Improvement Innovation Van Tiem, Darlene M., Burns, Nancy Crain, 2020-06-26 Companies in today's market are continually looking for techniques that will enhance and improve their overall performance. The rise of data analytics in recent years has changed the way managers are viewing performance methods within an organization. Innovative strategies in developing organizational execution are becoming more accessible; however, there remains a lack of research on performance improvement methods through scientific analysis. *Cases on Performance Improvement Innovation* is a collection of innovative research that illustrates many applications of performance improvement based on analysis, selection of strategy, monitoring and evaluating results to accomplish organizational change through people, processes, and organizations. While highlighting topics including intervention analysis, organizational development, and human performance technology, this book is ideally designed for students, researchers, executives, managers, practitioners, educators, and academicians seeking current research on contemporary innovations in organizational performance.      **The Taiwan Success Story** Shirley W. Y. Kuo, Gustav Ranis, 2020-01-08 Economists and policymakers have long been perplexed over the way rapid growth appears to conflict with the other common goal of developing nations: more equitable income distribution. But economic expansion need not preclude equity, as demonstrated by the case of Taiwan, which experienced high rates of economic growth between the early 1950s and the late 1970s while simultaneously improving the distribution of income among its people. This book describes how the Republic of China managed this balancing of goals and analyzes the reasons for Taiwan's exceptional performance. The authors illustrate how full utilization of the country's vast human resources through emphasis on labor-intensive production has worked to make Taiwan's products competitive in international markets and to make fiscal redistribution after the fact unnecessary. They also cite Taiwan's early attention to land reform to productivity in agriculture and to the spread of decentralized rural industry as important factors in the country's achievements. They point out that although the specifics may change, strategies and policy implications drawn from the Taiwan experience should be applicable in other developing countries.      *Human Performance Improvement* William J. Transforming Mental Healthcare Sunil Khushalani,Antonio DePaolo,2021-12-08 One in five U S adults experiences a mental illness within a given year With more than 550 000 people working to support this underserved community the mental healthcare system has grappled with inadequacies and shortcomings in safety quality and care delivery There is a wide range of problems from access to care issues and errors to complications stemming from poor care Our country is also on an unsustainable path as our healthcare expenditure keeps growing To add to all of this we are facing a rampant epidemic of burnout among healthcare workers Modern advancements introduced with many promises such as electronic medical records newer medications or advanced treatments have created unique challenges when ushered into a highly regulated healthcare system What does it take to provide patients with everything they need the right quality of care at the right time and at the right cost to keep them healthy Which process steps add value Which steps are wasteful A widely accepted fact is

that a conservative 30 50% of every step in the mental healthcare process does not help patients feel better or stay better When considering delays in care workarounds excessive documentation and an overuse of auditing the care system has moved highly skilled clinicians away from providing value as administrative tasks continue to encroach on their time There is a clear need to rethink and redesign the system of care This book is a primer for understanding the current state of the mental health system and the performance improvement skills and leadership acumen needed to address existing challenges Sheppard Pratt the award winning leading institution for mental healthcare in America provided the focus on mental healthcare and became the laboratory for this body of work over the course of eight years It hired a seasoned systems thinker with improvement expertise to work with mental health professionals and solve some of their most complex and chronic problems The book is a result of the collaboration between a practicing psychiatrist in a leadership role and the systems engineer Working together they demonstrate how to think about redesigning care and redefining the nature of work to enhance value for both the people served and the healthcare workforce They crafted a multi pronged approach towards culture change at Sheppard Pratt including implementing a course on Learning to Improve which introduced staff to a performance improvement methodology There are several vignettes interwoven throughout the book that describe the complexities and constraints of the system Solving some of these challenges creates a new paradigm of work while minimizing waste and enhancing value
