Technology As Magic The Triumph Of The Irrational:

Technology as Magic Richard Stivers, 1999 At first glance technology and magic would seem to be opposites Technology is perceived to be rational scientific and efficacious whereas magic is thought to be irrational superstitious and ineffective Technology and magic while separate and distinct have taken on important characteristics of the other Publisher

Technology as Magic Richard Stivers, Stivers argues that our expectations of technology in society have led to the generation of a multitude of imitation technologies that function as magical practices once did **Through the Healing Glass** John Stanislaw Sadar, 2016-02-12 In the mid 1920s a physiologist a glass chemist and a zoo embarked on a project which promised to turn buildings into medical instruments The advanced chemistry of Vita Glass mobilised theories of light and medicine health practices and glassmaking technology to compress an entire epoch's hopes for a healthy life into a glass sheet yet it did so invisibly To communicate its advantage Pilkington Bros spared no expense as they launched the most costly and sophisticated marketing campaign in their history Engineering need for Vita Glass employed leading edge market research evocative photography and vanguard techniques of advertising psychology accompanied by the claim Let in the Health Rays of Daylight Permanently through Vita Glass Windows This is the story of how despite the best efforts of two glass companies the leading marketing firm of the day and the opinions of leading medical minds Vita Glass failed However it epitomised an age of lightness and airiness sleeping porches flat roofs and ribbon windows Moreover through its remarkable print advertising it strove to shape the ideal relationship between our buildings and our bodies Gender and Early

Television Sarah Arnold, 2021-05-20 Between the nineteenth century and the mid twentieth century television transformed from an idea to an institution In Gender and Early Television Sarah Arnold traces women's relationship to the new medium of television across this period in the UK and USA She argues that women played a crucial role in its development both as producers and as audiences long before the golden age of television in the 1950s Beginning with the emergence of media entertainment in the mid nineteenth century and culminating in the rise of the post war television industries Arnold claims that all along the way women had a stake in television As keen consumers of media women also helped promote television to the public by performing as television girls Women worked as directors producers technical crew and announcers It seemed that television was open to women However as Arnold shows the increasing professionalisation of television resulted in the segregation of roles Production became the sphere of men and consumption the sphere of women While this binary has largely informed women's role in television through her analysis Arnold argues that it has not always been the case

Medical Enhancement and Posthumanity Bert Gordijn, Ruth Chadwick, 2008-10-20 As we are increasingly using new technologies to change ourselves beyond therapy and in accordance with our own desires understanding the challenges of human enhancement has become one of the most urgent topics of the current age This volume contributes to such an understanding by critically examining the pros and cons of our growing ability to shape human nature through technological

advancements The authors undertake careful analyses of decisive questions that will confront society as enhancement interventions using bio info neuro and nanotechnologies become widespread in the years to come They provide the reader with the conceptual tools necessary to address such questions fruitfully What makes the book especially attractive is the combination of conceptual historical and ethical approaches rendering it highly original In addition the well balanced structure allows both favourable and critical views to be voiced Moreover the work has a crystal clear structure As a consequence the book is accessible to a broad academic audience The issues raised are of interest to a wide reflective public concerned about science and ethics as well as to students academics and professionals in areas such as philosophy applied ethics bioethics medicine and health management

Youth Beyond the Developmental Lens Wesley W. Ellis, 2024 Wesley Ellis exposes the harmful impact of developmental psychology in youth ministry proposing a theological anthropology that frees us for deeper relationship with young people Propelled by the conviction that we must see youth as beings rather than becomings Ellis reorients us toward relational inclusion and away from rigid developmentalism

The Paradox of Citizenship in American Politics Mehnaaz Momen, 2017-08-28 This remarkable book does the unusual it embeds its focus in a larger complex operational space The migrant the refugee the citizen all emerge from that larger context The focus is not the usual detailed examination of the subject herself but that larger world of wars grabs contestations and importantly the claimers and resisters Saskia Sassen Professor of Sociology Columbia University USA This thought provoking book begins by looking at the incredible complexities of American identity and ends with the threats to civil liberties with the vast expansion of state power through technology A must read for anyone interested in the future of the promise and realities of citizenship in the modern global landscape Kevin R Johnson Dean UC Davis School of Law USA Momen focuses on the basic paradox that has long marked national identity the divide between liberal egalitarian self conception and persistent practices of exclusion and subordination The result is a thought provoking text that is sure to be of interest to scholars and students of the American experience Aziz Rana Professor of Law Cornell Law School USA This book is an exploration of American citizenship emphasizing the paradoxes that are contained normalized and strengthened by the gaps existing between proposed policies and real life practices in multiple arenas of a citizen s life The book considers the evolution of citizenship through the journey of the American nation and its identity its complexities of racial exclusion its transformations in response to domestic demands and geopolitical challenges its changing values captured in immigration policies and practices and finally its dynamics in terms of the shift in state power vis vis citizens While it aspires to analyze the meaning of citizenship in

America from the multiple perspectives of history politics and policy it pays special attention to the critical junctures where rhetoric and reality clash allowing for the production of certain paradoxes that define citizenship rights and shape political discourse

Shades of Loneliness Richard Stivers, 2004-02-09 To varying degrees loneliness has us all in its grip In this incisive and controversial book Richard Stivers rejects the recent emphasis on genetic explanations of psychological problems arguing that the very organization of technological societies is behind the pervasive experience of loneliness The extreme rationality that governs our institutions and organizations results in abstract and impersonal relationships in much of daily life Moreover as common meaning is gradually eroded our connections to others become vague and tenuous Our ensuing fear and loneliness however can be masked by an outgoing extroverted personality In its extreme form loneliness assumes pathological dimensions in neurosis and schizophrenia Stivers maintains that even here the causes remain social The various forms of neuroses and psychoses follow the key contradictions of a technological society For instance narcissism and depression reflect the tension between power and meaninglessness that characterizes modern societies Stivers demonstrates that there is a continuum from the normal technological personality through the various neuroses to full blown schizophrenia He argues that all forms of loneliness emanate from the same cause they likewise share a common dynamic despite their differences Loneliness in its many manifestations seems to be the price we must pay for living in the modern world Yet nurturing family friend and community ties can mitigate its culturally and psychologically disorganizing power This book is a clarion call for a renewal of moral awareness and custom to combat the fragmentation and depersonalization of our technological civilization

Handbook of Research on Knowledge-Intensive Organizations Jemielniak, Dariusz, Kociatkiewicz, Jerzy, 2009-03-31 Provides an international collection of studies on knowledge intensive organizations with insight into organizational realities as varied as universities consulting agencies corporations and high tech start ups

Western Culture in Gospel Context David J. Kettle, 2011-04-18 Approaching us in sovereign freedom God comes alive to us we come alive to God and all creation comes alive as a sign pointing to God In the gospel of Jesus Christ God gives and discloses himself in this immediate way as our ultimate context and host within the provisional medium of creation This life giving gospel is met by blindness however among those who live today in a collapsing Western culture This is because their imaginative world is shaped by habitual assumptions and practices that lie largely unacknowledged deep within that culture and that preclude openness to the gospel Moreover Western Christians themselves widely share these assumptions betraying the gospel into cultural captivity God calls for the conversion of Western culture to the living gospel Crucially this must include as Lesslie Newbigin recognized a repentance from modern Western assumptions about knowledge Part One explores seeking knowing and serving God as providing a true paradigm for understanding all human enquiry knowledge and action Part Two examines ten resulting hot spots where conversion from prevailing cultural assumptions is vital for authentic mission to Western culture

The Philosophy of Christopher Nolan George A. Dunn, Jason T. Eberl, 2017-06-20 As a

director writer and producer Christopher Nolan has substantially impacted contemporary cinema through avant garde films such as *Following* and *Memento* and his contribution to wider pop culture with his Dark Knight trilogy His latest film *Interstellar* delivered the same visual qualities and complex thought provoking plotlines his audience anticipates The Philosophy of Christopher Nolan collects sixteen essays written by professional philosophers and film theorists discussing themes such as self identity and self destruction moral choice and moral doubt the nature of truth and its value whether we can trust our perceptions of what's real the political psychology of heroes and villains and what it means to be a viewer of Nolan's films Whether his protagonists are squashing themselves like a bug struggling to create an identity and moral purpose for themselves suffering from their own duplicitous plots donning a mask that both strikes fear and reveals their true nature or having to weigh the lives of those they love against the greater good there are no simple solutions to the questions Nolan's films provoke exploring these questions yields its own reward

The Technocene Hermínio Martins, 2018-12-15 Hermínio Martins was one of the key pioneers of the sociology of science and technology He published extensively in Portuguese and was recognized for his academic contributions with an honorary doctorate at Lisbon 2006 and two Portuguese Medals of Honour Following his retirement from the University of Oxford he wrote prolifically in English on a wide range of topics that examined the ethical and societal consequences of the commoditization of the human body and mind These essays are deep philosophical reflections on our contemporary world and draw extensively and eclectically upon a wide range of theoretical influences including continental philosophy history and psychology to name but a few disciplines The Technocene is a selection of some of these insightful essays made available to a global audience for the first time

Techniques of Illusion Katharina Rein, 2023-05-03 This book explores stage conjuring during its golden age from about 1860 to 1910 This study provides close readings highlighting four paradigmatic illusions of the time that stand in for different kinds of illusions typical of stage magic in the golden age and analyses them within their cultural and media historical context Pepper's Ghost the archetypical mirror illusion The Vanishing Lady staging a teleportation in a time of a dizzying acceleration of transport the levitation simulating weightlessness with the help of an extended steel machinery and The Second Sight a mind reading illusion using up to date communication technologies These close readings are completed by writings focusing on visual media and expanding the scope backwards and forwards in time roughly to 1800 and to 2000 This exploration will be of great interest to students and scholars in theatre and performance studies

Empire, Colony, Genocide A. Dirk Moses, 2008-06-01 In 1944 Raphael Lemkin coined the term genocide to describe a foreign occupation that destroyed or permanently crippled a subject population In this tradition *Empire Colony Genocide* embeds genocide in the epochal geopolitical transformations of the past 500 years the European colonization of the globe the rise and fall of the continental land empires violent decolonization and the formation of nation states It thereby challenges the customary focus on twentieth century mass crimes and shows that genocide and ethnic cleansing have been intrinsic to imperial expansion

The complexity of the colonial encounter is reflected in the contrast between the insurgent identities and genocidal strategies that subaltern peoples sometimes developed to expel the occupiers and those local elites and creole groups that the occupiers sought to co opt Presenting case studies on the Americas Australia Africa Asia the Ottoman Empire Imperial Russia and the Nazi Third Reich leading authorities examine the colonial dimension of the genocide concept as well as the imperial systems and discourses that enabled conquest Empire Colony Genocide is a world history of genocide that highlights what Lemkin called the role of the human group and its tribulations **Steaming Into a Victorian Future** Julie Anne

Taddeo,Cynthia J. Miller,2013 This collection of essays explores the social and cultural aspects of steampunk examining the various manifestations of this multi faceted genre in order to better understand the steampunk sub culture and its effect on and interrelationship with popular culture and the wider society *Social Work Practice* Eileen Gambrell,2012-12-06 The

first textbook to emphasize the importance of critical thinking skills to practice this third edition of the classic Social Work Practice retains its unique focus on thinking critically about decisions that social workers make daily Organized around the phases of helping this hands on introduction highlights the decision points that social workers encounter during assessment intervention and evaluation This text together with its companion website provides students with a wealth of hands on exercises for developing and assessing their practice skills Most importantly it helps students enhance client well being by becoming critical thinkers and evidence informed practitioners *Magic and the Will to Science* Agnes Horvath,2024-03-19

This book offers a political anthropological perspective on the problematic character of science combining insights from historical sociology political theory and cultural anthropology Its central idea departing from the works of Frances Yates and the Gnosticism thesis of Eric Voegelin is that far from being the radical opposite of magic modern science effectively grew out of magic and its varieties like alchemy Hermetic philosophy the occult Gnosticism and Neoplatonism Showing that the desire to use science to solve various real or presumed problems of human existence has created a permanent liminal crisis it contends that the will to science is parasitic existing as it does in sheer relationality outside of and in between concrete places and communities A study of the mutual relationship between magic and science in different historical eras ranging from the Early Neolithic to recent disease prevention ideas Magic and the Will to Science will appeal to scholars and students of social and anthropological theory and the philosophy and sociology of science Personal Mobilities Aharon

Kellerman,2006-11-22 Personal Mobilities provides a systematic study of personal movement focusing on the dimensions of space individuals societies and technologies Kellerman examines a variety of personal mobilities including air transportation through several perspectives examining the human need for movement their anchoring within wider societal trends commonalities and differences among mobility technologies and international differences Although spatial mobility seems geographical by its very nature the topic has been so far treated only partially and mainly by sociologists Personal Mobilities highlights geographical as well as sociological aspects and is the first book to focus solely on personal mobilities **Values**
