family life and responsibilities Theirs is an important and ambitious book that aims ultimately at a feminist restatement of family law The book is written and referenced in such depth that it is a useful resource for legal as well as social science researchers at all levels whether looking for theoretical inspiration or drawing up a literature review The range of diverse sources that Diduck and Kaganas draw on is impressive they seem to have included every bit of material that helps feminists make sense of family law There is a well pitched selection of further reading of such material at the end of each chapter What's more they undersell themselves by describing their book as *Text Cases and Materials* because they have woven by far the largest proportion of the cases and materials into the text Helen Reece *Times Higher Education* May 2007 Reviews of first edition A stimulating work which attempts to situate family law in its social historical and political context Its appeal should not be confined to family law students as its commitment to a critical and analytical approach offers insights and ideas with broader significance Mary Childs *Child and Family Law Quarterly* September 2002 The arguments are provocative the analysis is stimulating and the materials amassed strongly support the authors aim to question the axiomatic status of what is

traditionally designated as the family Fiona E Raitt Infant and Child Development September 2002 It is not often that one can say of a textbook in Law that it makes interesting reading with quite the enthusiasm that can be expressed for this text This new publication offers something that few textbooks seem to offer a book you CAN open up virtually anywhere and find an interesting piece on almost any aspect of the broad family law spectrum Penny Booth The Law Teacher September 2002 All the major themes in feminist and constructionist perspectives in family law are presented together with a wealth of readings and extensive references As a teaching manual it is excellent a coherent feminist perspective across the entire range of family law Marty Slaughter Feminist Legal Studies July 2003 **Family Perspectives in Child and Youth Services** David H. **Parenting Your Internationally Adopted Child** Patty Cogen, 2008-06-30 A guide for adoptive parents from preparations for a child's arrival through the teen years Assessment of Parenting Dr Peter Reder, Clare Lucey, 2014-02-04 These are the sorts of questions that face mental health practitioners who are increasingly involved in complex child care cases which come before the courts They have been given little guidance to date on how these assessments should be made especially where a decision has to be taken as to whether a child has experienced significant harm In this much needed book senior clinicians consider the principles and practice of parenting assessments and how they guide courts decisions about children's welfare They describe a number of frameworks for assessment and discuss the factors which help predict the risk of future maltreatment or the likelihood of successful rehabilitation Throughout the book the emphasis is on the need to integrate the assessments of all relevant professionals in order to serve the best interests of the child while also addressing the parents potential to improve their caretaking skills Offering guidance in areas of crucial significance for child family and professional alike Assessment of Parenting will be widely welcomed **The Relationship Rights of Children** James G. Dwyer, 2006-04-17 This book presents a sustained theoretical analysis of what rights children should possess in connection with state decision making about their personal relationships which the state does in numerous aspects of family law including paternity adoption custody and visitation termination of parental rights and grandparent visitation It examines the nature and normative foundation of adults rights in connection with relationships among themselves and then assesses the extent to which the moral principles underlying adults rights apply also to children It concludes that the law should ascribe to children rights equivalent though not identical to those which adults enjoy and this would require substantial changes in

the way the legal system treats children including a reformation of the rules for establishing legal parent child relationships at birth and of the rules for deciding whether to end a parent child relationship      **The Maladapted Mind** Simon

Baron-Cohen, 2013-04-15 Newly available in paperback this is the first book to bring together classic and contemporary readings illustrating the new subdiscipline evolutionary psychopathology Each chapter demonstrates how evolutionary arguments are being brought to bear on the study of a different psychiatric condition or pathological behaviour The Maladapted Mind is aimed primarily at primarily at advanced students and researchers in the fields of psychiatry abnormal psychology biological anthropology evolutionary biology and cognitive science      **Adapting Minds** David J.

Buller, 2006-02-17 Was human nature designed by natural selection in the Pleistocene epoch The dominant view in evolutionary psychology holds that it was that our psychological adaptations were designed tens of thousands of years ago to solve problems faced by our hunter gatherer ancestors In this provocative and lively book David Buller examines in detail the major claims of evolutionary psychology the paradigm popularized by Steven Pinker in The Blank Slate and by David Buss in The Evolution of Desire and rejects them all This does not mean that we cannot apply evolutionary theory to human psychology says Buller but that the conventional wisdom in evolutionary psychology is misguided Evolutionary psychology employs a kind of reverse engineering to explain the evolved design of the mind figuring out the adaptive problems our ancestors faced and then inferring the psychological adaptations that evolved to solve them In the carefully argued central chapters of Adapting Minds Buller scrutinizes several of evolutionary psychology s most highly publicized discoveries including discriminative parental solicitude the idea that stepparents abuse their stepchildren at a higher rate than genetic parents abuse their biological children Drawing on a wide range of empirical research including his own large scale study of child abuse he shows that none is actually supported by the evidence Buller argues that our minds are not adapted to the Pleistocene but like the immune system are continually adapting over both evolutionary time and individual lifetimes We must move beyond the reigning orthodoxy of evolutionary psychology to reach an accurate understanding of how human psychology is influenced by evolution When we do Buller claims we will abandon not only the quest for human nature but the very idea of human nature itself      *Casework in Childcare* Jean Kastell, 2013-08-21 First published in 1998 This is Volume IV of the twelve in the Sociology of Youth and Adolescence series and focuses on case work as part of the child care officer s role and it s value and how it can be employed as a deliberate approach with the need for commitment in the care of a child over a long period      **District of Columbia Appropriations for 1965** United States. Congress. Senate. Committee on Appropriations, 1964      **Christian Ethics, Volume 2** Karl-Heinz Peschke, 2012-08-21 This edition is once again a new

thoroughly revised version of Christian Ethics II In some portions the subject matter has been reorganized more organically and recent theological developments and documents of the magisterium have been integrated New themes have been added others further developed such as deepening the concept and content of mission as well as ecumenical participation Also

questions in bioethics have been supplemented such as the duty to preserve life topics of prenatal medicine reproductive and therapeutic cloning genetic alteration and euthanasia Other issues raised concern the discrimination against women civil marriage of homosexuals compassion in prison care the right of asylum humanitarian interventions the fostering of peace after conflicts empowerment of the poor in development projects and the treatment of animals The author hopes that this new edition will be a contribution to the ongoing aggiornamento of moral theology and that it will continue to meet the expectations of its readers

*Maladjusted Schooling (RLE Edu L)* John Schostak, 2012-05-16 The problems this book discusses are the same now as they were 25 years ago unemployment poor housing inadequate facilities poverty racism violence What is the function of a school in such a situation Although many schools hold reformist ideals their practice is constrained by organisational demands School organisation is based upon a coercive theory of social control which is intolerant of expressions of individuality by teachers and pupils Needs for individuality may be mistaken for deviance and deviance is at least in part produced by or exacerbated by school organisation The author maintains that schooling is therefore largely maladjusted to the needs of individuals

**Parenting in England 1760-1830** Joanne Bailey, 2012-04-05 Parenting in England is the first study of the world of parenting in late Georgian England The author Joanne Bailey traces ideas about parenthood in a Christian society that was responding to new cultural trends of sensibility romanticism and domesticity along with Enlightenment ideas about childhood and self All these shaped how people from the poor to the genteel thought about themselves as parents and remembered their own parents With meticulous attention to detail Bailey illuminates the range of intense emotions provoked by parenthood by investigating a rich array of sources from memoirs and correspondence to advice literature fiction and court records to prints engravings and ballads Parenting was also a profoundly embodied experience and the book captures the effort labour and hard work it entailed Such parental investment meant that the experience was fundamental to the forging of national familial and personal identities It also needed more than two parents and this book uncovers the hitherto hidden world of shared parenting At all levels of society household and kinship ties were drawn upon to lighten the labours of parenting By revealing these emotional and material parental worlds what emerges is the centrality of parenthood to mental and physical well being reputation public and personal identities and to transmitting prized values across generations Yet being a parent was a contingent experience adapting from hour to hour year to year and child to child It was at once precarious as children and parents succumbed to fatal diseases and accidents yet it was also enduring because parent child relationships were not ended by death lost children and parents lived on in memory

Children's Rights and the Developing Law Jane Fortin, 2009-08-13 Following the implementation of the Human Rights Act 1998 awareness has increased that we live in a rights based culture and that children constitute an important group of rights holders Now in its third edition Children's Rights and the Developing Law explores the way developing law and policies in England and Wales are simultaneously promoting and undermining the rights of children It reflects on how far

these developments take account of children's interests using current research on children's needs as a template against which to assess their effectiveness and considering a broad range of topics including medical law education and youth justice. A critical approach is maintained throughout particularly when assessing the extent to which the concept of children's rights is being acknowledged by the courts and policy makers and the degree to which the UK fulfils its obligations under for example the UN Convention on the Rights of the Child.

**Perspectives in Child Care Policy** Lorraine Fox

Harding, 2014-06-11 Child care law and policy issues generate very strong emotions and some crucial questions concerning the role of the state. For instance, under what circumstances should the state be able to intervene and use the force of the law to protect children? Do children have similar rights to adults? Such questions are matters of controversial debate and in the light of well publicised child abuse cases, official inquiries and a government review led to the passing of the Children Act in 1989. *Perspectives in Child Care Policy* presents four different value perspectives on child care policy: laissez faire, state paternalism, defence of the birth family and children's rights. These perspectives differ in their underlying values, concepts and assumptions concerning children, families, the rights and powers of parents and the role of the state.

**Behavioural Problems in Children & Adolescents** Jaydeep Choudhury, 2023-09-15      **Fetish, Recognition, Revolution** James T. Siegel, 2021-01-12

This book concerns the role of language in the Indonesian revolution. James Siegel, an anthropologist with long experience in various parts of that country, traces the beginnings of the Indonesian revolution which occurred from 1945 through 1949 and which ended Dutch colonial rule to the last part of the nineteenth century. At that time the peoples of the Dutch East Indies began to translate literature from most places in the world. Siegel discovers in that moment a force within communication more important than the specific messages it conveyed. The subsequent containment of this linguistic force, he calls the fetish of modernity, which like other fetishes was thought to be able to compel events. Here the event is the recognition of the bearer of the fetish as a person of the modern world. The taming of this force in Indonesian nationalism and the continuation of its wild form in the revolution are the major subjects of the book. Its material is literature from Indonesian and Dutch as well as first person accounts of the revolution.
