Technology The God That Failed:

Technology: the God that Failed Dorothy Mallett Slusser, Gerald H. Slusser, 1971 **Democracy - the God That Failed** Hans-Hermann Hoppe, 2001 The core of this book is a systematic treatment of the historic transformation of the West from monarchy to democracy Revisionist in nature it reaches the conclusion that monarchy is a lesser evil than democracy but outlines deficiencies in both Its methodology is axiomatic deductive allowing the writer to derive economic and sociological theorems and then apply them to interpret historical events A compelling chapter on time preference describes the progress of civilization as lowering time preferences as capital structure is built and explains how the interaction between people can lower time all around with interesting parallels to the Ricardian Law of Association By focusing on this transformation the author is able to interpret many historical phenomena such as rising levels of crime degeneration of standards of conduct and morality and the growth of the mega state In underscoring the deficiencies of both monarchy and democracy the author demonstrates how these systems are both inferior to a natural order based on private property Hoppe deconstructs the classical liberal belief in the possibility of limited government and calls for an alignment of conservatism and libertarianism as natural allies with common goals He defends the proper role of the production of defense as undertaken by insurance companies on a free market and describes the emergence of private law among competing insurers Having established a natural order as superior on utilitarian grounds the author goes on to assess the prospects for achieving a natural order Informed by his analysis of the deficiencies of social democracy and armed with the social theory of legitimation he foresees secession as the likely future of the US and Europe resulting in a multitude of region and city states This book complements the author's previous work defending the ethics of private property and natural order Democracy The God that Failed will be of interest to scholars and students of history political economy and political philosophy **The Other God that Failed** Jerry Z. Muller, 2021-04-13 Why did some of the best and brightest of Weimar intellectuals advocate totalitarian solutions to the problems of liberal democratic capitalist society How did their radical conservatism contribute to the rise of National Socialism What roles did they play in the Third Reich How did their experience of totalitarianism lead them to recast their social and political thought This biography of Hans Freyer a prominent German sociologist and political ideologist is a case study of intellectuals and a god that failed not on the political left but on the right where its significance has been overlooked The author explores the interaction of political ideology and academic social science in democratic and totalitarian regimes the transformation of German conservatism by the experience of National Socialism and the ways in which tension between former collaborators and former opponents of National Socialism continued to mold West German intellectual life in the postwar decades **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1973 **Demon Possession** John Warwick Montgomery, 2018-01-26 In January of 1975 the Christian Medical Association gathered to deliver papers on the subject of demon possession The essayists are Christians affiliated with a

variety of academic institutions The essays themselves explore the phenomena of the demonic in the Bible in literature on the mission field in anthropology legal history and psychiatric treatment All of the participants accept the reality of the demonic but they are circumspect in their scholarship If you are looking for a more substantial treatment than what you might find in popular booklets on the subject or on the fiction aisle this is it never before or since this symposium has there been a focused study of this magnitude on demon possession

The Structural Crisis of Capital Istvan Meszaros, 2010-03-01 In this collection of trenchant essays and interviews Istvan Meszaros the world's preeminent Marxist philosopher and winner of the 2008 Libertador Award for Critical Thought the Bolivar Prize lays bare the exploitative structure of modern capitalism He argues with great power that the world's economies are on a social and ecological precipice and that unless we take decisive action to radically transform our societies we will find ourselves thrust headfirst into barbarism and environmental catastrophe Meszaros however is no pessimist He believes that the multiple crises of world capitalism will encourage the working class to demand center stage in the construction of a new system of production and distribution designed to meet human needs rather than serve the relentless pursuit of profit a struggle which is already underway in places such as Venezuela As John Bellamy Foster says in the foreword to this indispensable book Today the structural crisis of capital provides the historical setting for a new revolutionary movement for social emancipation in which developments normally taking centuries would flit by like phantoms in decades or even years But the force for such necessary vital change remains with the people themselves and rests on humanity's willingness to constitute itself as both subject and object of history through the collective struggle to create a just and sustainable world This Meszaros insists constitutes the unprecedented challenge and burden of our historical time

Confronting Mass Democracy and Industrial Technology John P. McCormick, 2002 With a groundbreaking interdisciplinary approach to German political and social theory Confronting Mass Democracy and Industrial Technology provides fresh insight into the thought of many of the most influential intellectual figures of the twentieth century Its essays detail the manner in which a wide range of German intellectuals grappled with the ramifications and implications of democracy technology knowledge and control from the late Kaiserreich to the Weimar Republic from the Third Reich and the Federal Republic through recently unified Germany Scholars representing the fields of political science philosophy history law literature and cultural studies devote essays to the work of Nietzsche Weber Heidegger Luk s Schmitt Marcuse Adorno and Habermas They also discuss the writings of such figures as Brecht and Freud who are not primarily thought of as political theorists and explore the thought of Helmut Plessner and reformist theorists from East Germany who have been little studied in the English language In the process of debating the nature and responsibilities of the modern state in an era of mass politics unparalleled military technology capacity for surveillance and global media presence the contributors question whether technology is best

understood as an instrument of human design and collective control or as an autonomous entity that not only has a will and life of its own but one that forms the very fabric of modern humanity Contributors Seyla Benhabib Richard J Bernstein Peter C Caldwell Richard Dienst David Dyzenhaus Andrew Feenberg Nancy S Love John P McCormick Jan Werner Müller Gia Pascarelli William E Scheuerman Steven B Smith Tracy B Strong Richard Wolin *The Necessity of Social Control* István Mészáros, 2015 As John Bellamy Foster writes in his foreword to the present book István Mészáros is one of the greatest philosophers that the historical materialist tradition has yet produced His work stands practically alone today in the depth of its analysis of Marx's theory of alienation the structural crisis of capital the demise of Soviet style post revolutionary societies and the necessary conditions of the transition to socialism His dialectical inquiry into social structure and forms of consciousness a systematic critique of the prevailing forms of thought is unequalled in our time Mészáros is the author of magisterial works like *Beyond Capital* and *Social Structures of Forms of Consciousness* but his work can seem daunting to those unacquainted with his thought Here for the first time is a concise and accessible overview of Mészáros's ideas designed by the author himself and covering the broad scope of his work from the shortcomings of bourgeois economics to the degeneration of the capital system to the transition to socialism *Books and Pamphlets, Including Serials and Contributions to Periodicals* Library of Congress. Copyright Office, 1949 *Passage to a Just Society* Rev. Dr. Reza Rezadadeh, 2003-11-12 For more information about the author and his publications visit www.democracywhere.com This study demonstrates that because their opposing nature democracy and capitalism or socialism cannot coexist To have a democratic society we have to replace capitalism or socialism with a democratic free market economy and take government out of regulating peoples business and daily life The author attempts to present such a democratic concept its societal structure and function and how under such a system people understand the purpose of life work less hours yet have a prosperous leisurely and satisfying life The book is actually the story of some parts from the authors life written in an autobiographical form showing hardships sufferings failures incredible adventures romance and love he encountered in developing his theory and how persistence and determination despite repeated failures helped him to succeed in developing his theory and at the same time transformed him to a better human being *Impact of Technology on Society*, 1973

Dynamics of Spiritual Life Richard F. Lovelace, 2020-01-28 In this expanded edition of a classic work of spiritual theology historian Richard Lovelace presents a history of spiritual renewals in light of biblical models With scholarly and pastoral insight he offers a powerful vision of renewal that can unify various models across traditions combining individual and corporate spirituality social activism and evangelism **Global Overshoot** Doug Cocks, 2013-03-13 *Global Overshoot* is a multidisciplinary analysis including history and pre history from an ecological and evolutionary perspective of the contemporary world system This book compares and critiques attitudes held by people with different world views to the hypothetical prospect of large widespread falls in quality of life It also draws insights from these two analyses to develop and

suggest a philosophy of Ecohumanism to people of good will who want to think constructively about the world's converging problems i.e. think altruistically and think like an evolving ecosystem American Environmentalism J. Michael Martinez, 2013-06-20 Protecting the natural environment and promoting sustainability have become important objectives but achieving such goals presents myriad challenges for even the most committed environmentalist American Environmentalism Philosophy History and Public Policy examines whether competing interests can be reconciled while developing consistent coherent effective public policy to regulate uses and protection of the natural environment without destroying the national economy It then reviews a range of possible solutions The book delves into key normative concepts that undergird American perspectives on nature by providing an overview of philosophical concepts found in the western intellectual tradition the presuppositions inherent in neoclassical economics and anthropocentric human centered and biocentric earth centered positions on sustainability It traces the evolution of attitudes about nature from the time of the Ancient Greeks through Europeans in the Middle Ages and the Renaissance the Enlightenment and the American Founders the nineteenth and twentieth centuries and up to the present Building on this foundation the author examines the political landscape as non governmental organizations NGOs industry leaders and government officials struggle to balance industrial development with environmental concerns Outrageous claims silly misrepresentations bogus arguments absurd contentions and overblown prophecies of impending calamities are bandied about by many parties on all sides of the debate industry spokespeople elected representatives unelected regulators concerned citizens and environmental NGOs alike In lieu of descending into this morass the author circumvents the silliness to explore the crucial issues through a more focused disciplined approach Rather than engage in acrimonious debate over minutiae as so often occurs in the context of green claims he recasts the issue in a way that provides a cohesive look at all sides This effort may be quixotic but how else to cut the Gordian knot *Life and Times of Cultural Studies* Richard E. Lee, 2004-01-07 A comprehensive social history of the cultural studies movement with a strong political focus **Caribbean Quarterly**, 1970 **Tools, Totems, and Totalities** Allen Batteau, Christine Z. Miller, 2025-02-11 This book provides a critical perspective on technology answering the questions of why technologies often disappoint It takes a sociotechnical and historical perspective on technology as developed by an engineer anthropologist and a design anthropologist to answer questions not only about why modern societies have great expectations of technology but also of why these technologies often fail to meet expectations Modern societies often search for technological solutions technofixes to what are institutional problems which include border crossings or urban mobility or improvements in productivity or improved communication It is disappointing when technofixes whether border walls or driverless cars or social media fail to live up to their promises of greater personal autonomy such as afforded by driverless cars or improved social harmony through social media Examining technology from the perspectives of instrumentality tools identity totems and world defining systems totalities develops a comprehensive perspective that is at once historically informed and cross

culturally accurate Although instrumentality is obvious and is at the core of any understanding of technology identity is less so yet many modern tribes create their identity in terms of technological objects and systems whether transport systems cars and airplanes or social media or weapons guns Further modern technologies span the globe so that they exert imperative coordination over distant populations the use of cell phones around the world is testimony to this fact Such a critical perspective on technology can be useful in policy discussions of numerous issues affecting contemporary institutions

The Diversity, Complexity, and Evolution of High Tech Capitalism Sten A. Thore, 2012-12-06 In his book Jurassic Park and in the movie based on the book Michael Crichton describes a crazed professor who through techniques of genetic engineering manages to recreate the dinosaurs and giant ferns of 65 million years past Once the giant Tyrannosaurus Rex is brought to life a powerful dynamics sets in evolution The prehistoric world embarks on a collision course with man Researching his book Crichton had been reading up on paleontology and on the mathematical theory of evolution catastrophes and chaos Crichton explains some of the twists of nonlinear mathematics that are rewriting not only thermodynamics physics and chemistry that all grapple with evolving and turbulent processes but also paleontology genetics medicine and even anthropology Collapse and chaos is not limited to prehistoric animal kingdoms and ancient civilizations The collapse of the Soviet Union and the political and economic chaos in its aftermath demonstrate that modern civilizations are just as vulnerable This book aims at reexamining some main portions of the discipline of economics from the point of view of economic change and creativity There are two aspects to this perspective First diversity and complexity The range of different kinds of high technology products available to consumers and producers increases rapidly Each product is the result of a long and complex production hierarchy As these hierarchies grow they deliver ever more diversified and complex high tech goods Other hierarchies fall by the wayside
