Volumes contain technical articles ranging widely in subject time and region as well as general papers on the history of technology In addition to dealing with the history of technical discovery and change History of Technology also explores the relations of technology to other aspects of life social cultural and economic and shows how technological development has shaped and been shaped by the society in which it occurred Shaping Concepts of Technology Marc J de Vries, Arley Tamir, 2012-12-06 As our modern society is so obviously influenced by technology there is a growing awareness of its importance for education The interest for including technology as a part of general education curricula is increasing In many countries technology is an element in the curriculum either as a topic a project part of a Science Technology Society STS programme part of science education or as a separate subject In order to clarify what technology is there is a need for international discussions in which philosophers engineers scientists and educationalists are involved One of the few conferences with such a broad representation was the second Jerusalem International Science and Technology Education Conference JISTEC that was held in Jerusalem January 8 11 1996 a conference that can truly be seen as a milestone in the international history of technology education More than 1 000 technology educators from more than 80 countries of the world and ministers of education from 28 countries came together to discuss current issues in technology education during JISTEC To cite from Dr Michael Dyrenfurth's personal overview of the conference in the Journal of Industrial Teacher Education vol 33 no 2 Winter 1996 pp 83 85 Simply put this conference represented the most stellar international collection of technology education advocates the world has ever seen in one place Or in the words of Dr *New Directions in Technology for Writing Instruction* Gonca Yangın-Ekşi, Sedat Akayoglu, Leonora Anyango, 2023-01-01 This book responds to the changes and needs of English Language Learning by offering insight into online writing pedagogical platforms and atmospheres Language learning enriched with technology web tools and applications have become a necessary ingredient in language education internationally This volume provides an in depth understanding of writing practices that are responsive to the challenges for teaching and learning writing in local and global contexts of education It also provides succinct knowledge at the intersection of technology with teaching learning and research The chapters herein creatively take advantage of the affordances of digital platforms and further critiques their limitations The book also delineates knowledge on concepts theories and innovative approaches to digital writing in the field of teaching and learning English The chapters focus on reviews and provide guidance on the practical use of Web 2.0 and multimedia tools as well as presenting research on technology integration in writing classes **Digital Storytelling with PowerPoint** Mark Standley, 2003 **Reframing Technology** Kent Hufford, 2024-07-22 For over a hundred years technological change has been framed using a simple narrative technology drives history Reframing Technology challenges this idea of technological determinism through metahistorical and literary analyses that locate the birth of contingent frameworks in the historiography of technology in and around the 1930s The book also traces how the formal discipline of the History of Technology was remarkably preconfigured

by four North American authors who were not professional historians Thorstein Veblen Stuart Chase Lewis Mumford and Marshall McLuhan They are considered as a continuum and are put in dialogue despite their training in different disciplines Their work is then linked up with the emergence of formal and institutional inquiry into narratives of technology at the end of the twentieth century The ideas in the book are applied to current discussions about the future of technology and artificial intelligence The book's main argument is that as the authors listed above suggest we need to think beyond the machine and reframe technology as a cultural practice rather than thinking of it as an object or a tool Science Fiction and Computing David L. Ferro, Eric G. Swedin, 2011-09-29 The prevalence of science fiction readership among those who create and program computers is so well known that it has become a cliché but the phenomenon has remained largely unexplored by scholars What role has science fiction played in the actual development of computers and computing And likewise how has computing including the related fields of robotics and artificial intelligence affected the course of science fiction The 18 essays in this critical work explore the interrelationship of these domains over the span of more than half a century *Digital Storytelling with iMovie* Mark Standley, 2004 **21st Century Anthropology: A Reference Handbook** H. James Birx, 2010-06-10 Highlighting the most important topics issues questions and debates these two volumes offer full coverage of major subthemes and subfields within the discipline of anthropology **Education Technology in the New Normal: Now and Beyond** Paulina Pannen, Ojat Darajat, Moch. Abduh, 2023-06-27 The proceedings of the International Symposium on Open Distance and E Learning ISODEL 2021 share ideas either research results or literature reviews on distance education media and education in the digital era Some recent issues consist of innovative education in the digital era new media Industry 4.0 Digital Education Transformation Character Building Vocational Education 4.0 and Preserving Future Children Characters and Culture It is expected that the proceedings will provide new insights to the knowledge and practice of education and education technology research Therefore such parties involved in education research such as academics practitioners business leaders and others will benefit from the contents of the proceedings **Fifty Years of Medieval Technology and Social Change** Steven A. Walton, 2019-08-22 This volume brings together a series of papers at Kalamazoo as well as some contributed papers inspired by the fiftieth anniversary of the publication of Lynn White Jr's *Medieval Technology and Social Change* 1962 a slim study which catalyzed the study of technology in the Middle Ages in the English speaking world While the initial reviews and decades long fortune of the volume have been varied it is still in print and remains a touchstone of an idea and a time The contributors to the volume therefore both investigate the book itself and its fate and look at new research furthering and inspired by White's work The book opens with an introduction surveying White's career with a bibliography of his work as well as some opening thoughts on the study of medieval technology in the last fifty years Three papers then deal explicitly with the reception and longevity of his work and its impact on medieval studies more generally Then five papers look at new cast studies areas where White's work and approach has had a particular impact namely
