published in 1981 This volume is unique as to date no previous book and no collection of papers one could assemble from the literature addresses or achieves for the field of family therapy what is accomplished in this handbook It responds to a pressing need for a comprehensive source that will enable students practitioners and researchers to compare and assess critically for themselves an array of major current clinical concepts in family therapy *Family and Marital Psychotherapy (Psychology Revivals)* Sue Walrond-Skinner, 2014-01-09 The family therapy movement had from its earliest days been marked by a surge of creativity and by the energy of the new ideas it generated Originally published in 1979 the authors of the original essays collected together in this book felt that the time had come to take stock and to scrutinise more carefully the meaning and effectiveness of this new psychotherapeutic method within the particular conditions prevailing Britain at the time The book focuses on issues relating to theory research and practice and while concentrating on three sub specialities of family therapy family group therapy marital therapy and network therapy the papers cover a wide variety of topics In addition to papers by practitioners and teachers of family therapy two contributions are included from the field of academic psychology Before this much of the family therapy literature had been presented in the form of an uncritical eulogy of the method The special interest of this book lies in its attempt to bring a critical perspective to bear upon family therapy and its application Moreover in contrast with much that had been previously written the authors sought to make a distinctive contribution to the development of family therapy through their effort to integrate rather than to polarise what is valuable within a variety of different theoretical and empirical approaches **Marriage and Family Therapy** Linda Metcalf, 2011-06-23 There are many different models of marriage and family therapy the challenge for students and beginning practitioners is deciding which one best suits their individual purposes This highly practical volume elucidates the defining characteristics of 14 contemporary models including their history views of change views of family and the role of the therapist and methods of assessing family dynamics goal setting facilitating change and knowing when to terminate Each chapter also includes a template for implementing therapy models and realistic case studies many drawn from actual practice to illustrate how each model would address common issues In addition the volume includes extensive interviews with master therapists such as Albert Ellis Insoo Kim Berg Sue Johnson Susan McDaniel Derald Wing Sue and many others They share their ideas of the ways in which change occurs how they set goals and how they perform therapy For further clarification each therapist illustrates how he she would proceed via the same case study Learning how to perform effective family therapy can be an arduous process of trial and error yet this resource will ease the way for students and currently practicing family therapists who need to revisit the basics Modalities Included Bowen Family Systems Theory Contextual Family Therapy Cognitive Behavioral Family Therapy Models Rational Emotive Behavior Therapy Symbolic Experiential Family Therapy Satir Human Validation Process Model Milan Systemic Family Therapy Structural Family Therapy Strategic Family Therapy Solution Focused Brief Therapy with Families Narrative Therapy with Families Emotionally Focused Therapy

Shueman, Benjamin B.

Wolman, 2012-12-06 Family and marital therapies are rapidly becoming highly used methods of treatment of mental disorders and are no longer ancillary methods to individual psychotherapy The last few decades have brought about an increasing awareness of the fact that excluding organic etiology practically all mental disorders are caused fostered and or related to faulty interpersonal relations As a rule the earlier in life one is exposed to noxious factors the more severe is the damage Thus early child parents and child siblings interactions are highly relevant determinants of mental health and mental disorder Moreover parents themselves do not live in a vacuum Their marital interaction significantly contributes to their own mental health or to its decline and parent child relationships are greatly influenced by the nature of intraparental relationships Parental discord conflicts and abandonment affect the child's personality development Thus family and marital therapy is more than therapy it is an important contribution to the prevention of mental disorder The present volume is comprised of three parts The first primarily theoretical analyzes the fundamental aspects of marital and family therapy The second part describes the various therapeutic techniques and the last deals with several specific issues It gives me great pleasure to acknowledge my gratitude to my coeditor Dr George Stricker Without his thorough and devoted efforts this volume could not have come into being I am also profoundly indebted to our consulting editors Dr James Framo Dr
