Fuzzy Systems and Data Mining IX Antonio J. Tallón-Ballesteros, Raquel

Beltrán-Barba, 2023-12-15 Fuzzy systems and data mining are indispensable aspects of the digital technology on which we now all depend. Fuzzy logic is intrinsic to applications in the electrical, chemical, and engineering industries and also in the fields of management and environmental issues. Data mining is indispensable in dealing with big data, massive data, and scalable parallel and distributed algorithms. This book presents the proceedings of FSDM 2023, the 9th International Conference on Fuzzy Systems and Data Mining, held from 10-13 November 2023 as a hybrid event with some participants attending in Chongqing, China, and others online. The conference focuses on four main areas: fuzzy theory, algorithms, and systems; fuzzy application; data mining; and the interdisciplinary field of fuzzy logic and data mining, and provides a forum for experts, researchers, academics, and representatives from industry to share the latest advances in the field of fuzzy sets and data mining. This year's topics from two special sessions on granular ball computing and the application of generative AI, as well as machine learning and neural networks, were also covered. A total of 363 submissions were received, and after careful review by the members of the international program committee, 110 papers were accepted for presentation at the conference, and publication here representing an acceptance rate of just over 30%. Covering a comprehensive range of current research and developments in fuzzy logic and data mining, the book will be of interest to all those working in the field of data science.

Crayons and iPads Debra Harwood, 2017-04-24 Crayons and iPads examines the use of digital technology in the early stages of child development and the way in which learning techniques have evolved in classrooms across the world. Harwood explores how tablets can be used to provoke, ignite, and excite children's interest in the world around them, performing as accessible learning and instructional tools, and argues that it is through this engagement with technology that new discoveries are made and learning takes place. Guiding readers through research-based insights into children's thinking, interactions, and being, Crayons and iPads offers an important starting point upon which to build play and inquiry-based learning opportunities within early learning programs and will appeal to both educators and researchers across child development, early years education, and digital literacy.

Hope Guneev Kaur, INKZOID FOUNDATION is up with another beautiful book named *Hope: The Sea Of Emotions*, which is a collection of poems and short stories from more than seventy authors around the globe, headed by Guneev Kaur, published by INKZOID FOUNDATION and recognised by INKZOID Book Of World Records. The book can be a perfect uplifter to give a better and bolder voice to your dreams. The book also sets a record for the compiler for being the youngest one to compile a book. The compiler quotes: *Hope: A Sea of Emotions*. "Something which is quite chosen. We are one. We are a family under a single dome. Striving to spread positivity. Showcasing our own creativity in our corners. Proclivity. Numerous contents. Each one being so patent. Depicting our emotions. Depicting our feelings. We stand with heads high in contentment. Beyond Aesthetics Christopher Pinney, Nicholas Thomas, 2020-05-25 The anthropology of art is currently at a crossroads Although well versed in the meaning of art in small scale tribal societies anthropologists are still wrestling with the question of how to interpret art in a complex post colonial environment Alfred Gell recently confronted this problem in his posthumous book *Art and Agency* The central thesis of his study was that art objects could be seen not as bearers of meaning or aesthetic value but as forms mediating social action At a stroke Gell provocatively dismissed many longstanding but tired questions of definition and issues of aesthetic value His book proposed a novel perspective on the roles of art in political practice and made fresh links between analyses of style tradition and society Offering a new overview of the anthropology of art this book begins where Gell left off Presenting wide ranging critiques of the limits of aesthetic interpretation the workings of objects in practice the relations between meaning and efficacy and the politics of postcolonial art its distinguished contributors both elaborate on and dissent from the controversies of Gell's important text Subjects covered include music and the internet as well as ethnographic traditions and contemporary indigenous art Geographically its case studies range from India to Oceania to North America and Europe **Hearings, Reports and Prints of the Senate Committee on Governmental Affairs**
