**Effective Schooling for Pupils with Emotional and Behavioural Difficulties** John Visser, 2013-10-23. First Published in 1998. Increasing pressure and new demands on LEAs, schools, and their staff have led to an overall reduction in the number of special schools for children with EBD and a questioning of their place within the range of provision for these pupils. Recent attention has also been drawn by HMCI to the number of these schools which have failed to pass the OFSTED inspection process. This book is based on a national examination of special schools providing for pupils with EBD. The authors identify factors associated with good practice and offer advice on how schools can become more effective in providing for the country's most troubled and challenging pupils. They also highlight aspects of successful provision which can be applied in mainstream schools and pupil referral units.

**Inclusive Education at the Crossroads** Philippa Gordon-Gould, Garry Hornby, 2023-03-09. *Inclusive Education at the Crossroads* explores the short and long term effectiveness of government plans to reform policy for special needs education, confronting difficult questions on policies about inclusion and suggesting alternative ways forward for achieving more effective education of children with special educational needs and disabilities (SEND). Inclusion has been a central concern for education systems globally for over three decades. However, preoccupation with inclusion has been at the expense of effective education for children with SEND. Where do policies for inclusion lead, and do they amount to the special education reform that is needed? What do the worldwide experiences of inclusion and special education reveal about how to improve the quality of education systems for all children in the future? How effective is provision for children with SEND today? Through this informative and topical book, Gordon-Gould and Hornby shine an interrogating spotlight on current provision for SEND and ask if current legislation and policy inadvertently reinforce problems if they cause many children with SEND to fall short of their potential, as well as preventing many schools from improving their levels of overall academic attainment. *Inclusive Education at the Crossroads* provides theory and research for teachers, school leaders, governors, policy makers, researchers, parents, post-graduate students, and anyone seeking practical solutions to meeting the needs of pupils with SEND in any global context. It will encourage open debate about the essence of educational inclusion in order to stimulate creative thinking among all stakeholders.
