The Parental Experience in Midlife Carol D. Ryff,Marsha Mailick Seltzer,1996 Most adults experience parenthood But the longest period of the parental experience when children grow into adolescence and young adulthood and parents themselves are not yet elderly is the least understood In this groundbreaking volume distinguished scholars from anthropology demography economics psychology social work and sociology explore the uncharted years of midlife parenthood The authors employ a rich array of theory and methods to address how the parental experience affects the health well being and development of individuals Collectively they look at the time when parents watch offspring grow into adulthood and begin to establish adult to adult relationships with their children With a strong emphasis on the diversity of midlife parenting including sociodemographic variations and specific parent or child characteristics such as single parenting or raising a child with a disability this volume presents for the first time the complex factors that influence the quality of the midlife parenting experience

**Teen Television** Sharon Marie Ross,Louisa Ellen Stein,2008-04-05 This essay collection explores the phenomenon of teen TV in the United States analyzing the meanings and manifestations of this category of programming from a variety of perspectives Part One views teen television through an industrial perspective examining how networks such as WB UPN The CW and The N have created a unique economic framework based on demographic niches and teen focused narrowcasting Part Two focuses on popular teen programs from a cultural context evaluating how such programs reflect and at times stretch the envelope of the cultural contexts in which they are created Finally Part Three explores the cultures of

reception including the realms of teen consumerism fan discourse and unofficial production through which teens and consumers of teen media have become authors of the teenage experience in their own right [Childhood poverty and social exclusion](#) Ridge, Tess, 2002-10-02 Childhood poverty has moved from the periphery to the centre of the policy agenda following New Labour's pledge to end it within twenty years. However, whether the needs and concerns of poor children themselves are being addressed is open to question. The findings raise critical issues for both policy and practice, in particular the finding that children are at great risk of experiencing exclusion within school. School has been a major target in the drive towards reducing child poverty. However, the policy focus has been mainly about literacy standards and exclusion from school. This book shows that poor children are suffering from insufficient access to the economic and material resources necessary for adequate social participation and academic parity. Childhood poverty and social exclusion will be an invaluable teaching aid across a range of academic courses including social policy, sociology, social work and childhood studies. All those who are interested in developing a more inclusive social and policy framework for understanding childhood issues from a child-centred perspective, including child welfare practitioners and policy makers, will want to read this book. Studies in poverty, inequality and social exclusion series. Series Editor: David Gordon, Director, Townsend Centre for International Poverty Research. Poverty, inequality and social exclusion remain the most fundamental problems that humanity faces in the 21st century. This exciting series, published in association with the Townsend Centre for International Poverty Research at the University of Bristol, aims to make cutting-edge poverty-related research more widely available. **Publishers, Readers, and Digital Engagement** Marianne Martens, 2016-06-15 This book demonstrates how the roles of author, marketer and reviewer are being redefined as online environments enable new means for young adults to participate in the books they love. Prior to the expansion of digital technologies around reading, teachers, parents and librarians were the primary gatekeepers responsible for getting books into the hands of young people. Now, publishers can create disintermediated digital enclosures in which they can communicate directly with their reading audience. This book exposes how teens contribute their immaterial and affective labor as they engage in participatory reading experiences via publishers and authors' interactive websites and use of social media, and how in turn publishers are able to use such labor as they get invaluable market research, peer-to-peer recommendations and even content which can be used in other projects, all virtually free of charge.

**Managing to Make It** Frank F. Furstenberg, 1999-03-15 Challenging misconceptions about life in the inner city, *Managing to Make It* shows that poor parenting is not necessarily more common in disadvantaged neighborhoods and explains why neighborhood advantage is not invariably linked to success. At the same time, the study offers a wealth of information about programs, services and policy decisions that will be indispensable to policy makers, sociologists, educators and anyone concerned with the fate of the urban poor [A Dictionary of the Chinese Language](#)

General Accounting Office,1991 The study reported in this document is a follow up to earlier reviews of drugs and other youth problems It addressed the current status of and the recent trends in teenage drug use pregnancy and dropping out of school and the post 1987 research about the relationship between teenage drug use and either pregnancy or dropping out Statistics from public and private agencies were evaluated to describe trends in basic rates of these behaviors Although the data on teenage drug use displayed a downward trend reporting problems and estimating errors hindered their interpretation It seems unlikely that actual drug use has risen between 1979 and 1988 among youths overall or among individual racial or ethnic groups The 1985 data on teenage pregnancy indicated large disparities in the pregnancy birth and abortion rates for women 15 to 19 years of age while nonWhite and Hispanic teenagers appeared much more likely to become pregnant Research on dropouts indicated that teenagers were leaving school less frequently than in the past Also Black students had substantially decreased the gap between their dropout rates and those of White students Hispanics and Native Americans continued to drop out of school at rates considerably higher than those of White or Black students
