## **Technological Choices Transformation In Material Cultures Since The Neolithic:**

**Technological Choices** Pierre Lemonnier, 2002 *Technological Choices* deals with the adoption or rejection by a society of certain technological innovations. It demonstrates that in any society such choices result from cultural values and social relations rather than inherent benefits in the technology itself and highlights a revolutionary viewpoint that has crucial implications for current Western societies. The book is based on case studies covering a wide chronological and geographic span from Neolithic Europe to the modern industrial age, from the tribes of Papua New Guinea, India, and North Africa to European peasant communities. The techniques studied range from the manufacture of stone implements to the development of high-tech transportation devices. *Technological Choices* will be of great interest to students of archaeology and anthropology and the history of technology. It will also be valuable reading for economists and social historians.

**Technological Choices** Pierre Lemonnier, 1992 **Technological Choices** Pierre Lemonnier, 1993 First published in 1993, Routledge is an imprint of Taylor & Francis, an information company. **Material Encounters and Indigenous Transformations in the Early Colonial Americas**, 2019-04-09 *Material Encounters and Indigenous Transformations in the Early Colonial Americas* brings together 15 archaeological case studies that offer new perspectives on colonial period interactions in the Caribbean and surrounding areas through a specific focus on material culture and indigenous agency. **The Oxford Handbook of Archaeological Ceramic Analysis** Alice M. W. Hunt, 2017 This volume draws together topics and methodologies essential for the socio-cultural, mineralogical, and geochemical analysis of archaeological ceramic, one of the most complex and ubiquitous archaeomaterials in the archaeological record. It provides an invaluable resource for archaeologists, anthropologists, and archaeological materials scientists. **Handbook of Material Culture** Christopher Y. Tilley, 2006-01-26 Provides a critical survey of the theories, concepts, intellectual debates, substantive domains, and traditions of study characterizing the analysis of things. This handbook charts an interdisciplinary field of studies that makes a fundamental contribution to an understanding of what it means to be human. **Reconstruction, Replication and Re-enactment in the Humanities and Social Sciences** Sven Dupré, Anna Harris, Julia Kursell, Patricia Lulof, Maartje Stols-Witlox, 2025-10-01 Performative methods are playing an increasingly prominent role in research into historical production processes, material knowledge, and sensory skills, and in forms of education and public engagement in classrooms and museums. This book offers for the first time sustained interdisciplinary reflections on performative methods, variously known as Reconstruction, Replication, and Re-enactment (RRR) practices across the fields of history of science, archaeology, art history, conservation, musicology, and anthropology. Each of these fields has distinct histories, approaches, tools, and research questions. Researchers in the historical disciplines have used reconstructions to learn about the materials and practices of the past, while anthropologists and ethnographers have more often studied the re-enactments themselves, participating in these performances as engaged observers. In this book, authors bring their experiences of RRR practices

within their discipline into conversation with RRR practices in other disciplines providing a basis for interdisciplinary cross fertilization

**Ceramics and the Spanish Conquest** Gilda Hernández Sánchez, 2011-11-25 Focusing on the native ceramic technology of central Mexico during the early colonial period and the present day this book offers a refreshing view into the process of cultural continuity and change in the indigenous Mesoamerican world after the Spanish conquest

**From the Archaeological Record to Virtual Reconstruction** Juana Molina Salido, 2018-04-30 From the Archaeological Record to Virtual Reconstruction describes the use of New Information Technologies IT for the analyses and interpretation of the archaeological record of an Iron Age fortified settlement the San Chuis Hillfort San Mart n de Beduledo Allande Asturias Spain

Anthropological Perspectives on Technology Michael B. Schiffer, 2001 These fourteen original essays accept a dual premise technology pervades and is embedded in all human activities By taking that approach studies of technology address two questions central in anthropological and archaeological research today accounting for variability and change These diverse yet interrelated chapters show that to understand human lives researchers must deal with the material world that all peoples create and inhabit Therefore an anthropology of technology is not a separate discrete inquiry instead it is a way to connect how people make and use things to any activity studied ranging from religion to enculturation to communication to art Each contributor discusses theories and methods and also offers a substantial case study These detailed inquiries span human societies from the Paleolithic to the computer age By moving beyond the usual approach of examining ancient technologies particularly chipped stone and low fired ceramics this volume probes for the construction of meaning in the material world across millennia The authors of these essays find technology to be an inclusive and flexible topic that merges with studies of everything else in human activity A provocative and powerful discussion of the role of technology in human cultures At a time when archaeology has become less focused on theory and archaeology and social anthropology seem to fracture farther and farther apart the book is a breath of fresh air Professor John Douglas University of Montana

**Time, Culture and Identity** Julian Thomas, 2002-01-31 Time Culture and Identity questions the modern western distinctions between nature and culture mind and body object and subject Drawing on the philosophy of Martin Heidegger Julian Thomas develops a way of writing about the past in which time is seen as central to the emergence of the identities of people and objects

**The Oxford Handbook of the Archaeology of Ritual and Religion** Timothy Insoll, 2011-10-28 The Oxford Handbook of the Archaeology of Ritual and Religion provides a comprehensive overview by period and region of the relevant archaeological material in relation to theory methodology definition and practice Although as the title indicates the focus is upon archaeological investigations of ritual and religion by necessity ideas and evidence from other disciplines are also included among them anthropology ethnography religious studies and history The Handbook covers a global span Africa Asia Australasia Europe and the Americas and reaches from the earliest prehistory the Lower and Middle Palaeolithic to modern times In addition chapters focus upon relevant themes ranging from landscape to death from

taboo to water from gender to rites of passage from ritual to fasting and feasting Written by over sixty specialists renowned in their respective fields the Handbook presents the very best in current scholarship and will serve both as a comprehensive introduction to its subject and as a stimulus to further research

**Social Transformations in Archaeology** Kristian Kristiansen, Michael Rowlands, 2005-10-05 Social Transformations in Archaeology explores the relevance of archaeology to the study of long term change and to the understanding of our contemporary world The articles are divided into broader theoretical issues post colonial issues in a wide range of contexts archaeological examination of colonialism with case studies from the Mediterranean in the first millenium BC and historical Africa

**Bronze Age Metalwork: Techniques and traditions in the Nordic Bronze Age 1500-1100 BC** Heide W. Nørgaard, 2018-10-19 Bronze ornaments of the Nordic Bronze Age were elaborate objects that served as status symbols to communicate social hierarchy An interdisciplinary investigation of the artefacts dating from 1500 1100 BC was adopted to elucidate their manufacture and origin resulting in new insights into metal craft in northern Europe during the Bronze Age

*Agency Uncovered* Andrew Gardner, 2016-06-16 This book questions the value of the concept of agency a term used in sociological and philosophical literature to refer to individual free will in archaeology On the one hand it has been argued that previous generations of archaeologists in explaining social change in terms of structural or environmental conditions have lost sight of the real people and reduced them to passive cultural pawns on the other introducing the concept of agency to counteract this can be said to perpetuate a modern Western view of the autonomous individual who is free from social constraints This book discusses the balance between these two opposites using a range of archaeological and historical case studies including European and Asian prehistory classical Greece and Rome the Inka and other Andean cultures While focusing on the relevance of agency theory to archaeological interpretation and using it to create more diverse and open ended accounts of ancient cultures the authors also address the contemporary political and ethical implications of what is essentially a debate about the definition of human nature

**How Things Make History** Astrid Oyen, 2025-10-01 Bright red terra sigillata pots dating to the first three centuries CE can be found throughout the Western Roman provinces The pots widespread distribution and recognisability make them key evidence in the effort to reconstruct the Roman Empire s economy and society Drawing on recent ideas in material culture this book asks a radically new question what was it about the pots themselves that allowed them to travel so widely and be integrated so quickly into a range of contexts and practices To answer this question Van Oyen offers a fresh analysis in which objects are no longer passive props but rather they actively shape historical trajectories

**Archaeometallurgy in Global Perspective** Benjamin W. Roberts, Christopher P. Thornton, 2014-01-07 The study of ancient metals in their social and cultural contexts has been a topic of considerable interest in archaeology and ancient history for decades partly due to the modern dependence on technology and man made materials The formal study of Archaeometallurgy began in the 1970s 1980s and has seen a recent growth in techniques data and theoretical movements

This comprehensive sourcebook on Archaeometallurgy provides an overview of earlier research as well as a review of modern techniques written in an approachable way. Covering an extensive range of archaeological time periods and regions, this volume will be a valuable resource for those studying archaeology worldwide. It provides a clear straightforward look at the available methodologies including Smelting processes, Slag analysis, Technical Ceramics, Archaeology of Mining and Field Survey, Ethnoarchaeology, Chemical Analysis and Provenance Studies, Conservation Studies. With chapters focused on most geographic regions of Archaeometallurgical inquiry, researchers will find practical applications for metallurgical techniques in any area of their study.

Ben Roberts is a specialist in the early metallurgy and later prehistoric archaeology of Europe. He was the Curator of the European Copper and Bronze Age collections at the British Museum between 2007 and 2012 and is now a Lecturer in Prehistoric Europe in the Department of Archaeology at the Durham University, UK. Chris Thornton is a specialist in the ancient metallurgy of the Middle East, combining anthropological theory with archaeometrical analysis to understand the development and diffusion of metallurgical technologies throughout Eurasia. He is currently a Consulting Scholar of the University of Pennsylvania Museum, where he received his PhD in 2009 and the Lead Program Officer of research grants at the National Geographic Society.

*Pottery Economics in Mesoamerica* Christopher A. Pool, George J. Bey, 2022-08-23

Pottery is one of the most important classes of artifacts available to archaeologists and anthropologists. Every year, volumes of data are generated detailing ceramic production, distribution, and consumption. How these data can be interpreted in relation to the social and cultural framework of prehistoric societies in Mesoamerica is the subject of this book. Nine chapters, written by some of the most well-known and respected scholars in the field, offer readers an in-depth look at key advances from the past fifteen years. These scholars examine ethnoarchaeological studies and the Preclassic, Formative, Classic, and Postclassic periods and cover geographic areas from eastern to central Mesoamerica. In a series of case studies, contributors address a range of new and developing theories and methods for inferring the technological, organizational, and social dimensions of pottery economics and draw on a range of sociopolitical examples. Specific topics include the impacts and costs of innovations, the role of the producer in technological choices, the outcomes when errors in vessel formation are tolerated or rectified, the often undocumented multiple lives and uses of ceramic pieces, and the difficulties associated with locating and documenting ceramic production areas in tropical lowlands. A compelling collection that clearly integrates and synthesizes a wide array of data, this book is the definitive text on pottery economics in Mesoamerica and an important contribution to the fields of anthropology, archaeology, ancient history, and the economics of pre-industrial societies.
