**Technology, Crime, and Justice** M. R. McGuire, 2012-06-14 As technology comes to characterize our world in ever more comprehensive ways there are increasing questions about how the rights and wrongs of technological use can be adequately categorized To date the scope of such questions have been limited focused upon specific technologies such as the internet or bio technology with little sense of any social or historical continuities in the way technology in general has been regulated In this book for the first time the question of technology and its relation to criminal justice is approached as a whole Technology Crime and Justice analyzes a range of technologies including information communications nuclear biological transport and weapons technologies amongst many others in order to pose three interrelated questions about their affects upon criminal justice and criminal opportunity to what extent can they really be said to provide new criminal opportunity or to enhance existing ones what are the key characteristics of the ways in which such technologies have been regulated how does technology itself serve as a regulatory force both in crime control and social control more widely Technology Crime and Justice considers the implications of contemporary technology for the practice of criminal justice and relates them to key historical precedents in the way technology has been interpreted and controlled It outlines a new social way of thinking about technology in terms of its affects upon our bodies and what they can do most obviously the ways in which social life and our ability to causally interact with the world is extended in various ways It poses the question could anything like a Technomia of technology be identified a recognizable set of principles and sanctions which govern the way that it is produced and used principles also consistent with our sense of justice This book provides a key resource for students and scholars of both criminology and technology studies [Access to Information, Technology, and Justice](#) Ursula Gorham, 2017-06-30 Over the past fifteen years the dramatic increase of online self help legal re sources information and tools specifically developed for use by low income individuals without legal counsel has been promoted as one way to help those individuals who are caught in this justice gap Unfortunately however opportunities arising from the Internet and related information and communication technologies do not accrue to everyone equally as physical intellectual and social

**Digital Justice** Ethan Katsh, Orna Rabinovich-Einy, 2017-03-09 Improving access to justice has been an ongoing process and on demand justice should be a natural part of our increasingly on demand society What can we do for example when Facebook blocks our account we are harassed on Twitter discover that our credit report contains errors or receive a negative review on Airbnb How do we effectively resolve these and other such issues Digital Justice introduces the reader to new technological tools to resolve and prevent disputes bringing dispute resolution to cyberspace where those who would never look to a court for assistance can find help for instance via a smartphone The authors focus particular attention on five areas that have seen great innovation as well as large volumes of disputes ecommerce healthcare social media labor and the courts As conflicts escalate with the increase in innovation the authors emphasize the need for new dispute resolution processes and new ways to avoid disputes something that has been ignored by those seeking to improve access to justice in the past
