Parliament. House of Commons. Environmental Audit Committee,2009 This report examines firstly the Treasury s response to recession The fiscal stimulus measures intended to pull the economy out of recession represent an invaluable opportunity to transform the UK into a low carbon economy But meeting climate change and renewable energy targets will require a step change in environmental investment This year s Pre Budget Report announced a 535m package of green fiscal stimulus measures designed to tackle economic and environmental problems simultaneously This investment is welcome but the scale too small most of this funding was already committed and will be offset by reduced spending in 2010 11 Extra funding announced for the Warm Front programme will not deliver the scale and speed of change that is needed Programmes aimed at improving the energy efficiency of existing buildings should be the number one priority for green fiscal stimulus It is disappointing that the wider fiscal stimulus package contains hundreds of millions of pounds for road building and widening The Treasury should publish an assessment of the net impacts of its fiscal stimulus package on the environment The second part of the report looks at green taxation In real terms revenue from green taxes has gone down slightly since 1998 while revenue from all taxation has increased by around 30 per cent On aviation taxes the Committee criticise the Treasury s backtracking on replacing Air Passenger Duty with a per plane charge and exhorts the Government to seek reform of the Chicago Convention so as to allow taxation of international aviation fuel On motoring taxes it calls for re examination of the merits and practicalities of a car scrappage scheme to pay people to trade

in their existing older cars for newer more efficient models      *Innovation Across Central Government* Great Britain. National Audit Office, 2009 Government faces increasing pressure to do more with fewer financial resources and with challenges such as climate change and an ageing population will require innovation in public services Departments have started to implement some of the recommendations of the National Audit Office's 2006 report on innovation HC 1447 I session 2005-06 ISBN 9780102942330 but are still not maximising the opportunities to innovate The majority of cases of innovation originate with senior management within departments There is potential to encourage more innovation from front line staff and service users At the front line public servants can be reluctant to put forward ideas where they do not appreciate how innovation relates to the goals of the organisation and can resist change they feel is forced upon them Other barriers include risk averse attitudes within departments and a concentration on targets budgets and high profile national initiatives Departments should develop strategies for encouraging and developing innovation It is not possible to identify exactly how much central government spends on developing innovation but estimates by the NAO suggest that departments have allocated at least 3 billion in the form of innovation budgets and the Department for Innovation Universities and Skills announced a further 2.5 billion to be spent encouraging and supporting innovation from 2008-9 to 2010-11 There are no measures in place to assess the impact of this expenditure Government should make use of the survey work done by the NAO for this report and develop it further to determine how effective this expenditure is      **Walter and Miller's Textbook of**

Rainey,2013-09-01 The book represents a dramatic step forward in discussing the principles processes and practices of visionary strategic leadership While most of the existing literature covers the subject from organizational and management perspectives the book focuses on a holistic view of the corporation and all of the supporting entities and customers and stakeholders The book addresses new theories methods and practices that are in line with 21st century dynamics The book is on the cutting edge of thought and practice It discusses constructs based on the integration of the social economic ethical

technological and environmental considerations Examples are taken from numerous industries in the U S Europe Pacific Rim and South America The book portrays the global phenomenon The discussions are based on real world needs and expectations There is a huge audience of executives professionals and practitioners who need to understand the opportunities and challenges of today and in the future There are scholars professors and business leaders who will view these perspectives as real world approaches being practiced by global corporations today Cognitive Risk James Bone, Jessie H Lee, 2023-04-18 Cognitive Risk is a book about the least understood but most pervasive risk to mankind human decision making Cognitive risks are subconscious and unconscious influence factors on human decision making heuristics and biases To understand the scope of cognitive risk we look at case studies corporate and organizational failure and the science that explains why we systemically make errors in judgment and repeat the same errors The book takes a multidisciplinary and pedestrian stroll through behavioral science with a light touch using stories to explain why we consistently make cognitive errors that not only increase risks but also simultaneously fail to recognize these errors in ourselves or our organizations This science has deep roots in organizational behavior psychology human factors cognitive science and behavioral science all influenced by classic philosophers and enabled through advanced analytics and artificial intelligence The point of the book is simple Humans persist with bounded rationality but as the speed of information data money and life in general accelerates we will need the right tools to not only keep pace but to survive and thrive In light of all these factors that complicate risk the book offers a foundational solution A cognitive risk framework for enterprise risk management and cyber security There are five pillars in a cognitive risk framework with five levels of maturity yet there is no universally prescribed maturity level It is more a journey of different paths Each organization will pursue its own path but the goal is the same to minimize the errors that could have been avoided We explain why risks are hard to discuss and why we systematically ignore the aggregation of these risks hidden in collective decision making in an organization The cognitive risk framework is a framework designed to explore the two most complex risks organizations face uncertainty and decision making under uncertainty The first pillar is cognitive governance which is a structured approach for institutionalizing rational decision making across the enterprise Each pillar is complimentary and builds on the next in a succession of continuous learning There is no endpoint because the pillars evolve with technology Enterprise risk is a team effort in risk intelligence grounded in a framework for good decision making We close with a call to become designers of risk solutions enabled by the right technology and nurtured by collaboration We hope you enjoy the book with this context Energy efficiency in the federal government : government by good example? , *IT Audit Field Manual* Lewis Heuermann, 2024-09-13 Master effective IT auditing techniques from security control reviews to advanced cybersecurity practices with this essential field manual Key Features Secure and audit endpoints in Windows environments for robust defense Gain practical skills in auditing Linux systems focusing on security configurations and firewall auditing using tools
