Children and Adolescents Joseph A. Durlak, 1995-07-26 Fueled by demands for reform of social and educational programs and pressured for solutions to increasing social problems among youths social policy experts have turned to the promising effectiveness of school based prevention programs School Based Prevention Programs for Children and Adolescents reviews and evaluates the design and impact of such programs pointing out in particular those exemplary prevention efforts that have worked and thus advance knowledge in the prevention field In addition to tracing the development of basic theories and practice the author discusses the factors that assist or hinder program implementation and offers specific examples to illustrate how effective programs can be modified to work He also focuses on understanding the school as an integral social and organizational structure and its special role in prevention programs This volume covers a broad range of prevention programs including prevention of behavioral social and academic problems as well as education in substance abuse and health and looks to model school based prevention programs as a step toward future prevention efforts Implementation of Health Promoting Schools Oddrun Samdal, Louise Rowling, 2013 Developing a healthy school has been a key aim for many schools across the globe yet achieving successful implementation and sustaining the positive benefits has proven to be challenging This text draws upon their wide range of international expertise and experience to demonstrate how guidelines can best be implemented **Stochastic Processes on a Lattice and Gibbs Measures** Bernard Prum, Jean Claude Fort, 1990-12-31 In many domains one encounters systems of interacting elements elements that interact more forcefully the closer they may be The historical example upon which the theory offered in this book is based is that of magnetization as it is described by the Ising model At the vertices of a regular lattice of sites atoms choos e an orientation under the influence of the orientations of the neighboring atoms But other examples are known in physics the theories of gasses fluids I in biology cells are increasingly likely to become malignant when their neighboring cells are malignant or in medecine the spread of contagious deseases geogenetics even in the social sciences spread of behavioral traits within a population Beyond the spacial aspect that is related to the idea of neighboring sites the models for all these phenomena exhibit three common features The unavoidable ignorance about the totality of the phenomenon that is being studied and the presence of a great number of often unsuspected factors that are always unquantified lead inevitably to stochastic models The concept of accident is very often inherent to the very nature of the phenomena considered so to justify this procedure one has recourse to the physicist's principle of indeterminacy or for example to the factor of chance in the Mendelian genetics of phenotypes Enhancing Autonomy in Language Education Manuel Jiménez Raya, Flávia Vieira, 2015-04-24 The book explores the idea that pedagogy for autonomy requires the integration of teacher and learner development and can be enhanced through a case based approach in teacher education A case based approach values experiential professional learning and expands professional competences necessary to promote autonomy in schools developing a critical view of language education managing local constraints so as to open up spaces for manoeuvre centring

teaching on learning interacting with others in the professional community Two strategies to implement the approach are presented and illustrated The first one involves teachers in designing implementing and evaluating experiences of pedagogy for autonomy which are the basis for writing professional narratives and building a case portfolio The second draws on teachers pedagogical experience as the basis for the construction of case materials where experiential elements are combined with theoretical input and reflective tasks so that the teachers who use those materials can reflect about and Entrepreneurship Education and Internationalisation Robert James Crammond, Denis explore their own practice Hyams-Ssekasi, 2024-06-03 Entrepreneurship Education and Internationalisation Cases Collaborations and Contexts provides a wide ranging overview of entrepreneurship education today from a global perspective Comprising three parts that address teaching and learning support and outcomes and strategic themes international educators and researchers present examples of entrepreneurship education in action within many contexts Chapters discuss across many academic fields and taught disciplines involving many industry stakeholders concerning enterprise and business creation and development and acknowledge policy and policymakers within local national and international government or educational forums Chapters showcased within this edited book range from collaborative teaching case studies course teaching styles and assessment strategies and display links with national or international industry partners Furthermore incubation opportunities examples of accelerator and university start ups or spinouts cross continent partnerships for entrepreneurship and other relevant enterprising activity between universities and industry or societal groups are also examined and appreciated
