Suburban Backlash The Battle For The Worlds Most Livable City:

Place and Placelessness Revisited Robert Freestone, Edgar Liu, 2016-07-15 Since its publication in 1976 Ted Relph's *Place and Placelessness* has been an influential text in thinking about cities and city life across disciplines including human geography sociology architecture planning and urban design For four decades ideas put forward by this seminal work have continued to spark debates from the concept of placelessness itself through how it plays out in our societies to how city designers might respond to its challenge in practice Drawing on evidence from Australian British Japanese and North and South American urban settings *Place and Placelessness Revisited* is a collection of cutting edge empirical research and theoretical discussions of contemporary applications and interpretations of place and placelessness It takes a multi disciplinary approach including contributions from across the breadth of disciplines in the built environment architecture environmental psychology geography landscape architecture planning sociology and urban design in critically re visiting placelessness in theory and its relevance for twenty first century contexts *Australia's Unintended Cities* Richard Tomlinson, 2012 Explores housing and housing related urban outcomes that are unintended consequences of other policies in Australia The Wiley-Blackwell Encyclopedia of Urban and Regional Studies Anthony M. Orum, 2019-04-15 Provides comprehensive coverage of major topics in urban and regional studies Under the guidance of Editor in Chief Anthony Orum this definitive reference work covers central and emergent topics in the field through an examination of urban and regional conditions and variation across the world It also provides authoritative entries on the main conceptual tools used by anthropologists sociologists geographers and political scientists in the study of cities and regions Among such concepts are those of place and space geographical regions the nature of power and politics in cities urban culture and many others The Wiley Blackwell Encyclopedia of Urban and Regional Studies captures the character of complex urban and regional dynamics across the globe including timely entries on Latin America Africa India and China At the same time it contains illuminating entries on some of the current concepts that seek to grasp the essence of the global world today such as those of Friedmann and Sassen on global cities It also includes discussions of recent economic writings on cities and regions such as those of Richard Florida Comprised of over 450 entries on the most important topics and from a range of theoretical perspectives Features authoritative entries on topics ranging from gender and the city to biographical profiles of figures like Frank Lloyd Wright Takes a global perspective with entries providing coverage of Latin America and Africa India and China and the US and Europe Includes biographies of central figures in urban and regional studies such as Doreen Massey Peter Hall Neil Smith and Henri Lefebvre The Wiley Blackwell Encyclopedia of Urban and Regional Studies is an indispensable reference for students and researchers in urban and regional studies urban sociology urban geography and urban anthropology **Real Estate and GIS** Richard Reed, Chris Pettit, 2018-07-17 Real Estate and GIS focuses on the application of geographic information systems GIS and mapping technologies in the expanding property and real estate discipline Whilst a thorough

understanding of location is understood to be fundamental to the property discipline real estate professionals and students have yet to harness the full potential of spatial analysis and mapping in their work This book demonstrates the crucial role that technological advances can play in collecting organising and analysing large volumes of real estate data in order to improve decision making International case studies chapter summaries and discussion questions make this book the perfect textbook for property and applied GIS courses Property and real estate professionals including surveyors valuers property developers urban economists and financial analysts will also find this book an invaluable guide to the understanding and application of GIS technology within a real estate industry context **Shocking the Suburbs** Jago Dodson, Neil G. Sipe, 2008

Petrol prices have risen to historic highs disrupting western economies and stretching household budgets Australia s overwhelming reliance on the private motor car for urban mobility makes our cities among the most oil dependent in the world and to date there has been little analysis of the potential social economic and political impacts of rising fuel costs on our cities **Shocking the Suburbs** considers current urban transport problems and identifies how new planning strategies and broader public policy can address oil vulnerability **Melbourne 2030** Bob Birrell, Robert Birrell, Ernest Healy, Virginia Rapson, Kevin O'Connor, 2005 The Melbourne 2030 plan is the Victorian Government s blueprint for the accommodation of an additional one million people in Melbourne by the year 2030 The plan seeks to change the shape of Melbourne radically The vision is of a compact city in which growth will be concentrated in existing commercial centres activity centres

Notwithstanding this fundamental departure from the low density pattern of the past it is claimed that Melbourne s famed liveability will be preserved This book explores the intellectual origins of the plan demographic assumptions behind the plan the mode of implementation the likely impact on the built environment environmental and social consequences heritage outcomes and alternative planning options It also critically examines assumptions about the projected demand for higher density housing and argues that the plan s compact city vision is unlikely to be achieved because it fails to come to grips with the economic and demographic realities **The Routledge Companion to the Suburbs** Bernadette Hanlon, Thomas Vicino, 2018-09-03 The Routledge Companion to the Suburbs provides one of the most comprehensive examinations available to date of the suburbs around the world International in scope and interdisciplinary in nature this volume will serve as the definitive reference for scholars and students of the suburbs This volume brings together the leading scholars of the suburbs researching in different parts of the world to better understand how and why suburbs and their communities grow decline and regenerate The volume sets out four goals 1 to provide a synthesis and critical appraisal of the historical and current state of understanding about the development of suburbs in the world 2 to provide a forum for a comprehensive examination into the conceptual theoretical spatial and empirical discontents of suburbanization 3 to engage in a scholarly conversation about the transformation of suburbs that is interdisciplinary in nature and bridges the divide between the Global North and the Global South and 4 to reflect on the implications of the socioeconomic cultural and political transformations of the

suburbs for policymakers and planners The Routledge Companion to the Suburbs is composed of original scholarly contributions from the leading scholars of the study of how and why suburbs grow decline and transform Special attention is paid to the global nature of suburbanization and its regional variations with a focus on comparative analysis of suburbs through regions across the world in the Global North and the Global South Articulated in a common voice the volume is integrated by the very nature of the concept of a suburb as the unit of analysis offering multidisciplinary perspectives from the fields of economics geography planning political science sociology and urban studies The Trouble with Speculation Christine Mortimer, Maria Alejandra Luján Escalante, 2024-10-28 Bringing together contributors from Europe North America and Australia this book questions the purpose and outcomes of speculation in practical settings In the context of interrelated and complex global challenges speculation is not just useful but necessary The chapters in this book present a cross disciplinary dialogue of people that are developing work in speculation and interrogates its practices and ethical and political charges Through these discussions the book explores the potential of speculation in addressing issues such as climate change urban futures and new political practices **Housing and Home Unbound** Nicole Cook, Aidan Davison, Louise Crabtree, 2016-05-05 Housing and Home Unbound pioneers understandings of housing and home as a meeting ground in which intensive practices materials and meanings tangle with extensive economic environmental and political worlds Cutting across disciplines the book opens up the conceptual and empirical study of housing and home by exploring the coproduction of the concrete and the abstract the intimate and the institutional the experiential and the collective Exploring diverse examples in Australia and New Zealand contributors address the interleaving of money and materials in the digital commodity of real estate the neoliberal invention of housing as a liquid asset and source of welfare provision and the bundling of car and home in housing markets The more than human relations of housing and home are articulated through the role of suburban nature in the making of Australian modernity the marketing of nature in waterfront urban renewal the role of domestic territory in subversive social movements such as Seasteading and Tiny Houses and the search for home comfort through low cost energy efficiency practices The transformative politics of housing and home are explored through the decolonizing of housing tenure the shaping of housing policy by urban social movements the lived importance of marginal spaces in Indigenous and other housing and the affective lessons of the ruin Beginning with the diverse elements gathered together in housing and home the text opens up the complex realities and possibilities of human dwelling **Suburbia Reimagined** Leon van Schaik, Nigel Bertram, 2018-07-16 Worldwide more and more people are living in cities with suburbs conceived as appendages to the city rather than being part of the city system which is densely populated and offers a full range of services But suburbs are not the city spread too thin and in fact hold potential for a lived complexity as satisfying as that assumed to be available in inner cities Just as the ecological function of wetlands was ignored by modernist planning and swamps once drained are now recognised as vital to water cycles suburbs are increasingly recognised as part of a city s

wellbeing with their own alternative ideology and opportunities for urbanity and ecological sustainability Suburbia Reimagined shows how such subdivision structures can offer new possibilities for sustainably integrating living between generations and between established and arriving migrant communities The authors worked locally and internationally with university campuses shopping centres hospitals airports and other large entities spread through suburbia to identify a broad range of suburban situations that have been modified to ensure that residents have a full access to amenities and services The book addresses the history and design of suburbia from the post war soldier settlements of the 40s and 50s to the university hinterlands of Silicon Valley in order to reappraise the locked potential within such subdivision patterns The authors propose a new model forward examining case studies ranging from repurposed malls and railways for ecological sustainability to cul de sacs as social units and post industrial factory conversions ultimately showing the nascent patterns in suburbia that have the potential to support a rich life for all age groups

Planning Metropolitan Australia Stephen Hamnett, Robert Freestone, 2017-10-24 Australia has long been a highly sub urbanized nation but the major distinctive feature of its contemporary settlement pattern is that the great majority of Australians live in a small number of large metropolitan areas focused on the state capital cities The development and application of effective urban policy at a regional scale is a significant global challenge given the complexities of urban space and governance Building on the editors previous collection *The Australian Metropolis A Planning History 2000* this new book examines the recent history of metropolitan planning in Australia since the beginning of the twenty first century After a historical prelude the book is structured around a series of six case studies of metropolitan Melbourne Sydney Adelaide Perth the fast growing metropolitan region of South East Queensland centred on Brisbane and the national capital of Canberra These essays are contributed by some of Australia's leading urbanists Set against a dynamic background of economic change restructured land uses a more diverse population and growing spatial and social inequality the book identifies a broad planning consensus around the notion of making Australian cities more contained compact and resilient But it also observes a continuing gulf between the simplified aims of metropolitan strategies and our growing understanding of the complex functioning of the varied communities in which most people live This book reflects on the raft of planning challenges presented at the metropolitan scale looks at what the future of Australian cities might be and speculates about the prospects of more effective metropolitan planning arrangements

The Life and Death of the Australian Backyard Tony Hall, Anthony Clive Hall, 2010 Examines the disappearance of the traditional substantial Australian backyard

Spatial Planning, Urban Form and Sustainable Transport Katie Williams, 2017-03-02 The ways in which we travel have a huge impact on sustainability This book addresses the relationship between travel patterns and the physical form of cities and considers the role of spatial planning in that relationship Three sections present empirical research and commentaries from leading academics and practitioners from Europe the USA Australia and Japan The first section considers the impact of urban form in combination with factors such as lifestyles and

socio demographic change on sustainable transport The second addresses the impact of different elements of urban form such as density configuration and mix of uses on mobility The final section focuses on issues surrounding the implementation of spatial planning policies to support sustainable travel The book will be of interest to practitioners academics and students in the fields of planning transport and geography Green Fields, Brown Fields, New Fields David Nichols, Anna Hurlimann, Clare Mouat, Stephen Pascoe, 2010 The conference explores past and future approaches to managing and designing for growth development and decline This goes beyond debates over density frontier development and renewal It includes new fields of historical policy and social research which inform discussion of heritage growth environmental economic and other issues of urban life and urban form Page iii The Death of Urbanism Marcus White, Nano Langenheim, 2020-02-17 Koolhaas pronounced urbanism dead in 1995 Since then urban design has struggled to come to terms with this and other losses including environmental stability affordable housing design control and urban amenity This book explores urban design paradigms transitioning through a misappropriation of K bler Ross five stages of grief from pro sprawl denial NIMBY anger revisionist NewUrban bargaining depressed starchitects through to an optimistic manifesto of acceptance *Cities, Citizens and Environmental Reform* Robert Freestone, 2022-08-10 *Cities Citizens and Environmental Reform* tells a story of community involvement in the development of Australian town planning from the early 20th century from the first wave of enthusiasm for modern town planning ideals before the Great War onto the more challenging social and political environment for the original town planning associations in the post Second World War era Meticulously researched and peppered with archival illustrations the book reveals common threads and local differences in community planning movements across the nation and contributes to our understanding of modern urban planning in Australia The 1960s in Australia Shirleene Robinson, Julie Ustinoff, 2012-01-17 The 1960s is one of the most heavily mythologised decades of the twentieth century More than 50 years on the era continues to capture the public s imagination The 1960s in Australia People Power and Politics recognises the complexity of social and cultural change by presenting a broad range of contributions that acknowledge an often overlooked fact that not everyone experienced the 1960s in the same way The diversity of the time is confirmed by contributions from a number of expert Australian historians who each provide an insight into Australia in the 1960s offering an understanding of the social realities of this period as well as the ebbs and flows of transnational influence This collection includes a featured contribution by prominent Australian historian Raymond Evans who provides a personal insight into the 1960s Other contributors also place the lived experience at the centre of their analysis by considering the growth of modern flats the impact of cosmopolitanism and sex and sexuality in the Sixties The book also highlights the way power was deployed and deconstructed during this era by considering the psychiatric profession the agenda of the counter culture and the role that women s magazines played in reinforcing dominant gender paradigms The complex politics of the era are also explored through the transnational impact of figures such as Anthony Crosland the

impact of the Vietnam War and the multiplicity of motivations behind the anti war protest and the Aboriginal rights movement of the era The 1960s in Australia Power People and Politics is a fresh focus on a significant time in Australia s history It brings together a collection of innovative and engaging explorations into the Australian Sixties which underline the complexity of the time **Urban Nation** Robert Freestone,2010 Provides the first national account of the historical impact of urban planning and design on the Australian landscape It defines and documents hundreds of places parks public spaces redeveloped precincts neighbourhoods suburbs up to whole towns that contribute to the character of urban and suburban Australia *Research in Urban Sociology* Mark Clapson,Ray Hutchison,2010-12-14 Presents contributions in comparative suburban studies for urban regions not just in Europe and the United States but also metropolitan regions in China India and other areas of the world This title examines the patterns of suburban development in metropolitan regions around the globe

Eco-Urbanity Darko Radovic,2013-12-19 There is need for change in our currently unsustainable cities Carefully outlining paths towards better sustainable ways of urban living this book proposes a radical change in the ways we conceive and live our urban environments Bringing together diverse cultural and disciplinary views on urban sustainability eighteen leading academics and practitioners in sustainable architecture and urbanism explore global concerns of sustainability and urbanity This broad range of issues are clearly articulated and linked to concrete places and projects merging research and cutting edge design investigations to promote environmentally and culturally sensitive urban futures
