Cornfield, 2013-11-11 Workers Managers and Technological Change Emerging Patterns of Labor Relations contributes significantly to an important subject Technological change is one of the most powerful forces transforming the American industrial relations In fact the synergistic relationships between technology and industrial system relations are so complex that they are not well or completely understood We know that the impact of technology while not independent of social forces already has been profound it has transformed occupations creating new skills and destroying others altered the power relationships between workers and managers and changed the way workers learn and work Technology also has made it possible to decentralize some economic activities out of large metropolitan areas and into small towns rural areas and other countries Most important information technology makes it possible for international corporations to operate on a global basis Indeed some international corporations especially those based in the United States are losing their national identities detaching the welfare of corporations from that of particular workers and communities Internationalization facilitated by information technology has transformed industrial relations systems A major objective of the traditional American industrial relations system was to take labor out of competition     **Technology Choice** Kelvin W Willoughby, 2019-07-09 This book attempts to provide a theoretical framework for answering difficult questions evoked by the concept of technology choice primarily by conducting a review of the Appropriate Technology movement and its ideas and experiments     *Technological Change and Employment* Ronald Schettkat, Michael Wagner, 2019-07-08 No detailed description available for Technological Change and Employment     Technological Change In The German Democratic Republic Raymond Bentley, 2019-07-11 Focusing on East Germany's capacity to innovate and diffuse technology this book sheds light on the technological gap that has developed between the two Germanies Dr Bentley compares the sophistication of GDR and FRG technology in different industrial branches evaluates the strengths and weaknesses of the GDR's research and development system compares the R D effort of the two Germanies and discusses the government policies that affected technological change in GDR industry from 1945 to
