Technological Change And Regional Development In Europe Contributions To Economics S:

Technical Change and Economic Growth George M. Korres, 2016-12-05 Technological change is not only a determinant of growth but is also a pivotal factor in international competition and the modernization of an economy In one of the most in depth and detailed studies of its kind George Korres analyzes the macroeconomic and the microeconomic factors influencing the economics of innovation and the economic relations between technology innovation knowledge and productivity In particular this book examines both the theoretical framework and the applications for empirical results This second edition contributes updated figures and estimations for technical change from EU member states and features new subjects including growth models productivity models production function models and non parametric models In one of the most in depth and detailed studies of its kind this book captures all the existing contemporary techniques in the theoretical fields as well as the empirical applications of the models

Technological Change, Economic Development and Space Cristoforo S. Bertuglia, Manfred M. Fischer, Giorgio Preto, 2012-12-06 The pressures of global competition are affecting regions throughout the world and making it increasingly necessary to understand the complex underlying mechanisms and the potential for innovation offered by new technology Success in economic restructuring depends not only on the technology itself but the professional and entrepreneurial skills available and the support of provided by institutions and information networks The very local nature these phenomena which are critical to the innovative propensity of firms operating within the region introduces an inevitable spatial dimension The time therefore seems ripe to bring together contributions from scholars working in different but related disciplines with the aim of investigating the triangular relationship between technological change economic development and space The present volume offers a compact review of current theoretical developments and valuable insights deriving from recent empirical studies carried out both within Europe and elsewhere All those contributing to this volume are actively involved in research in the field Without their intellectual contribution and willingness to participate in this joint project the book would not have been possible We should like in addition to thank Angela Spence for her capable assistance in coordinating the various stages of preparation of the book as well as her translation work and careful linguistic editing Thanks also go to Paola Stasi for her meticulous copy editing and help in preparing the indices Their work has been invaluable in moulding together in a single volume contributions from so many different sources

Economic Systems of Innovation in the Arab Region Samia Mohamed Nour, 2016-04-30 The Arab region has become a hotbed of economic growth in recent decades While this growth has indisputably brought in wealth there are still countless questions about the characteristics constraints and implications of the region s systems of innovation Do these systems even exist in the Arab region How does the current economic structure affect regional innovation Is the presence of natural resources a help or a hindrance Economic Systems of Innovation in the Arab Region discusses the causes consequences and implications of poor systems of innovation in the Middle East and North Africa By examining the

comparative weakness of innovation the economic structure and the diversity of the region Nour shows that the development of Arab regional systems of innovation is contingent upon the development of adequate economic policies and incentives in the area Her contribution is key for students and scholars of economics innovation and international relations **Tech, Smart Cities, and Regional Development in Contemporary Russia** Bruno S. Sergi,2019-07-28 With chapters on FinTech the cost of technological growth and innovation risk management Tech Smart Cities and Regional Development in Contemporary Russia grapples with ideas about technology and the intertwined issues that Russia faces in the 21st Century

Human Capital and Regional Development in Europe Claude Diebolt,Ralph Hippe,2022-01-07 Human capital is of utmost importance for the future of our knowledge economies and societies However it is unequally distributed in Europe contributing to marked spatial patterns of economic prosperity within and across countries In many cases these patterns have a long history To understand them better it requires to go back in time when mass schooling was starting to become a reality across Europe Taking a long run perspective over more than 150 years this book shows the development and the distribution of human capital in the regions of Europe and its connections with the economy It provides insights into recent research findings in this area including theoretical advances and the use of new empirical data *International Trade, Wage Inequality and the Developing Economy* Sugata Marjit,Rajat Acharyya,2012-12-06 This book deals with the impact that international trade is likely to have on the skilled unskilled wage gap in a typical developing economy This is the first theoretical monograph on this particular issue which has already generated substantial debate and voluminous work for the developed countries A unique feature of this work is that it tries to explain the possibility of rising inequality across trading nations and looks at the segmented labour markets of the poor economies It makes convincing arguments that the standard general equilibrium models the main workhorse of trade theory can be given a creative facelift to address a number of critical and emerging issues in the area of trade and development **Technological Change and Skill Development in**

Sudan Samia Mohamed Nour,2013-02-01 With the ongoing restructuring in Sudan structural issues such as the need for skill development and interaction with technological change need an in depth analysis that this book offers The central themes of this book are required skill formation upskilling of the workers and their interaction with technological change in lieu of a deficient educational system and its implications An empirical investigation of the causes and consequences of low skill and technology indicators using a primary survey at macro and micro levels is undertaken This is followed by an examination of the interaction between the low skill and technology indicators the relationships between skill upskilling and technology indicators skills mismatch the uses and impacts of ICT and differences at firm as well as industry level as well as knowledge transfer effects A set of recommendations towards the need for implementation of consistent policies increasing incentives and collaboration between public and private institutions completes the book *New Directions in Economic Geography* B. Fingleton,2007-01-01 This book is a serious attempt to cover all of the relevant subdisciplines in the geographical economics

framework I would recommend the book to students of economic geography regional economics and related disciplines Frans Boekema Journal of Regional Science this book is empirically and theoretically comprehensive in its scope The nearly eighteen authors who have contributed to this book present a truly transatlantic perspective on NEG this volume will be extremely useful to those dealing with rigorous modelling to examine spatial issues in economics geography and planning Rajiv Thakur Regional Science Policy and Practice I recommend the book The papers of a high quality well written and organized empirical analyses are based on the most advanced empirical techniques and the reader enjoys their application Roberta Capello Growth and Change A very interesting volume indeed recommended reading for everyone interested in theorizing space in economics or working in the empirical spatial economic research arena Economic Geography Research Group This important book explores original and alternative directions for economic geography following the revolution precipitated by the advent of so called new economic geography NEG Whilst to some extent the volume could be regarded as part of the inevitable creative destruction of NEG theory it does promote the continuing role of theoretical and empirical contributions within spatial economic analysis in which the rationale of scientific analysis and economic logic maintain a central place With contributions from leading experts in the field the book presents a comprehensive analysis of the extent to which NEG theory is supported in the real world By exploring whether NEG theory can be effectively applied to provide practical insights the authors highlight novel approaches emerging trends and promising new lines of enquiry in the wake of advances made by NEG Rigorous yet engaging this book will be an essential tool for academics and researchers specialising in regional studies urban and spatial economics and economic geography It will also have widespread appeal amongst policymakers involved in planning and land use

Strategic Delegation in Firms and in the Trade Union Guido S.

Merzoni,2012-12-06 Strategic delegation is a widespread phenomenon in economic and social systems In many situations the main interested party benefits from appointing a delegate to take action that the principal were he playing could not credibly take This book contributes to the literature studying such a phenomenon by extending the analysis of its implications for firms strategy in product markets by investigating how it may affect the trade union s activity by studying its dynamic influence on the evolution of strategic interactions that the delegating party is involved in The welfare effects of strategic delegation turn out to be uncertain and crucially depend on the features of the situation considered both in static and in dynamic frameworks

Regional Development Agencies in Europe Charlotte Damborg, Mike Danson, Henrik

Halkier,2017-09-29 In the past decade Europe has seen much change and at the same time the importance of the regional perspectives has significantly increased Regional Development Agencies in Europe brings together experiences of Regional and Development Agencies throughout Europe to provide material for the first major comparative study of bottom up regional policy across the continent Using an analytical framework developed by editors the contributors evaluate the long term potential and limitations of the RDAs in terms of promoting regional and economic development Institutional and other

preconditions for successful regional policies are identified and combined with a broad analytical and geographical coverage that includes Eastern Europe a clearer picture of the relevance of the RDAs emerges

Handbook of Regional Growth and Development Theories Roberta Capello, Peter Nijkamp, 2019 Regional economics an established discipline for several decades has undergone a period of rapid change in the last ten years resulting in the emergence of several new perspectives At the same time the methodology of regional economics has also experienced some surprising developments This fully revised and updated Handbook brings together contributions looking at new pathways in regional economics written by many well known international scholars The aim is to present the most cutting edge theories explaining regional growth and local development The authors highlight the recent advances in theories the normative potentialities of these theories and the cross fertilization of ideas between regional and mainstream economists It will be an essential source of reference and information for both scholars and students in the field

Handbook of Research on Policies and Practices for Sustainable Economic Growth and Regional Development Korres, George M., Kourliouros, Elias, Michailidis, Maria P., 2017-03-21 New developments in socio economics aid in increased productivity of manufacturing These advances result in long term improvement of competitiveness and innovation The Handbook of Research on Policies and Practices for Sustainable Economic Growth and Regional Development is an essential reference publication for the latest scholarly information on the role of socio economics in sustainable development initiatives Featuring coverage on a variety of topics and perspectives including social economy innovation cultural management and social networking this publication is ideally designed for researchers policy makers and academicians seeking current research on different determining factors of social consequences resulting from economic crisis

Territorial Patterns of Innovation Roberta Capello, Camilla Lenzi, 2013-07-18 This edited volume describes the spatial diffusion of knowledge and innovation using a large dataset at the regional level and presents scientific evidence on the role of knowledge and innovation on regional development The empirical results support a new design for innovation policies at the regional level which could help the European Union to achieve the targets set up in its 2020 Agenda Today financial capital general information consolidated technologies and codified knowledge are readily available virtually everywhere However the ability to organize these pervasive factors into continuously innovative production processes and products is by no means pervasive and generalized rather it exists selectively only in some places where tacit knowledge is continuously created exchanged and utilized and business ideas find their way to real markets Territorial Patterns of Innovation provides evidence that contrary to popular belief local knowledge intensity does not necessarily guarantee higher innovation performance Moreover the book shows that the growth benefits deriving from innovation do not necessarily match the strength of the formal local knowledge base and that regions innovating in the absence of a strong local knowledge base can be as successful as more knowledge intensive regions in turning innovation into a higher growth rate Together the contributions in this book offer a new understanding of the relationship between

knowledge innovation and regional performance by delving beyond generally held beliefs It will be of value to regional scientists industrial economists and policymakers

Innovative Behaviour in Space and Time Cristoforo S.

Bertuglia, Silvana Lombardo, Peter Nijkamp, 2012-12-06 In the past decade there has been growing recognition that economic development is not mainly exogenously determined but to a large extent is a transformation process induced and governed by economic actors who respond to competitive institutional and political challenge This challenge and response model is increasingly accepted as a valid analytical framework in modern growth theory and also explains the popularity of endogenous growth approaches to technological innovation issues However a major and as yet largely under researched topic is the question of the diffusion and adoption of new technological changes in the context of space time dynamics This diffusion and adoption pattern has obviously clear spatial and temporal variations connected with behavioural responses which may vary over time and different locations This means that a closer analysis of spatio temporal opportunities and impediments is necessary in order to fully map the complex interactions of technology and economy in space and time This volume sets out to bring together a collection of original contributions commissioned by the editors to highlight the spatio temporal patterns and backgrounds of the diffusion and adoption of new technologies Some are in the nature of a survey others have a modelling background and again others are case studies The contributions originate from different countries and different disciplines This book is complementary to a previously published volume on technological innovation

Technological Change Economic Development and Space edited by C S Bertuglia M M Fischer and G Preto and also published by Springer Verlag 1995

Drivers of Innovation, Entrepreneurship and Regional Dynamics Karima Kourtit, Peter Nijkamp, Roger R. Stough, 2011-06-10

The need for informed and effective insights into key concepts and models of regional development and growth from an endogenous growth perspective has risen over the past decade These recent advances address in particular local and regional assets and characteristics comprising inter alia creativity knowledge innovation forces and entrepreneurship Access to and exploitation of these modern forms of human and social capital are of paramount importance for the dynamic regional economic environment in a city or region This volume offers an overview and critical treatment of the spatial economic roots opportunities and impacts of new growth strategies mainly from an evidence based perspective In the various contributions to this volume relevant findings and strategic options are interpreted and discussed from both an analytical and a policy perspective to help cultivate creativity human capital development and innovation as well as entrepreneurial activity with a view to exploit the drivers of economic development in order to strengthen the competitive edge of cities and regions

Intrapreneurship and Sustainable Human Capital João Leitão, António

Nunes, Dina Pereira, Veland Ramadani, 2020-07-29 This book elaborates on the combined challenges regarding intrapreneurship sustainability of human resources management HRM and digital transformation faced by today's organizations Representing the first such attempt in current management literature it explores the sustainable HRM

approach which focuses on connecting internal and external factors so as to achieve positive outcomes not only for the respective organization but also for the society economy and environment It also discusses cases related to HRM s role in establishing a corporate sustainability culture while also working to promote employee engagement satisfaction performance and well being In closing the book discusses the new opportunities provided by digitalization and connectivity in the field of intellectual capital which make employees the central focus of the organization in order to create sustainable competitive advantages

Money Demand in Europe Christian Müller,2012-12-06 The first of January 1999 marked the beginning of a macroeconomic experiment without precedent in modern history For the first time eleven European countries agreed to abolish their local currencies in favour of a single one the Euro Not surprisingly the necessary preparatory process has been accompanied by an intensive discussion about the best way to manage the new Euro currency properly To spur on that discourse was the principal motivation for this thesis The introductory chapter attempts to bridge economic and econometric views on money demand analysis It should help to motivate estimation procedures and to standardize interpretation techniques hopefully initiating further discussion in that direction It intends to make the following chapters more accessible In this thesis I approach the general subject in two principle ways In chapter 3 I consider technical issues dealing with time series with shifts in the mean Two years ago Helmut Liitkepohl and Pentti Saikkonen asked me to join in on a related project which became the cornerstone of this chapter I have very much appreciated the highly instructive collaboration with both these scholars

Strategic Approaches to Regional Development Iryna Kristensen,Alexandre Dubois,Jukka Teräs,2018-12-18 The existence and persistence of regional disparities between European regions require context tailored policies to promote structural change This book explores the congruence between place based development and regional competitiveness in the EU context Drawing on a range of social science disciplines this book unpicks the complexity of regional transformation processes aiming to enhance the applicability and transferability of theoretical approaches to innovation and place based regional development in diverse European territorial settings The contributors have a particular focus on less favoured regions and on the application of Smart Specialisation a strategic approach to innovation based regional development to the issues at hand The book comes at a critical moment meeting the growing demand of academics practitioners and policymakers with an interest in promoting regional economic growth and well being

Technological Change and Skill Development in Arab Gulf Countries Samia Mohamed Nour,2013-12-02 This book discusses skill formation upskilling of workers and their interaction with technological change in Gulf countries Heavy dependence on oil the Dutch Disease and the high incidence of unskilled foreign workers have caused serious structural imbalances in the labour market in the Gulf The author shows that success of economic development strategies to address such imbalances are all contingent upon the development of adequate and appropriate skills in the region This book confirms the role and impact of the deficiencies in the educational system alongside the well established effects of the excessive use of uneducated foreign

workers and lack of incentives in the labour market A comprehensive investigation of the skill problem and an elaborate in depth analysis to assess the causes consequences and relationships between poor skills and technological performance are highlights of this book This is an ideal resource for policy makers in the Gulf region and researchers of the topic **World Economic Primacy** Charles Poor Kindleberger,1996 Examines why certain countries have achieved at some periods in their history economic superiority over all other countries
