Fundamentals of Natural Fibres and Textiles Md. Ibrahim H. Mondal,2021-03-20 The textile industry is focused in its search for alternative green fibres with the aim of providing high quality products which are fully recyclable and biodegradable Natural textile materials from renewable sources play an increasingly important role in the industry due to their unique properties and functionality over synthetic fibres as well as their sustainability Fundamentals of Natural Fibres and Textiles covers all the fundamental and basic information about natural fibres and textiles Many different fibres are covered from their origin through processing properties and applications The latest methods for characterisation and testing of natural fibres are all addressed with reference to cutting edge industry trends This uniquely comprehensive approach to the topic provides the ideal entry point to natural fibres for textile and clothing scientists engineers designers researchers students and manufacturers of such products Explains the characteristics of natural fibres to show how they compare to synthetic fibres for a range of purposes Provides an overview of the environmental impact of the processing of fibres and how this creates industrial waste Covers a wide range of natural fibres in detail from traditional silk and wool to electrospun biopolymers Provides the latest updates on technologies for designing natural fibres and applying them to the development of new products **Roadmap to Sustainable Textiles and Clothing** Subramanian Senthilkannan Muthu,2014-06-02 This book covers the elements involved in achieving sustainability in the textiles and clothing sector The chapters covered in different volumes of this series title aim to cover all the distinctive areas earmarked for achieving sustainable development in the textile and clothing industry This first volume is dedicated to the initial phases of life cycle i e raw materials and manufacturing phases of textile products This book aims to cover the sustainable raw materials technologies and processing methods to achieve sustainable textile products There are plenty of raw materials available today to cater the needs of sustainable textiles and apparels including organic materials recycled and biodegradable raw materials for textile applications Similarly many innovative methods to process textile materials to achieve sustainability in the supply chain along

with various processing technologies to manufacture textile products sustainably This first volume covers the titles of these areas in a comprehensive way **Sewing Success?** Gladys Lopez-Acevedo, Raymond Robertson, 2012-03-14 The end of the MFA was followed by rising apparel exports falling prices and a reallocation of production and employment between countries There were also significant changes within countries The first main finding of this report is that export and employment patterns after the MFA ATC did not necessarily match predictions While many predicted that production would shift to low wage countries this book shows that only 13 percent of variation in export changes post MFA can be explained by the differences in wage levels Second changes in exports are usually but not always good indicators of what happens to wages and employment within countries This is especially important for policy because it shows that simply using exports as a metric of success in terms of helping the poor is not sufficient Third the Book identifies the specific ways that changes in the global apparel market affected earnings The Book shows that wage premiums change in predictable ways rising in most cases in countries that were proactive in adapting to the MFA phase out and expanded their market shares and falling in countries that failed to respond in a timely fashion to the changing environment The Book shows that promoting upgrading defined as shifting to higher value goods shifting up the value chain or modernizing production techniques seems to be necessary for sustainable competitiveness in the apparel sector but does not necessarily help the poor Policies that support upgrading need to be complemented with targeted workforce development to make sure that the most vulnerable workers are not left behind Having a vision for the evolution of the apparel sector that incorporates developing worker skills seems crucial Otherwise less skilled workers could miss out on opportunities to gain valuable work experience in manufacturing
