Eary, Edward Anson Reed, 1958 Fredrick Eary, Edward Anson Reed, 1960 Techniques of Pressworking Sheet Metal, Etc Donald Frederick EARY (and REED (Edward Anson)),1960 Techniques of pressworking sheet metal; an engineering approach to die design Donald F. Eary, 1958 Fundamentals of Modern Manufacturing Mikell P. Groover, 2010-01-07 Engineers rely on Groover because of the book s quantitative and engineering oriented approach that provides more equations and numerical problem exercises The fourth edition introduces more modern topics including new materials processes and systems End of chapter problems are also thoroughly revised to make the material more relevant Several figures have been enhanced to significantly improve the quality of artwork All of these changes will help engineers better understand the topic and how to apply it in the field AI Applications in Sheet Metal Forming Shailendra Kumar, Hussein M. A. Hussein, 2016-10-25 This book comprises chapters on research work done around the globe in the area of artificial intelligence AI applications in sheet metal forming The first chapter offers an introduction to various AI techniques and sheet metal forming while subsequent chapters describe traditional procedures methods used in various sheet metal forming processes and focus on the automation of those processes by means of AI techniques such as KBS ANN GA CBR etc Feature recognition and the manufacturability assessment of sheet metal parts process planning strip layout design selecting the type and size of die components die modeling and predicting die life are some of the most important aspects of sheet metal work Traditionally these activities are highly experience based tedious and time consuming In response researchers in several countries have applied various AI techniques to automate these activities which are covered in this book This book will be useful for engineers working in sheet metal industries and will serve to provide future direction to young researchers and students working in the area
