The Technology Trap Leo J. Moser, 1979 *The Technology Trap* Leo J. Moser, 1979 *Science, technology, and foreign affairs* Diane B. Bendahmane, David William McClintock, 1985 **Science, Technology, and Foreign Affairs: Climate, scientific dialogue and health** Diane B. Bendahmane, David William McClintock, 1985 **Energy Abstracts for Policy Analysis**, 1981 **The Best of Times** Wyn Wachhorst, 2016-01-06 Old time radio the folk revival the golden age of science fiction steam railroads baseball the Western and other genres color our images of the 1950s But contrary to the countercultural myth that America during this period was a sterile soulless society culturally and intellectually empty it was an introspective era of innovation and creativity the seedtime of the sixties the harbinger of which was the urban folk revival The Best of Times presents a collection of essays each followed by a related memoir focusing on postwar popular culture exploring topics that mark the era but are also nostalgic in themselves the comforting continuity of long running radio shows train whistles that brought the sweet sorrow of distance to small town nights lazy summers of baseball endless stretches of unknown lands to the West that once compelled the imagination the heroes and vagabonds of folksong who roamed a simpler world and dreams of alien civilizations on neighboring planets deepened by the dawning reality of spaceflight These pieces balance personal cultural and mythic nostalgia recalling author Wyn Wachhorst's youth the postwar era and its dreams of a fabled West or Norman Rockwell's small town America Blending history memoir imagery and analysis this collection of essays offers poetic reflections on the nature of nostalgia and postwar America *The New Liberal Learning* Robert P. Lisensky, Allan O. Pfnister, Sharon D. Sweet, 1985 **Religion and Technology** Jay Newman, 1997-04-30 Religion and technology have always been at the heart of any civilization says Newman and the changing relations between them have and will continue to have a powerful influence on social and personal development Newman begins with a look at religious criticism of technology most specifically the view that technology undermines religious world views religious practices and spirituality in general But what the religious antitechnologist might be misunderstanding he argues are the essence of technology its relation to progress and its significance as a religious endeavor Indeed religion may be a form of technology or both may be the same as culture itself **American Book Publishing Record**, 1979 *Science, Technology and Society*, 1983 **Technology and Civilization** Mary A. Vance, 1983 **Communication & the Culture of Technology** Martin J. Medhurst, Alberto González, Tarla Rai Peterson, 1990 Fourteen essays examine the interrelationships that exist among communication technology and the creation of cultural consciousness The essays were originally presented at the 1989 Conference on title hosted by Texas A&M University Annotation copyrighted by Book News Inc Portland OR **The Unraveling of the West** Donald N. Wood, 2003-11-30 Table of contents *The Dream Of Spaceflight* Wyn Wachhorst, 2001-05-17 One of few truly gifted essayists who have turned their talents to science Wyn Wachhorst here fashions a luminous meditation on the meaning of space exploration from a montage of images and reflections on humanity's

dream of spaceflight In a survey of major figures from Johannes Kepler to Wernher von Braun he sees in the rise of spaceflight a metaphor of modern history as a recurrent story of transformation and rebirth Other essays offer new perspectives on the nature of wonder recall the romantic vision of the decades prior to Sputnik nostalgia for a bygone future and look at the larger meaning of the moon landing seeing in spaceflight not only a spiritual quest in the broadest sense of the word but a cure for the withered capacity for wonder that afflicts the postmodern mind

Post-Intellectualism and the Decline of Democracy Donald N. Wood, 1996-08-20 Our society's institutional infrastructures our democratic political system economic structures legal practices and educational establishment were all created as intellectual outgrowths of the Enlightenment All our cultural institutions are based on the intellectual idea that an enlightened citizenry could govern its affairs with reason and responsibility In the late 20th century however we are witnessing the disintegration of much of our cultural heritage Wood argues that this is due to our evolution into a Upost intellectual society R a society characterized by a loss of critical thinking the substitution of information for knowledge mediated reality increasing illiteracy loss of privacy specialization psychological isolation hyper urbanization moral anarchy and political debilitation These post intellectual realities are all triggered by three underlying determinants the failure of linear growth and expansion to sustain our economic system the runaway information overload and technological determinism Wood presents a new and innovative social theory challenging readers to analyze all our post intellectual cultural malaise in terms of these three fundamental determinants
