

A Basic Model of Technology Transfer

Technology Transfer To Developing Countries

Kamal Saggi, Bernard M. Hoekman

Technology Transfer To Developing Countries:

International Technology Transfer to Developing Countries Kamal Saggi, 2004 Bridging the technology gap is an issue faced by most countries but in developing countries the issue is doubly critical not only do they lag further behind relative to other countries but they face more stringent resource constraints Part one of this report identifies the role played by existing policy in trade foreign direct investment and intellectual property rights in facilitating International Technology Transfer ITT Pertinent analysis of the major implications of the report is given The WTO Working Group on Trade and Technology Transfer was established with the aim of encouraging technology transfer to developing countries Part Two of the report outlines the Group's Findings for increasing flows of technology This title provides a thorough overview of the economics of ITT relevant to developing countries and will be invaluable as a reference tool for policy makers trade officials and trade negotiators

Technology Transfer in the Developing Countries Manas Chatterji, 1990-02-19 The objective of this book is to present the problems and possibilities of transferring technology from the developed countries to the developing countries It presents the conceptual issues legal ramifications empirical testing of mathematical models and case studies of different industries

Technology Transfer to Developing Countries Taimi Sitari, 1988

Information Resources and Technology Transfer Management in Developing Countries Richard Ouma-Onyang'o, 1997 This book attempts to put information management in the context of technology transfer industrialization and national development The author shows how critical the efficient use of information resources can be in terms of productivity He also examines the costs of poor information management in undermining negotiation the preparation of contingencies and the ability to let go of dead projects To this end case studies of two technology transfer projects in Kenya the National Power Alcohol and National Car Programme are considered over a period of twenty years

Making The Link David Kaimowitz, 2019-04-11 This book is about International Service for National Agricultural Research's ISNAR study to identify key factors that influenced the effectiveness and efficiency of links between research and technology transfer It recommends ways to improve these links and reflects the progress made till date

Technology Transfer to Developing Countries Thomas J. Allen, 2015-08-05 Excerpt from Technology Transfer to Developing Countries The International Technological Gatekeeper A questionnaire was developed and administered to the research personnel of An Foras Taluntais the Irish agricultural research and development organization to study the operation

of communications channels for the international transfer of technological information. The techniques employed are consistent with those used in previous studies of the purely domestic flow of technological information into American research and development laboratories. Results of the study show that the international transfer like domestic transfer takes place in a two step process operating through certain intermediary agents called technological gatekeepers. These technological gatekeepers must be well integrated into two information networks: an external network of information sources and an internal network of users to whom the information can be delivered. Possible strategies for gatekeeper development are discussed.

Technology and Developing Economies Zeinab Karake-Shalhoub, 1990-05-21. This is the first empirical study to compare and contrast the effects of technology transfer to developing countries from the West and from Eastern European countries. The author's primary purpose is to compare the effects of the different technologies offered by the two groups: the capital intensive technologies of the West and the labor intensive technologies of the Eastern bloc on the economic growth of developing countries as measured by growth in output. Using an analytical method based on the production input structure, the author is able to quantify the impact on economic growth of technology transfer from different sources and with different characteristics. Karake also evaluates the experience of developing countries in importing technologies and identifies the direction, pattern, and content of those technologies. Scholars in international and economic development will find Karake's work an important contribution to the documented information concerning the trade in technology and its relation to economic growth and technological interdependence. Following an introductory chapter, Karake offers a general discussion of the relationships among development, growth, and technology. She then introduces the econometric time series models and describes the basic study structure. The next section examines policies, mechanisms, and trends in technology transfer in both the West and the East, focusing on such issues as the factors and policies which affect technology transfer to the Middle East and patterns of technological exports. A chapter devoted to model formulation, empirical analysis, estimation, and results specifies the empirical models used in the study and presents statistical analysis of the appropriate data. Finally, Karake summarizes the major research findings, suggests avenues for further research, and assesses the future of technology transfer.

activity Four appendices containing important supplemental information and a bibliography complete the study

Technology Transfer Cohen,2004 Identifying the major factors responsible for effective transfer of information human expertise from an advanced country or a multinational corporation to the developing world this text is aimed at students academics in strategic management planning technology *Transfer of Technology to Developing Countries* Kamal Saggi,Bernard M. Hoekman,2004 Hoekman Maskus and Saggi analyze national and international policy options to encourage the international transfer of technology distinguishing between four major channels of such transfer trade in products trade in knowledge foreign direct investment and intra national and international movement of people They develop a typology of country types and appropriate policy rules of thumb as a guide to both national policymakers and rule making in the World Trade Organization as policies should differentiate between countries The authors also develop some rules of thumb for policy intervention These include Liberal trade policies for all types of countries Temporary encouragement of foreign direct investment inflows for low income countries Licensing for technical transformation and adaptive investments by local firms to apply technologies Policy options for source economies to encourage international transfer of technology to poor countries including fiscal incentives improvement of flows of public domain technologies with appropriate subsidies and price differentiation for exports of intellectual property products This paper a product of the Trade Team Development Research Group is part of a larger effort in the group to analyze issues related to the design of special and differential treatment of developing countries in the WTO Technology Transfer to Developing Countries by Small and Medium-sized Enterprises Jaime Campos,International Development Research Centre (Canada),1993 **International Technology Transfer by Small and Medium-Sized Enterprises** Peter J. Buckley,Jaime Campos,Eduardo White,2016-07-27 The book is the culmination of a research effort which spanned all continents and involved a large number of research teams from both the industrialised and developing countries The book addresses a number of key issues related to technology transfer by small and medium sized enterprises most especially whether such companies are more effective transferors than larger transnational corporations A key aspect of the research was the fact that firms in source and host countries were matched to assure a degree of consistency in the firm coverage and their responses Technology Transfer to Developing Countries Analytical Study No. 1 The International Transfer of Industrial Technology Past and Present Organisation for Economic Co-operation and Development. Directorate for Science, Technology, and Industry. Ad Hoc Group on the Transfer of Technology to Developing Countries,1979 **Technology Transfer to Developing Countries** Thomas John Allen,J. M. Piepmeyer,S. Cooney,Foras Talúntais,1970 **Strategic Planning in Technology Transfer to Less Developed Countries** Christian Madu,1992-01-27 Despite an avalanche of literature over the last 30 years there has been relatively little written on the role played by strategic planning in the transfer of technology particularly from developed to less developed countries Technology transfer which involves the acquisition of inventive activity by secondary users is conceded vital to socio

economic growth but usually it is looked at internationally from a micro perspective Unlike other books Madu's volume looks at technology transfer holistically It examines the advantages of technology transfer and its limitations by viewing recipient nations as systems in which social economic behavioral and political influences converge to help shape technological decisions Only when a systems perspective like this is adopted and technology seen as a strategic variable can technology transfer be understood and successfully implemented says Madu Madu thus identifies the failures of technology transfer as the result of malfunctions in three components of the system technology structure and behavior He analyzes these malfunctions offers ways to repair them and considers technology from the viewpoints of both transferrer and receiver whose missions goals and objectives are often not only disparate but sometimes in conflict He then offers what he calls prescriptive frameworks and guidelines to help implement transfer and to see it as a variable that must be integrated into national development planning Throughout Madu makes it clear that the objective of technology transfer is the maximizing of social welfare Using this overarching premise he is able to evaluate both the benefits and the social costs associated with technology transfer and to develop his prescriptive integrative models Intended for specialists in international finance and development and international business management Madu's book will be of special value to teachers of graduate courses in socio economic development public policy and economics and to policymakers throughout government
