## (and most other classes as well)

This material has been summarized from the book *Successful Math Study Skills* by Paul D. Nolting and William A. Savage.

### Introduction:

Skills like listening, note taking, time management, and memory are all important to understanding mathematics. Through the school year, we will practice and use these skills as we study math.

### Why Learn Math?

Math is part of our real everyday lives from mileage to money and from budgeting to zip codes. Not a day goes by that we are unaffected by math.

- How many miles does your car drive on a gallon of gas and how much will it cost to fill your gas tank?
- If your employer takes 20% of your gross paycheck for taxes, how much take-home pay will be left?
- Don't forget sales tax on purchases, tips paid to restaurant servers, measuring a room for new carpeting or paint, and much more.

Graduation from high school often is a step to a good job. Employers are anxious to hire and promote employees with good mathematical skills. Perhaps you wish to join the military – strong math skills will benefit you in selecting the best training areas and advancement. If you pursue careers in engineering, architecture, and the sciences, for example, a strong mathematical background will help you as you continue your formal education beyond high school.

Therefore, in addition to being a part of everyone's daily life, success in mathematics opens many job and educational opportunities.

### Math – The Language of Numbers:

Math has its own set of rules, laws, grammar, and vocabulary.

Symbols include the equal sign ( $=$ ), greater than ( $>$ ), less than, inclusion ( $<$ ), percentage (%), Greek letters ( $\Delta$ ,  $\theta$ ,  $\sigma$ ), and much more

New math words include, polynomial, exponent, proof, square root, postulates, theorems, etc.

Write down new math words and symbols in your notes with the definition and explanation. Include pictures/diagrams where necessary. Practice using the new symbols and words until you can pronounce, define and apply each new word, concept, or symbol.
