Technologies Of Knowing A Proposal For The Human Sciences:

Technologies of Knowing John Willinsky, 2000-02-15 In this age of ever more powerful computers our ability to collect and spread knowledge is growing at an exponential rate Far from liberating humanity our information exasperation as John Willinsky describes it in this pathbreaking book has made our ability to reach conclusions about the world around us all the more difficult With little order to guide us through the mountains of new information in the Internet the public as well the sciences that have amassed such knowledge has little confidence in its potential to change the world for the better For example the overload of conflicting new findings in breast cancer research has so paralyzed progress that some researchers now recommend that women stop examining themselves to avoid the psychological burden of monthly searches for this deadly disease While some critics have condemned computers and the Internet for putting us in this age of overflow and still others have praised them for their own sake Willinsky takes a middle ground Using the fictitious Automata Data Corporation as the vehicle for an ingenious thought experiment he plays out what would happen if all information collected from social science research were centralized catalogued and processed by one company serving the public interest Willinsky describes in great detail how such an entity could work to fulfill the promises of the human sciences and technology Sure to stir debate *Technologies of Knowing* offers a starting point from which to rethink our understanding of our emerging wired world and adds new insight into how to make the uses of knowledge more democratic

If Only We Knew John Willinsky, 2002-05-03 In *If Only We Knew* John Willinsky uses current social issues and historical precedents to demonstrate that the social sciences can and should contribute far

more to public knowledge than they have in the past We have the technologies Willinsky demonstrates and need only the determination to create a public resource out of social research that can extend democratic participation and self determination as well as improve research s focus and public support If Only We Knew offers examples of why and how this is not only possible but necessary in the face of knowledge based economies and a withering public sector This book inspires the public to demand far more of research it also shows researchers how to deliver far more of knowledge s value to the public

Theoretical and Methodological Approaches to Social Sciences and Knowledge

Asunción Lopez-Varela Azcárate,2012-08-16 This is a unique and groundbreaking collection of questions and answers coming from higher education institutions on diverse fields and across a wide spectrum of countries and cultures It creates routes for further innovation collaboration amidst the Sciences both Natural and Social the Humanities and the private and public sectors of society The chapters speak across sociocultural concerns education welfare and artistic sectors under the common desire for direct responses in more effective ways by means of interaction across societal structures

Regional Conference on Science, Technology and Social Sciences (RCSTSS 2014) Mohd Amli Abdullah,Wan Kalthom Yahya,Nazirah Ramli,Siti Rosiah Mohamed,Badli Esham Ahmad,2016-07-29 This book features more than 95 papers that were presented at the bi annual Regional Conference on Science Technology and Social Sciences RCSTSS 2014 which was organized by Universiti Teknologi MARA Pahang It covers topics ranging from communications studies politics psychology education religious studies as well as business and economics The papers which have been carefully reviewed include research conducted by academicians locally regionally and globally They detail invaluable insights on the important roles played by the various disciplines in science technology and social sciences Coverage includes accounting art and design business communication economics education finance humanity information management marketing music religion social sciences and tourism Throughout clear illustrations figures and diagrams complement the research The book is a significant point of reference to academicians and students who want to pursue further research in their respective fields It also serves as a platform to disseminate research findings as a catalyst to bring out positive innovations on the development of the region

Practice and the Human Sciences Donald E. Polkinghorne,2012-02-01 Teachers nurses psychotherapists and other practitioners of care are under pressure to substitute specific prescribed techniques in place of using their own judgment Donald E Polkinghorne assembles the case for the return to judgment based practice for the professions that engage in direct person to person interaction with those they serve Set in the larger context of the technification of society Polkinghorne draws from Weber Heidegger Ihde Bourdieu de Certeau and other philosophers to trace the advancing power of the

technological worldview in Western culture and uses Aristotle Dewey and Gadamer to help make his case that we should be doing things very differently **1982 National Science Foundation Authorization** United States. Congress. House. Committee on Science and Technology. Subcommittee on Science, Research, and Technology,1981 *Enhancing Undergraduate Learning with Information Technology* National Research Council,Division of Behavioral and Social Sciences and Education,Center for Education,2002-02-09 Enhancing Undergraduate Learning with Information Technology reports on a meeting of scientists policy makers and researchers convened to discuss new approaches to undergraduate science mathematics and technology education The goal of the workshop was to inform workshop participants and the public about issues surrounding the use of information technology in education To reach this goal the workshop participants paid particular attention to the following issues What educational technologies currently exist and how they are being used to transform undergraduate science engineering mathematics and technology education What is known about the potential future impact of information technology on teaching and learning at the undergraduate level How to evaluate the impact of information technology on teaching and learning and What the future might hold **What We Know About**

Extraterrestrial Intelligence Michael Ashkenazi,2016-09-23 Have you ever wondered what could happen when we discover another communicating species outside the Earth This book addresses this question in all its complexity In addition to the physical barriers for communication such as the enormous distances where a message can take centuries to reach its recipient the book also examines the biological problems of communicating between species the problems of identifying a non Terrestrial intelligence and the ethical religious legal and other problems of conducting discussions across light years Most of the book is concerned with issues that could impinge on your life how do we share experiences with ETI Can we make shared laws Could we trade Would they have religion The book addresses these and related issues identifying potential barriers to communication and suggesting ways we can overcome them The book explores this topic through reference to human experience through analogy and thought experiment while relying on what is known to date about ourselves our world and the cosmos we live in Encyclopedia of Philosophy and the Social Sciences Byron Kaldis,2013-04-02 The entries in this encyclopedia give readers an opportunity to explore interconnections clarify commonalities as well as differences or comparative contrasts discover new fields or ideas of intellectual interest explore adjacent conceptual zones that may be found to further expand their own disciplinary domains and also understand better their own academic areas of expertise and the historical provenance of each p xxxi Proceedings of the Regional Conference on Science, Technology and Social Sciences (RCSTSS 2016) Mohd Yusri Mohamad Noor,Badli Esham Ahmad,Mohd Rozaidi Ismail,Hasnizawati Hashim,Mohd Amlil Abdullah Baharum,2018-07-20 This book features papers addressing a broad range of topics including psychology religious studies natural heritage accounting business communication education and sustainable development It serves as a platform for disseminating research findings by academicians of local regional and global prominence and acts as a catalyst

to inspire positive innovations in the development of the region It is also a significant point of reference for academicians and students This collection of selected social sciences papers is based on the theme Soaring Towards Research Excellence presented at the Regional Conference of Sciences Technology and Social Sciences RCSTSS 2016 organised bi annually by Universiti Teknologi MARA Cawangan Pahang Malaysia

Technology Teachers as Researchers Inga-Britt Skogh,Marc J. De Vries,2014-02-05 This book presents the scientific output of the TUFF research school in Sweden In this school a group of active teachers worked together on a series of educational research studies All of those studies were related to the teaching about technology and engineering The research program consisted of studies at various angles of view a philosophical view a national view and a classroom practice view The book is a showcase of how a well conducted research program for teachers can lead to good contributions to technology education research A selection of topics the nature of technological knowledge mental images of engineers and engineering the process of choosing for a study in technology teachers beliefs about technology education and assessment These topics are directly related to major issues in the international technology education research agenda The studies presented here were the basis of the authors Ph D theses The teachers chapters are preceded by a description of ideas behind the TUFF research school and the way it was realized

The Palgrave Handbook of the History of Human Sciences David McCallum,2022-08-27 The Palgrave Handbook of the History of Human Sciences offers a uniquely comprehensive and global overview of the evolution of ideas concepts and policies within the human sciences Drawn from histories of the social and psychological sciences anthropology the history and philosophy of

science and the history of ideas this collection analyses the health and welfare of populations evidence of the changing nature of our local communities cities societies or global movements and studies the way our humanness or human nature undergoes shifts because of broader technological shifts or patterns of living This Handbook serves as an authoritative reference to a vast source of representative scholarly work in interdisciplinary fields a means of understanding patterns of social change and the conduct of institutions as well as the histories of these ways of knowing probe the contexts circumstances and conditions which underpin continuity and change in the way we count analyse and understand ourselves in our different social worlds It reflects a critical scholarly interest in both traditional and emerging concerns on the relations between the biological and social sciences and between these and changes and continuities in societies and conducts as 21st century research moves into new intellectual and geographic territories more diverse fields and global problematics

The Responsible University Mads P. Sørensen, Lars Geschwind, Jouni Kekäle, Rómulo Pinheiro, 2019-12-03 This book explores how the notion of the responsible university manifests itself at various levels within Nordic higher education As the impetus of the knowledge society has catapulted the higher education sector to the forefront of policy agendas universities and other types of higher education institutions face increasing scrutiny assessment and accountability This book examines this phenomenon using the Nordic countries as cases in point given the strong public commitment towards widening participation and public research investments The editors and contributors analyse the history and current transformations of the idea of the responsible university investigate new innovations in the educational landscape and look into how universities have begun to organise themselves to become more responsible Drawing together scholars from the humanities and the social sciences this interdisciplinary collection will be of interest and value to students and scholars of the role and nature of the modern university in addition to practitioners and policy makers tasked with finding solutions to address the competing and often contradictory demands posed by a responsibility agenda
