Technology Place And Architecture The Jerusalem Seminar:

Technology, Place & Architecture: the Jerusalem Seminar in Architecture Kenneth Frampton, Lynne Reed Rosman, Arthur Spector, 1998 Technology, Place & Architecture ,1996 *Technology, Place & Architecture* ,1996
The Jerusalem Seminar in Architecture ,1996 Creating Place in Early Modern European Architecture Elizabeth Merrill, 2025-10-01 The importance of place as a unique spatial identity has been recognized since antiquity Ancient references to the genius loci or spirit of place evoked not only the location of a distinct atmosphere or environment but also the protection of this location and implicitly its making and construction This volume examines the concept of place as it relates to architectural production and building knowledge in early modern Europe 1400 1800 The places explored in the book s ten essays take various forms from an individual dwelling to a cohesive urban development to an extensive political territory Within the scope of each study the authors draw on primary source documents and original research to demonstrate the distinctive features of a given architectural place and how these are related to a geographic location social circumstances and the contributions of individual practitioners The essays underscore the distinct techniques practices and organizational structures by which physical places were made in the early modern period An inquiry on place making and architectural production in early modern Europe 1400 1750 Interdisciplinary methodology and critical approaches Thematic study that draws together subjects from throughout early modern Europe *Architecture and the Public World* Kenneth Frampton, 2024-01-25 This book brings together Kenneth Frampton s essays from the 1960s to today which epitomize his reflections on the historical theoretical entanglements of architecture with place the public realm cultural identity urban landscape and environment and the political question of the predicament of architecture in the new Millennium The essays explore Frampton s contention that architecture s imperative is to assume a significant responsibility for the edification and stewardship of the Arendtian public world One of the most theoretically sophisticated and politically committed architectural thinkers Frampton s work breaks emphatically with the limits and norms of much contemporary practice and restores a sense of richness and social consequence of architecture s unfinished project while offering abiding lessons not only for architecture but for social cultural and design criticism alike Modern Architecture: A Critical History (Fifth) (World of Art) Kenneth Frampton, 2020-09-08 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton Kenneth Frampton s highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980 Starting with the cultural developments since 1750 that drove the modern movement moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects this book is the definitive history of modern architecture For this extensively revised and updated fifth edition of *Modern Architecture* Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably

and create structures that will withstand changing climates This new edition features completely redesigned interiors and an updated and expanded bibliography making this volume more indispensable than ever

Studies in Architecture and Culture, 2007 *Architecture*, 1999 *Resisting Postmodern Architecture* Stylianos Giamarellos, 2022-01-10 Since its first appearance in 1981 critical regionalism has enjoyed a celebrated worldwide reception The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation Today its main principles such as acknowledging the climate history materials culture and topography of a specific place are integrated in architects education across the globe But at the same time the richer cross cultural history of critical regionalism has been reduced to schematic juxtapositions of the global with the local Retrieving both the globalising branches and the overlooked cross cultural roots of critical regionalism *Resisting Postmodern Architecture* resituates critical regionalism within the wider framework of debates around postmodern architecture the diverse contexts from which it emerged and the cultural media complex that conditioned its reception In so doing it explores the intersection of three areas of growing historical and theoretical interest postmodernism critical regionalism and globalisation Based on more than 50 interviews and previously unpublished archival material from six countries the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice Stylianos Giamarellos challenges long held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory history and historiography

Building Theories Franca Trubiano, 2022-11-25 *Building Theories* speaks to the value of words in architecture It addresses the author's fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this *Building Theories* argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de Mzi res Boull e Laugier Rondelet Semper Viollet le Duc Hbsch Btticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas *Building Theories* considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of techn with a dual commitment to fabrica e ratio with a productive return to l art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect's composite mind Students practitioners and educators will identify in *Building Theories* ways of thinking that strive

for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material transformations have always been at the origins of built form The Urban Vernacular in Southeast Asia Nor Zalina Harun, Shireen Jahn Kassim, 2025-05-16 This book constructs a number of discourses dialectics and analyses across the disciplines of urban form architecture and urban experience thus incorporating both conservation and design issues It bridges the gap between practice and theory by reconstructing the role of the village or vernacular in the discourses and trends of the twenty first century post Covid19 environment Bringing together for the first time the confluences of theory and practice in the urban vernacular and the urban village the contributors use vernacular concepts and settings as a common framework serving as cultural bridges connecting traditional forms ecologies and habitats to new global ideas industrial economies and access to developing urban sustainability design planning and services in Asia s rising megacities The book begins with concerns of urban layout and morphology aiming to establish discourse shared principles and terminology around conventional ideas of the village or traditional settlements apparently organic and disordered nature It then moves into architectural dimensions capturing formal cases of how the vernacular or traditional indigenous local concepts have inspired new ideas in award winning architecture and hence the importance of re examining the vernacular in light of the ongoing need to produce a more sustainable and place conscious fit in modern architecture and urban planning The book will be of interest to researchers in the fields of architecture urban planning and design urban geography design studies landscape architecture history of architecture urbanism and Asian Studies in particular those concerning Southeast Asia

Social Information Technology: Connecting Society and Cultural Issues Kidd, Terry T., Chen, Irene, 2008-04-30 This book provides a source for definitions antecedents and consequences of social informatics and the cultural aspect of technology It addresses cultural societal issues in social informatics technology and society the Digital Divide government and technology law information security and privacy cyber ethics technology ethics and the future of social informatics and technology Provided by publisher **The Territories of Identity** Soumyen Bandyopadhyay, Guillermo Garma Montiel, 2013-11-20 The expedited globalised process of exchange and new forms of cultural production have transformed old established notions of identity calling into question their conceptual foundations This book explores the spatial and representational dimension of this phenomenon by addressing how the reshaping of the key themes of place architecture and memory are altering the nature as well as our understanding of identity Cutting across boundaries the book drives discussion of identity beyond the well worn concern for its loss within a globalised context and importantly provides links between identity place memory and representation in architecture Examining a range of case studies from Australia Germany India Japan Mexico Poland Puerto Rico Turkey and Singapore as well as with contributions cutting across geographical and temporal boundaries this volume addresses such issues as architecture technology place and memory critical issues in the
