

# MEMORY CONSTRUCTION ERRORS

- **Reconsolidation:** we often reconstruct our memories as we encode them. Every time we ‘replay’ a memory we replace the original with a slightly modified version.
- **Elizabeth Loftus** is one of the strongest opponents of repressed memories
  - Memories of traumatic events suddenly recalled during therapy may result from *confabulation* - *the active reconstruction of memory where gaps are filled in by combining and substituting memories from events other than the one we are trying to remember.*
  - When trying to remember details at an accident scene we often exhibit *confabulation*.

Inside NAND Flash Memories Rino Micheloni, Luca Crippa, Alessia Marelli, 2010-07-27 Digital photography MP3 digital video etc make extensive use of NAND based Flash cards as storage media To realize how much NAND Flash memories pervade every aspect of our life just imagine how our recent habits would change if the NAND memories suddenly disappeared To take a picture it would be necessary to find a film as well as a traditional camera disks or even magnetic tapes would be used to record a video or to listen a song and a cellular phone would return to be a simple mean of communication rather than a multimedia console The development of NAND Flash memories will not be set down on the mere evolution of personal entertainment systems since a new killer application can trigger a further success the replacement of Hard Disk Drives HDDs with Solid State Drives SSDs SSD is made up by a microcontroller and several NANDs As NAND is the technology driver for IC circuits Flash designers and technologists have to deal with a lot of challenges Therefore SSD system developers must understand Flash technology in order to exploit its benefits and countermeasure its weaknesses Inside NAND Flash Memories is a comprehensive guide of the NAND world from circuits design analog and digital to Flash reliability including radiation effects from testing issues to high performance DDR interface from error correction codes to NAND applications like Flash cards and SSDs
