Health Insurance Reforms in Asia Sabrina Luk, 2014-03-26 This book empirically examines health care financing reforms and popular responses in three major cities in East Asia Shanghai Singapore and Hong Kong It adopts a new revised version of the theory of historical institutionalism to compare and explain the divergent reform paths in these three places over the past three decades It also examines forces that propel institutional change The book provides three detailed case studies on the development of health care financing reforms and the politics of implementing them It shows that health care systems in Shanghai Singapore and Hong Kong were the products of Western presence in the nineteenth century It illustrates how greater attention is paid to the roles played by ideas actors and environmental triggers without abandoning the core assumptions that political institutions and policy feedback remain central to impact health care financing reforms It shows that health care financing reform is shaped by a complex interplay of forces over time It also provides the most updated material about health care financing reforms in Shanghai Singapore and Hong Kong The central argument of this book is that health care financing reform is both an evolving process responding to changing circumstances and a political process revealing an intricate interplay of power relationships and diverse interests It shows that institutional changes in health care financing system can be incremental but transformative in nature It argues that social policies will continue to develop and welfare states will continue to adapt and evolve in order to cope with new risks and needs This book sheds new lights on understanding the politics of health care financing reform and sources and modes of institutional change

Fads, Fallacies And Foolishness In Medical Care Management And Policy Theodore R Marmor, 2007-03-28 No one misses the onslaught of claims about reforming modern medical care How doctors should be paid how hospitals should be paid or governed how much patients should pay when sick in co payments how the quality of care could be improved and how governments and other buyers could better control the costs of care all find expression in the explosion of medical care conference proceedings op eds news bulletins journal articles and books This collection of articles takes up a key set of what the author regards as particularly misleading fads and fashions developments that produce a startling degree of foolishness in contemporary discussions of how to organize deliver finance pay for and regulate medical care services in modern industrial democracies The policy fads addressed include the celebration of explicit rationing as a major cost control instrument the

belief in a basic package of health insurance benefits to constrain costs the faith that contemporary cross national research can deliver a large number of transferable models and the notion that broadening the definition of what is meant by health will constitute some sort of useful advance in practice The Blackwell Companion to Medical Sociology William C.
