argues that this dominant paradigm needs to be supplemented by the perspective of alterity in the impact of Information Technology in different regions. Local experts draw upon a range of Asian cases to demonstrate how alterity defined here as a condition of privileging the hitherto marginal and subterranean aspects of a capitalist world order through the capabilities of information and communications technologies offers an alternative to the paradigm of inevitable material advances and political liberalization. Calling attention to the unique social and political uses being made of IT in Asia in the service of offline and online causes predominantly filtered by pre-existing social milieus, the contributors examine the multiple dimensions of Asian differences in the sociology and politics of IT and show how present trends suggest that advanced electronic media will not necessarily be embraced in a smooth unilinear fashion throughout Asia. This book will appeal to any reader interested in the nexus between society and IT in Asia.

Technology and the Pursuit of Economic Growth David C. Mowery, Nathan Rosenberg, 1991-07-26. Technology's contribution to economic growth and competitiveness has been the subject of vigorous debate in recent years. This book demonstrates the importance of a historical perspective in understanding the role of technological innovation in the economy. The authors examine key episodes and institutions in the development of the U.S. research system and in the development of the research systems of other industrial economies. They argue that the large potential contributions of economics to the understanding of technology and economic growth have been constrained by the narrow theoretical framework employed within neoclassical economics. A richer framework, they believe, will support a more fruitful dialogue among economists, policymakers, and managers on the organization of public and private institutions for innovation. David Mowery is Associate Professor of Business and Public Policy at the School of Business Administration, University of California Berkeley. Nathan S. Rosenberg is Fairleigh Dickinson Professor of Economics at Stanford University. He is the author of *Inside the Black Box: Technology and Economics* (CUP, 1983).
