## **Sudan North Against South:**

*Sudan's "Southern Problem"* Sebatso C. Manoeli, 2019-12-04 The book offers a history of the discourses and diplomacies of Sudan's civil wars. It explores the battle for legitimacy between the Sudanese state and Southern rebels. In particular, it examines how racial thought and rhetoric were used in international debates about the political destiny of the South. By placing the state and rebels within the same frame, the book uncovers the competition for Sudan's reputation. It reveals the discursive techniques both sides employed to elicit support from diverse audiences amidst the intellectual ferment of Pan Africanism, the Cold War, and Black liberation politics. It maintains that the interplay of silences and articulations in both the rebels and the state's texts concealed and complicated aspects of the country's political conflict. In sum, the book demonstrates that the war of words waged abroad represents a strategic but often overlooked aspect of the Sudanese civil wars.

*Darfur and the Crisis of Governance in Sudan* Salah M. Hassan, Carina E. Ray, 2009 This book provides the most comprehensive, balanced, and nuanced account yet published of the Darfur conflict's roots and the contemporary realities that shape the experiences of those living in the region.

**Elections in Africa** Dieter Nohlen, Michael Krennerich, Bernard Thibaut, 1999-07-22 Elections have always been an integral part of post-independence African politics and have assumed utmost importance in the course of recent democratisation processes. However, comparative research on the political development in Africa lacks reliable electoral data. *Elections in Africa* fills this gap. The handbook is the only reliable source for African elections from independence to the present. In the first volume of this series, *Elections in Africa* presents a country-by-country study of African nations that provides a comparative introduction on elections and electoral systems. Each country chapter examines the history of the institutional and electoral arrangements, the evolution of suffrage, and current electoral provisions. Precise and exhaustive data on national elections and referendums are presented comparatively. The book provides a definitive and comprehensive set of data on elections and electoral systems in order to facilitate comparative research. Data is presented in a systematic manner allowing for both historical and cross-national comparisons.

*Conflict in the Nuba Mountains* Samuel Totten, Amanda Grzyb, 2014-11-20 This book provides a comprehensive overview of the embattled Nuba Mountains of South Kordofan, where the Government of Sudan committed genocide by attrition in the early 1990s and where violent conflict reignited again in 2011. A range of contributors, scholars, journalists, and activists trace the genesis of the crisis from colonial-era neglect to institutionalized insecurity, emphasizing the failure of the 2005 Comprehensive Peace Agreement to address the political and social concerns of the Nuba people. This volume is essential reading for anyone who wants to understand the nuances of the contemporary crisis in the Nuba Mountains and explore its potential solutions.

*Century of Genocide* Samuel Totten, William S. Parsons, 2004-05-15 Through powerful first-person accounts, scholarly analyses, and historical data, *Century of Genocide* takes on the task of explaining how and why genocides have been perpetrated throughout the course of the twentieth century. The book assembles a group of

international scholars to discuss the causes results and ramifications of these genocides from the Armenians in the Ottoman Empire to the Jews Romani and the mentally and physically handicapped during the Holocaust and genocides in East Timor Bangladesh and Cambodia The second edition has been fully updated and featu

**Africa in the New World Order** Olayiwola Abegunrin, 2014-07-08 This book examines the role of the emerging African nations in the new international order of the twenty first century Since the end of the Cold War little significance has been placed on the African continent in the security and political considerations of the Western world However post 9 11 international security has been redefined and new challenges have been identified Thus at the beginning of the twenty first century Africa is facing a variety of new security challenges Africa has become an increasingly important battleground in the fight against terrorism Since the beginning of 2011 the new revolutions now known as the Arab Spring that swept through North Africa have created new challenges for the African continent and are compounding the African peoples struggles for poverty alleviation state stability security socio political and socio economic development democracy and good governance In addition to these crises of civil war ethnic conflict state insecurity and rampant corruption at all levels the HIV AIDS pandemic has ravaged the continent for the past four decades The only major pan African organization the African Union is unable to lead and defend the continent effectively At this crucial period when the continent is confronted with these myriad of security challenges it needs effective strong leadership that possesses both human and natural resources to play a leadership role in Africa and lead the continent in the new global order of the twenty first century The contributors to this volume analyze many of these issues and place them in the wider context of global security

*War and Peace in Sudan* Mansūr Khālid, 2003 Sudan has been at war with itself for the last forty years except for a ten year period of peace from 1972 to 1983 This book traces the root causes of the Sudanese conflict the remnants of slave culture and the rift between North and South exacerbated by a conflict of culture and religion Despite past divisions the author identifies new points of departure in the conflict particularly after the agreement reached by John Garang de Marbos in the South and the leadership of the Northern parties The main tenets of this agreement are recognition of the country s religious and cultural diversity separation between religion and the state recognition of citizenship as the sole determinant of political rights and duties and radical restructuring of the state as a quasi confederal state The author avers that these measures hold the last chance for Sudan to be united

Atmospheric Model Applications Ismail Yucel, 2012-04-04 This book covers comprehensive text and reference work on atmospheric models for methods of numerical modeling and important related areas of data assimilation and predictability It incorporates various aspects of environmental computer modeling including an historical overview of the subject approximations to land surface and atmospheric physics and dynamics radiative transfer and applications in satellite remote sensing and data assimilation With individual chapters authored by eminent professionals in their respective topics Advanced Topics in application of atmospheric models try to provide in depth guidance on some of the key applied in atmospheric models for scientists and

modelers      **Electromagnetic Radiation** Saad Bashir, 2012-06-05 The application of electromagnetic radiation in modern life is one of the most developing technologies In this timely book the authors comprehensively treat two integrated aspects of electromagnetic radiation theory and application It covers a wide scope of practical topics including medical treatment telecommunication systems and radiation effects The book sections have clear presentation some state of the art examples which makes this book an indispensable reference book for electromagnetic radiation applications      *Military Interventions in Civil Wars* Kamil C. Klosek, 2021-09-28 This book examines the motivations of military interventions in civil wars with a focus on the role of foreign direct investment FDI and the arms trade The book assumes a state centric view of international relations whereby states remain the dominant actors on the world stage It breaks away from the conventional wisdom that military interventions for economic interests are a product of domestic corporate lobbying and instead argues that states intervene to protect but not advance existing corporate investments for national strategic interests The work introduces new concepts of military interventions proxy interventions and indirect interventions which are determined by arms trade relationships between the permanent members of the United Nations Security Council UNSC and recipient countries and utilizes insights from principal agent theory whereby the permanent members of the UNSC delegate military interventions in civil wars to other countries The book concludes by examining the transformative effect of FDI on the willingness of a state to intervene militarily in a civil war focusing on the case of China in Sub Saharan Africa Provided that the current positive trends in FDI and arms trade persist we are likely to see more and not fewer military interventions in the future This book will be of much interest to students of civil wars military interventions security studies and International Relations

*Assessing Barack Obama's Africa Policy* Abdul Karim Bangura, 2014-12-16 This book contains critical analyses of President Barack Obama's foreign policy instruments toward Africa and suggests how to continue strengthen and modify these policy instruments The examination begins with the theme of policy continuity and change followed by those on military intervention competition and perceived threats crisis management politics economic development and social policy Each chapter starts with an introduction of the policy instrument provides an analysis of the instrument and concludes with suggestions This book presents the objectives for vibrant and lasting relations between Africa and the United States and the concrete measures to achieve them      **A History of Genocide in Africa** Timothy J. Stapleton, 2017-04-17 Based on a series of detailed case studies this book presents the history of genocide in Africa within the specific context of African history examining conflicts in countries such as Burundi Democratic Republic of Congo Namibia Rwanda and Sudan Why has Africa been the subject of so many accusations related to genocide Indeed the number of such allegations related to Africa has increased dramatically over the past 15 years Popular racist mythology might suggest that Africans belong to tribes that are inherently antagonistic towards each other and therefore engage in tribal warfare which cannot be rationally explained This concept is wrong as Timothy J Stapleton explains in *A History of Genocide in Africa* the many conflicts that have plagued post

colonial Africa have had very logical explanations and very few of these instances of African warring can be said to have resulted in genocide. Authored by an expert historian of Africa, this book examines the history of six African countries: Namibia, Rwanda, Burundi, Democratic Republic of Congo, Sudan, and Nigeria, in which the language of genocide has been mobilized to describe episodes of tragic mass violence. It seeks to place genocide within the context of African history, acknowledging the few instances where the international legal term genocide has been applied appropriately to episodes of mass violence in African history and identifying the many other cases where it has not, and instead the term has been used in a cynical manipulation to gain some political advantage. Readers will come to understand how, to a large extent, genocide accusations related to post-colonial Africa have often served to prolong wars and cause greater loss of life. The book also clarifies how, in areas of Africa where genocides have actually occurred, there appears to have been a common history of the imposition of racial ideologies and hierarchies during the colonial era, which, when combined with other factors such as the local geography, demography, religion, and/or economics, resulted in tragic and appalling outcomes.

New Directions in African Military History Timothy J. Stapleton, 2025-06-02. New Directions in African Military History takes a thematic approach to the history of war and military structures in Africa and highlights the under-researched areas. African Military History represents a relatively new and fast-growing sub-field bridging the previously wide gap between the well-established genres of African History and Military History. Based on a synthesis of existing literature and aimed at a wide readership, this book adopts a broad temporal range and uses select examples to highlight a series of points to cover the pre-colonial to post-colonial eras and offer examples from various parts of the continent. This volume evaluates controversial academic debates, examining evidence, research methods, approaches, and changing historiographical contexts, as well as pointing to potential new areas of research. It comprises seven thematic chapters on ways of war, weapons, technology, navies, air power, battles, women, combatants, and genocide in African history. This volume will be of value to students and scholars alike interested in Modern History, Military History, and African History.
