in Veterinary Medicine Laura Elizabeth Selmic, Mindaugas Tamosiunas, Blaz Cugmas, 2024-10-24 Veterinary medicine focuses on the prevention, diagnosis, and treatment of medical conditions in animals. Recently, we have witnessed enormous advances in veterinary medicine fuelled mainly by the increased owner spending on pets, which more than doubled in the last decade in the USA. Thus, companion animal medicine is individualized, often resembling the medical situation in humans, which is grounded on state-of-the-art knowledge and infrastructure. A significant proportion of these recent advances are due to integrating novel technology into veterinary clinics and homes. Although the veterinary approach in farmed animals is primarily preventive and focuses on the whole herd, technical solutions are equally crucial for successful livestock management. Human medicine is based on state-of-the-art technology. Some recent advances translated into practice are mRNA technology, telemedicine, health wearables, and artificial intelligence in diagnostics, imaging, and drug discovery. Compared to humans, research focusing on technology in veterinary medicine is scarce and carried out by individuals rather than large research groups. With this special issue, we aim to promote research on various technologies in veterinary medicine. The recent technological advances improving animal health and well-being should be encouraged and disseminated. Moreover, we hope to connect various researchers with the same objectives, which could lead to potential joint ventures resulting in higher excellence and impact.

Production at the leading edge of technology Bernd-Arno Behrens, Alexander Brosius, Wolfgang Hintze, Steffen Ihlenfeldt, Jens Peter Wulfsberg, 2020-09-24 This congress proceedings provides recent research on leading edge manufacturing processes. The aim of this scientific congress is to work out diverse individual solutions of production in the border area and transferable methodological approaches. In addition, guest speakers with different backgrounds will give the congress participants food for thought, interpretations, views, and suggestions. The manufacturing industry is currently undergoing a profound structural change, which on the one hand produces innovative solutions through the use of high performance communication and information technology and on the other hand is driven by new requirements for goods, especially in the mobility and energy sector. With the social discourse on how we should live and act primarily according to guidelines of sustainability, structural change is gaining increasing dynamic. It is essential to translate politically specified sustainability goals into socially accepted and marketable technical solutions. Production research is meeting this challenge and will make important contributions and

provide innovative solutions from different perspectives Physics and Technology of High-k Materials 8 Samares Kar, 2010-10 The issue of ECS Transactions will cover comprehensively all the aspects of high k material physics and technology Diverse High Mobility Substrates High k Materials Metal Gate Electrode Materials Deposition Techniques Bulk Material Properties Flat Band Voltage Issues and Control Interfaces Gate Stack Reliability Electrical Chemical and Physical Characterization Novel Applications High k and Diverse Insulators for Photonics High k Processing Manufacturing

Management, a Bibliography for NASA Managers, 1989 *The Cutting Edge: Breakthroughs in Technology 6-Pack* Jennifer Kroll, 2012-10-01 Get readers excited to learn about the various technological innovations that have occurred throughout history and what could be possible in the future Through informational text interesting and intriguing facts in conjunction with vivid images diagrams and charts readers will learn about miraculous inventions such as holograms 3D printing virtual reality technology personalized medicine and bionic body parts Throughout this nonfiction title readers will be engaged and encouraged to imagine the next big technological innovation that could change the world This 6 Pack includes six copies of this title and a lesson plan **Production at the Leading Edge of Technology** Welf-Guntram

Drossel, Steffen Ihlenfeldt, Martin Dix, 2025-08-22 This book contains all contributions to the congress in which both detailed scientific investigations and technological innovations in the process chains of machining and forming are discussed as well as comprehensive far sighted overall views on the planning and control of production processes These approaches are supplemented by more interdisciplinary cross sectional topics such as robotics control engineering automation materials technology additive manufacturing and human centered production It is particularly striking that the main approaches presented aim to improve efficiency in production using data driven methods such as machine learning and artificial intelligence However the use of measurement results to improve simulations is also frequently addressed The book proceedings show that transformations can only succeed through the realization of both detailed technical improvements in production technologies and optimized production organization The Gilded Edge Eli Wilner, 2000 Consider the frame as a work of art itself This in depth examination of the beauty and diversity of antique American frames is comprised of diverse essays by curators scholars artists and art lovers The craft of matching frame to work is beautifully illustrated in the 150 images
