Technology Shocks Origins Managerial Responses And Firm Performance:

Technology Shocks Heinrich M. Arnold, 2012-12-06 Radical technological changes so called technology shocks frequently disrupt the competitive market structure New entrants appear industries need to be redefined incumbents lose their positions or vanish completely Fast moving industries like the often quoted example of the semiconductor industry have preferably been analyzed for these phenomena But do the findings hold for industries with longer development cycles like the global machine tool industry Here multivariate analysis is used to find out what management needs to focus on in order to lead companies through the technology shocks The research for this book builds on in depth interviews with 100 experts and decision makers from the machine tool industry involved in technology shocks and statistical analysis of detailed quantitative surveys collected from 58 companies In several instances the results challenge classical teaching of technology management Adrian J Slywotzky US top selling business author and one of the most distinguished intellectual leaders in business comments In *Technology Shocks* Heinrich Arnold develops a very useful model for analyzing technology shocks and for focusing on those factors that will enable a company to navigate through these shocks successfully and repeatedly Although this work is focused on technology its thinking has useful implications beyond technology shocks It provides ideas that managers can use to protect their firms when they are faced with any type of discontinuity technology based or not *ICIE*

perspective interconnection versus separation acceleration versus linearity and discontinuity versus continuity Anticipating the future requires more than the traditional predictive models forecasting based on the forward projection of past experiences Advanced methods use anticipation logic foresight and build probable scenarios taking into account weak signals emerging trends coexisting presents and potential paths of evolution Corporate foresight is fundamental to interpret and lead change The two cornerstones of foresight are organization and management As concerns organization the authors advocate the separation of research oriented to the market of tomorrow from development oriented to the market of today the establishment of a foresight unit and the concentration of research activities mainly on the acquisition and recombination of external know how As regards management after an overview of state of the art literature on forecasting methods the authors propose the implementation of a future coverage methodology which enables companies to measure and verify the consistency between trends strategic vision and offered products These organizational and managing tools are then tested in a case study the Italian company Eurotech SpA a leader in the ICT sector
