**Suffolk Medieval Church Roof Carvings** Birkin Haward, 1997      The Angel Roofs of East Anglia Michael Rimmer, 2015-08-27 Shortlisted for the East Anglian Book Awards 2016 It has been estimated that over 90% of England's figurative medieval art was obliterated in the image destruction of the Reformation Medieval angel roofs timber structures with spectacular and ornate carvings of angels with a peculiar preponderance in East Anglia were simply too difficult for Reformation iconoclasts to reach Angel roof carvings comprise the largest surviving body of major English medieval wood sculpture Though they are both masterpieces of sculpture and engineering angel roofs have been almost completely neglected by academics and art historians because they are inaccessible fixed and challenging to photograph The Angel Roofs of East Anglia is the first detailed historical and photographic study of the region's many medieval angel roofs It shows the artistry and architecture of these inaccessible and little studied medieval artworks in more detail and clarity than ever before and explains how they were made by whom and why Michael Rimmer redresses the scholarly neglect and brings the beauty craftsmanship and history of these astonishing medieval creations to the reader The book also offers a fascinating new answer to the question of why angel roofs are so overwhelmingly an East Anglian phenomenon but relatively rare elsewhere in the country      *Roof Bosses in Medieval Churches* Charles John Philip Cave, 1948      Masterpieces of Medieval Open Timber Roofs Raphael Brandon, J. Arthur Brandon, 2013-02-20 Excellently framed and designed with bold receding arches the open timber roofs of the medieval period featured massive moldings carved timbers and intricate tracery Today these roofs are recognized for their striking beauty rich ornamentation and the consummate skills of the carpenters and builders who crafted them This excellent reproduction of a rare nineteenth century volume includes numerous full page illustrations and construction details revealing a wealth of information on the major roof styles tie beam trussed rafter hammer beam and collar braced of medieval English churches More than 50 illustrations of 34 English churches are included among them the exquisite double hammer beam roof of Knapton Church in Norwich the richly ornamented roof over Trinity Chapel Cirencester Church in Gloucestershire and the magnificent roof over Wymondham Church in Norfolk in which hammer beams boldly projecting into the nave are exquisitely carved into figures of angels with expanding wings These and many more masterly constructions are captured in the authors own geometric and perspective drawings done on site superbly reproduced here in detailed highly accurate engravings In addition to a wealth of pictorial detail the authors also provide an informative general introduction to the major types of roof construction as well as expert commentary on each individual roof describing its distinguishing characteristics ornament measurements and other details Artists and illustrators will prize these beautifully rendered plates for their beauty and detail while architects antiquarians and lovers of things medieval will appreciate the authenticity of the plates and the knowledgeable commentary of the architect authors      *The Open Timber Roofs of the Middle Ages* Raphael Brandon, Joshua Arthur Brandon, 1849      Stories in Stone Martial Rose, Julia

Hedgecoe,2001-01-31 Situated 80 feet up from the floor of the Norwich Cathedral the roof bosses are too distant to be appreciated by worshippers Their detail is discernible only from special vantage points or through binoculars This book brings them to the public through photographs described in a scholarly text **Wood Carvings in English Churches**

Francis Bond,2023-07-18 This book is a comprehensive study of wood carvings in English churches It includes detailed photographs and descriptions of the carvings along with analysis of their significance and meaning The book is an essential resource for anyone interested in English church architecture or medieval art This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant Late Medieval Roof Bosses in the Churches of Devon

Susan Andrew,2011 The extensive survival of late medieval bosses in the roofs of many parish churches in Devon has long been recognised These carvings escaped the widespread destruction of images during the Reformation through their relative inaccessibility and yet most have never before been recorded nor has systematic study been made of their design their positioning within a sacred space or the ways in which they may have been viewed and used by a largely illiterate audience This thesis rectifies this oversight in its detailed documentation and photography of figural roof bosses and contextual information from 121 churches across the county appended as a gazetteer and in its thorough analysis which considers the varied interactions between the people of the parish and their carvings The thesis reviews the literature on roof bosses in Britain particularly the work of C J P Cave whose studies have hitherto dominated the field before considering materiality and method namely the properties of oak the dating of the timber the carvers and the carving process and the surface finish and visibility of roof bosses The social religious and decorative context is then discussed especially the role of ecclesiastical authorities in the life of the parish church and its people and the motivation of patrons clergy and laity in the decoration of their parish church An exploration of motifs carved on roof bosses follows with these motifs linked to other images within the parish church the cathedral and the wider world to the words of the sermon and the confessional and to scriptural texts and popular literature Medieval understandings of vision are considered as are the circumstances in which roof bosses may have been seen and used The thesis argues in particular that many bosses may have served as mnemonic devices and aids to prayer in a penitential process which sought to cure the soul of sin The thesis concludes with case studies of six parish churches from across Devon which confirm that these carvings should be recognised as a significant resource for our understanding of the late medieval parish church and its people in the Diocese of Exeter and beyond **FROM BEARS TO BISHOPS** PAUL. HARLEY,2018 **Animal Carvings in British**

**Churches** M. D. Anderson, 2011-02-17 First published in 1938 M D Anderson's *Animal Carvings in British Churches* examines the medieval craft of animal carving by bringing together examples of various types considering their sources and describing the legends associated with them Included in the study are fabulous creatures and human monstrosities showing the often fanciful work of carvers in depicting centaurs mermaids dragons and other such creatures Also highlighted are cases of real yet exotic or non native animals which the artists and craftsmen have never seen and which thus tended to be imagined in highly exaggerated and unconventional ways This small volume illustrated with several dozen photographic plates and containing a list of animal carvings and their locations around Britain will continue to be a useful historical companion to anyone interested in the study of medieval church carvings

*The Open Timber Roofs of the Middle Ages* Raphael Brandon, Joshua Arthur Brandon, 1977-01-01 Originally published in 1849 this is a detailed study of roof structures including aesthetic details of churches of the Middle Ages in England The illustrations are highly detailed drawings of open timber roofs with measurements enlarged decorative details etc of tie beam trussed rafter hammer beam and collar braced roofs The work presents working drawings of no fewer than 35 church roofs The authors were architects who visited many of the remaining specimens and selected for illustration those roofs which appeared most worthy of remark as well as for the excellence of their framing and design as for affording specimens of the various methods of discussion Of these the authors have furnished geometrical and perspective drawings from careful measurements taken by themselves
