high roughly half fail and the financial gains of even successful mergers are often neutral Why is this the case This book argues that the reason is because financial and strategic considerations still dominate merger negotiations and that the soft fuzzy people issues are largely ignored in the belief that they can be sorted out later during the integration phase In reality however and this has become even more true with the growth of the new economy people are the real deal makers and that it is only when individuals choose to commit their imagination creativity and energy to a merger that the real synergies flow Merger success is all about leading and managing people and the people issues need addressing right from the start of negotiations Daimler Benz Compaq and Digital Equipment and Zeneca and Astra this book examines where companies so often get things wrong and lays out a clear course for how to get it right
