Technological Utopianism In American Culture:

Technological Utopianism in American Culture Howard P. Segal, 2005-11-07 Featuring twenty five writers in all this book includes Howard P Segal s acclaimed work on utopian visionaries **Technological Utopianism in American Culture** Howard P. Segal, 1985 **Technological Utopianism in American Culture** Howard P. Segal, 1975 **Technology and Utopia** Howard P. Segal, 2006 Segal examines the historical connection between technology and utopia and shows how this connection is not just a contemporary western concept but one that stretches back several centuries [American Foreign Policy and the Utopian Imagination](#) Susan M. Matarese, 2010-03-02 With the collapse of the Soviet Union and the end of the Cold War American decision makers have been forced to confront anew questions about the role of the United States in world affairs What are the responsibilities of the United States toward other countries What are the appropriate uses and limitation of American power And what from an American point of view would be the ideal shape of the imagined New World Order However U S policymakers may resolve such issues their thinking will be influenced by assumptions deeply embedded in American culture Some of those beliefs derive from the nation s distinctive history geography and resources But others are rooted in what Susan M Matarese calls the national image a set of emotionally charged relatively coherent ideas about the special qualities of the United States and its place in the world Building on a long tradition of scholarship that looks to works of literature for insights into national myths and symbols Matarese examines a rich trove of utopian fiction written by Americans during the late nineteenth century Such writings she shows provide a useful window into the popular imagination revealing widely shared notions about the foreign policy of an idealized America notions that have proven remarkably resilient in the twentieth century as well Indeed even in the post Cold War era one can find striking similarities between the foreign policy goals of the Bush and Clinton administrations and the dreams of America s utopian architects a century earlier The author concludes with an appeal for greater humility and realism in the formation of U S foreign policy and a recognition of the limits of American power in what is likely to be an increasingly fluid fragmented and multipolar world

International Organization as Technocratic Utopia Jens Steffek, 2021 This volume examines the development of the idea of technocratic internationalism the promotion of the involvement of experts in the workings of international relations especially in international organizations such as the United Nations and European Union **The Enchantments of Technology** Lee Bailey, 2010-10-01 In *The Enchantments of Technology* Lee Worth Bailey erases the conventional distinction between myth and machine in order to explore the passionate foundations concealed in technological culture and address its complex ethical moral and social implications Bailey argues that technological society does not simply disenchant the world with its reductive methods and mechanical metaphors then shape machines with political motives but is also borne by a deeper subversive undertow of enchantment Addressing examples to explore the complexities of these enchantments his thought is full of illuminating examinations of seductively engaging technologies ranging from the old camera obscura to new

automobiles robots airplanes and spaceships This volume builds on the work of numerous scholars including Jacques Ellul and Jean Brun on the phenomenological and spiritual aspects of technology Carl Jung on the archetypal collective unconscious approach to myth and Martin Heidegger on Being itself Bailey creates a dynamic interdisciplinary postmodern examination of how our machines and their environments embody not only reason but also desires *Victorian Visions of Suburban Utopia* Nathaniel Robert Walker, 2020 A study of British and American Utopian writing of the 1800s in the context of developments in real architectural political and cultural life The book studies utopian visions published in the UK and the USA in the 1800s by writers such as Robert Owen James Silk Buckingham Edward Bellamy and William Morris New Directions in American Reception Study Philip Goldstein, James L. Machor, 2008-01-30 This collection reconsiders and extends reception research in literary studies book history and media cultural studies and marks out new directions for such work by reevaluating its methodologies and by examining not only traditional American literature but also women's African American and multicultural literatures popular culture the ordinary reader and the role of reception in the history of the book **The Individual and Utopia** Clint Jones, Cameron Ellis, 2016-03-09 Central to the idea of a perfect society is the idea that communities must be strong and bound together with shared ideologies However while this may be true rarely are the individuals that comprise a community given primacy of place as central to a strong communal theory This volume moves away from the dominant current macro level theorising on the subject of identity and its relationship to and with globalising trends focusing instead on the individual's relationship with utopia so as to offer new interpretive approaches for engaging with and examining utopian individuality Interdisciplinary in scope and bringing together work from around the world *The Individual and Utopia* enquires after the nature of the utopian as citizen demonstrating the inherent value of making the individual central to utopian theorizing and highlighting the methodologies necessary for examining the utopian individual The various approaches employed reveal what it is to be an individual yoked by the idea of citizenship and challenge the ways that we have traditionally been taught to think of the individual as citizen As such it will appeal to scholars with interests in social theory philosophy literature cultural studies architecture and feminist thought whose work intersects with political thought utopian theorizing or the study of humanity or human nature The Cambridge Companion to Utopian Literature Gregory Claeys, 2010-08-05 Since the publication of Thomas More's genre defining work *Utopia* in 1516 the field of utopian literature has evolved into an ever expanding domain This Companion presents an extensive historical survey of the development of utopianism from the publication of *Utopia* to today's dark and despairing tendency towards dystopian pessimism epitomised by works such as George Orwell's *Nineteen Eighty Four* and Margaret Atwood's *The Handmaid's Tale* Chapters address the difficult definition of the concept of utopia and consider its relation to science fiction and other literary genres The volume takes an innovative approach to the major themes predominating within the utopian and dystopian literary tradition including feminism romance and ecology and explores in detail the vexed question of the purportedly

western nature of the concept of utopia The reader is provided with a balanced overview of the evolution and current state of a long standing rich tradition of historical political and literary scholarship **Avant-Garde in the Cornfields**

Visualizing Utopia M. G. Kemperink, Willemien H.S. Roenhorst, 2007 This volume contains the essays presented at the workshop Visualizing Utopia held in May 2005 organized by Mary Kemperink and Willemien Roenhorst The essays presented here discuss utopian thinking from 1890 until 1930 From the end of the eighteenth century this utopian thinking developed from what can be called classic utopianism into modern utopianism Utopianism unmarked by temporality made way for a tale situated in time future time Thus what was first regarded as merely a thought experiment gradually assumed the character of a real political programme In their view of the new world and new people writers artists architects social reformers cultural critics politicians etc would often draw on representations already present in the culture These could be biblical representations such as those of the Apocalypse Christ the Saviour and earthly paradise or ancient myths such as those of the Age of Gold Arcadia the sun drenched world of Gnosticism and the Wagnerian mythological universe The workshop concentrated on the following two aspects the way in which the future Utopia and the path that would lead to its realization was given shape in the artistic field as well as in the non artistic field and the question to which culturally rooted concepts these representations were related This double line of approach created the opportunity for specialized researchers from different disciplines history cultural history art history history of architecture literary history to discuss utopianism as it manifested itself in Europe and the United States at the end of the nineteenth and the beginning of the twentieth century

Not So Fast Doug Hill, 2016-10-15 There's a well known story about an older fish who swims by two younger fish and asks "How's the water?" The younger fish are puzzled and ask "What's water?" They ask many of us today might ask a similar question "What's technology?" Technology defines the world we live in yet we're so immersed in it so encompassed by it that we mostly take it for granted. Seldom if ever do we stop to ask what technology is. Failing to ask that question we fail to perceive all the ways it might be shaping us. Usually when we hear the word technology we automatically think of digital devices and their myriad applications. As revolutionary as smartphones, online shopping and social networks may seem, however they fit into long standing, deeply entrenched patterns of technological thought as well as practice. Generations of skeptics have questioned how well served we are by those patterns of thought and practice even as generations of enthusiasts have promised that the latest innovations will deliver us soon to Paradise. We're not there yet but the cyber utopians of Silicon Valley keep telling us it's right around the corner. What is technology and how is it shaping us? In search of answers to those crucial questions *Not So Fast* draws on the insights of dozens of scholars and artists who have thought deeply about the meanings of machines. The book explores such dynamics as technological drift, technological momentum, technological disequilibrium and technological autonomy to help us understand the interconnected, interwoven and interdependent phenomena of our technological world. In the course of that exploration Doug Hill poses penetrating questions of his own among them: Do we have as much control over our machines as we think? And who can we rely on to guide the technological forces that will determine the future of the planet?

Crime, Critique and Utopia Margaret Malloch, Bill Munro, 2013-05-30 This book explores the relevance of utopia in relation to contemporary criminology. The range of contributors explore the application of a utopian method for uncovering the potential within criminology and criminal justice as well as the relevance of the utopian impulse for developing a challenge to the status quo in academia and beyond.

Utopias Howard P. Segal, 2012-03-02 This brief history connects the past and present of utopian thought from the first utopias in ancient Greece right up to present day visions of cyberspace communities and paradise. Explores the purpose of utopias, what they reveal about the societies who conceive them and how utopias have changed over the centuries. Unique in including both non-Western and Western visions of utopia. Explores the many forms utopias have taken: prophecies and oratory, writings, political movements, world's fairs, physical communities and also discusses high tech and cyberspace visions for the first time. The first book to analyze the implicitly utopian dimensions of reform crusades like Technocracy of the 1930s and Modernization Theory of the 1950s and the laptop classroom initiatives of recent years.

Utopias and Architecture Nathaniel Coleman, 2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re-invention of what is. Through a detailed and innovative re-assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design. With unparalleled depth and focus of vision on the work of Le Corbusier, Louis I Kahn and Aldo van Eyck.

this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture

Utopias in Nonfiction Film Simon Spiegel, 2022-01-11 Comprehensive and thorough *Utopias in Nonfiction Film* takes a new direction in its surprise application to documentary that has the potential to shake up the field Jane Gaines Columbia University USA Spiegel has introduced a new sub genre to utopian studies the documentary film The book covers an impressive range of films making the book one of the few truly international and comparative works in utopian studies Lyman Tower Sargent University of Missouri St Louis USA Simon Spiegel's magisterial overview of utopian documentaries and nonfiction films is a treasure trove of information and unearths many forgotten and half forgotten films providing perceptive discussions of sidelined movies that deserve his and our critical scrutiny Eckart Voigts University of Braunschweig Institute of Technology Germany This book is the first major study on utopias in nonfiction film Since the publication of Thomas More's *Utopia* more than 500 years ago countless books have been written which describe a better world But in film positive utopias seem to be nonexistent So far research has focused almost exclusively on dystopias since positive outlooks seem to run contrary to the media's requirement *Utopias in Nonfiction Film* takes a new approach starting from the insight that literary utopias are first and foremost meant as a reaction to the ills of the present and not as entertaining stories it looks at documentary and propaganda films an area which so far has been completely ignored by research Combining insights from documentary research and utopian studies a vast and very diverse corpus of films is analysed Among them are Zionist propaganda films cinematic city utopias socialist films of the future as well as web videos produced by the Islamist terrorist group ISIS

Labor's End Jason Resnikoff, 2022-01-18 *Labor's End* traces the discourse around automation from its origins in the factory to its wide ranging implications in political and social life As Jason Resnikoff shows the term automation expressed the conviction that industrial progress meant the inevitable abolition of manual labor from industry But the real substance of the term reflected industry's desire to hide an intensification of human work and labor's loss of power and protection behind magnificent machinery and a starry eyed faith in technological revolution The rhetorical power of the automation ideology revealed and perpetuated a belief that the idea of freedom was incompatible with the activity of work From there political actors ruled out the workplace as a site of politics while some of labor's staunchest allies dismissed sped up tasks expanded workloads and incipient deindustrialization in the name of technological progress A
