Teilhard's Mysticism Of Knowing:

Teilhard's Mysticism of Knowing Thomas Mulvihill King,1981 **Teilhard's Mysticism of Knowing** Thomas Mulvihill King (s.j.),1981 *Teilhard's Mysticism* Duffy, Kathleen ,2014-06-30 Pierre Teilhard de Chardin 1881 1955 a French Jesuit priest and scientist charted a new path in reconciling Christian theology with evolutionary science Here a theologian scientist examines Teilhard s mysticism showing how science can illuminate the mystical path while also demonstrating the compatibility between Teilhard s thought and current frontiers in scientific exploration **A Companion to Jesuit Mysticism** Robert Aleksander Maryks,2017-03-06 In A Companion to Jesuit Mysticism Robert A Maryks provides thirteen unique essays discussing the Jesuit mystical tradition a somewhat neglected aspect of Jesuit historiography that stretches as far back as the order s co founder Ignatius of Loyola his spiritual visions at Manresa and ultimately the mystical perspective contained in his Spiritual Exercises The volume s contributions on the most significant representatives of the Jesuit mystical tradition from Baltasar lvarez to Louis Lallemant to Hugo Makibi Enomiya Lassalle aim to fill this lacuna in Jesuit historiography Although intended primarily as a handbook for scholars seeking to further their own research in this area the volume will undoubtedly be of interest to scholars and students of Jesuit studies more broadly Teilhard de Chardin and Eastern Religions Ursula King,2011 Teilhard de Chardin and Eastern Religions is in part an update of the 1980 classic *Toward a New Mysticism* Author Ursula King has extensively revised this work adding new material as she traces Teilhard s encounter with Eastern thought It includes an extensive bibliography and annotated study guide Book jacket

Teilhard De Chardin and Eastern Religions U. M. King,1977 The Phenomenon of Teilhard David H. Lane,1996 New Age writer of the popular Aquarian Conspiracy Marilyn Ferguson observed that many of the leading lights of the New Age movement claim Teilhard as one of the most influential persons in their lives Other influences acknowledged include C G Jung Aldous Huxley Swami Muktananda Thomas Merton Werner Erhard and Maharishi Yogi Indeed of the 185 New Age leaders surveyed Teilhard was the most frequently mentioned of any person who had most influenced their thinking If this is the case then if we are to understand the New Age movement properly it behooves us to take a careful and critical look at Teilhard de Chardin David Lane has done precisely this in a clear well documented and penetrating way In this crucial book David Lane lays bare the philosophical theological and scientific failures of Teilhard s New Age enterprise In a highly documented and insightful scrutiny of Teilhard s cosmic evolution Lane unveils the apostate Christian roots of one of the most important forerunners of the New Age movement This is one of the most significant and serious treatments of the modern roots of the New Age in print The Unbearable Wholeness of Being Ilia Delio,2013 This title explores the meaning of Christian theology in light of the scientific discoveries of our age Like Teilhard de Chardin and Thomas Berry Delio opens out eyes to the omni active all powerful all intelligent Love that forms and guides the interrelatedness and interbeing of everything and everyone ourselves included Christian Mysticism Harvey D. Egan,1998-09-16 Christian mysticism is

unique in its view of Jesus death and resurrection as the very cause and exemplar of the mystical life in all its purity Jesus saving death on the cross exemplifies the mystical letting go of everything consoling tangible and finite in order to surrender totally to the mystery of the Father s unconditional love In this introduction to Christian mysticism Reverend Harvey Egan S J presents four Christian mystics as paradigms of the classical tradition St Ignatius of Loyola St Teresa of Avila St John of the Cross and the unknown author of the Cloud of Unknowing From this foundation he moves to two contemporary figures Thomas Merton and Pierre Teilhard de Chardin each of whom reflects a contemporary transposition of the two mystical traditions the apophatic which emphasizes the radical difference between God and creatures and the kataphatic which emphasizes the similarity between God and creatures *Teilhard Lexicon* Sion Cowell,2004-06-01 Written to enable researchers and students to better understand the specialised language of Teilhard s transdisciplinary approach which he found himself compelled to develop as a means of expressing that extraordinary vision of a universe in process of convergence towards a cosmic centre of unity he identifies with the Cosmic Christ **Pierre Teilhard De Chardin on People and Planet** Celia Deane-Drummond,2017-07-05 Humanity s relationship to nature is central to the work of Pierre Teilhard de Chardin an influential priest and scientist of the twentieth century Teilhard believed that spiritual development must be viewed alongside material development and that evolutionary theory lies at the heart of humanity s understanding of its place in the world Pierre Teilhard de Chardin on People and Planet argues that Teilhard s cosmic mysticism and intense interest in both cosmological and evolutionary sciences are highly relevant to current debates about how best to construct a meaningful spirituality The book offers a critical revision of Teilhard s thought in the light of current debates in evolutionary science eco theology and environmental ethics The essays present fresh interpretations of Teilhard s work and point to the significance of his thought in the contemporary study of science and religion *The Not-Yet God* Delio, Ilia,2023-09-15 A Christian theological engagement with evolutionary theory quantum theory and relational holism through the works of Teilhard de Chardin and Carl Jung Re-Enchanting the Earth Delio, Ilia ,2020-09-16 Artificial Intelligence AI the new frontier of human evolution holds the promise of reuniting religion and science Techno-Sapiens in a Networked Era Ryan K. Bolger,Kutter Callaway,2020-11-09 Techno Sapiens gathers together leading scholars of technology theology and religion in order to explore the ways in which modern technology is neither solely a dehumanizing force in the world nor a mere instrument for evangelizing the world but rather the very means by which incarnation happens the media in and through which humans love the digital other The essays explore the question of how technology encourages and or inhibits the human capacity to love our neighbor through asking the following questions Who is my digital neighbor How does social media in particular allow us to love our digital neighbor How does one become a digital neighbor **Astrophilosophy, Exotheology, and Cosmic Religion** Andrew M. Davis,Roland Faber,2024-01-22 Astrophilosophy Exotheology and Cosmic Religion Extraterrestrial Life in a Process Universe applies Alfred North Whitehead s process philosophy and the associated process

philosophies of Henri Bergson Teilhard de Chardin and others to the interdisciplinary layers of astrobiology extraterrestrial life and the impact of discovery This collection edited by Andrew M Davis and Roland Faber asks questions such as How have process thinkers imagined universal creative evolution and its implications for philosophies theologies and religions beyond earth and How might their claims as to the primacy of organism temporality novelty value and mind enrich current discussions and debates across disciplines As experts in their fields the contributors are informed by but not limited to process conceptualities The chapters not only advance recent discussions in astrobiology cosmology and evolution but also consider a constellation of philosophical topics from shared extraterrestrial knowledge and values to the possibilities or limitations afforded by A I technology the Fermi Paradox the Drake Equation and the increasing need to nurture the cosmic dimensions of theological and religious traditions The Oxford Dictionary of the Christian Church Andrew

Louth,2022-02-17 Uniquely authoritative and wide ranging in its scope The Oxford Dictionary of the Christian Church is the indispensable reference work on all aspects of the Christian Church It contains over 6 500 cross referenced A Z entries and offers unrivalled coverage of all aspects of this vast and often complex subject from theology churches and denominations patristic scholarship and the bible to the church calendar and its organization popes archbishops other church leaders saints and mystics In this new edition great efforts have been made to increase and strengthen coverage of non Anglican denominations for example non Western European Christianity as well as broadening the focus on Christianity and the history of churches in areas beyond Western Europe In particular there have been extensive additions with regards to the Christian Church in Asia Africa Latin America North America and Australasia Significant updates have also been included on topics such as liturgy Canon Law recent international developments non Anglican missionary activity and the increasingly important area of moral and pastoral theology among many others Since its first appearance in 1957 the ODCC has established itself as an essential resource for ordinands clergy and members of religious orders and an invaluable tool for academics teachers and students of church history and theology as well as for the general reader Artificial Earth J Daniel

Andersson,2023-10-24 Artificial Earth A Genealogy of Planetary Technicity offers an intellectual history of humanity as a geological force focusing on a prevalent contradiction in the Anthropocene discourse on global environmental change on the one hand it has been argued that there are hardly any pristine environments anymore to the degree that the concept of nature has lost its meaning while on the other that anthropogenic environmental change has become so prevailing that it ought to be conceived of as a force of nature in the literal sense of the expression Artificial Earth argues that to fully grasp the stakes of this discourse we need not only understand the contemporary scientific and technological transformations behind the Anthropocene but also explore the history of an ontological concern tied up with it In order to do so Artificial Earth examines reflections on the ontological dualism between nature and artifice within the history of earth science from the late eighteenth century onwards Paying particular attention to its consequences for how human subjectivity has been

conceptualized in the Anthropocene it then enrolls these resources in an effort to problematize attempts since the 1980s to formalize earth science in systems theoretical terminology In sum the aim is to investigate the historical conditions for the possibility of conceiving human artifice as an integral part of the earth's terrestrial environment with the conviction that such an investigation may assist in resolving the aforementioned contradiction or at least to understand it better by tracing its historical lineage J Daniel Andersson is a post doctoral researcher at the Department for Thematic Studies Linköping University His research interests lie at the intersection between the technical cultures political imaginaries and historical processes that have shaped the ways in which the global environment has been understood and valued A general fascination with how concepts and discursive vocabularies become solidified in scientific modes of organization has consistently informed his theoretical and methodological approaches He has previously written about for instance the relationship between future orientation and valuation in integrated assessment models climate engineering as a sociotechnical imaginary and the intellectual history of risk management in global change science His writing has appeared in journals such as *Environment Planning* *Anthropocenes* and *Cosmos History*

Chirst In Evolution Ilia Delio,2010 *The Jesuit and the Skull* Amir Aczel,2008-11-04 From the New York Times bestselling author of Fermat's Last Theorem an extraordinary story Philadelphia Inquirer of discovery evolution science and faith In 1929 French Jesuit priest Pierre Teilhard de Chardin was a part of a group of scientists that uncovered a skull that became known as Peking Man a key evolutionary link that left Teilhard torn between science and his ancient faith and would leave him ostracized by his beloved Catholic Church His struggle is at the heart of *The Jesuit and the Skull* which takes readers across continents and cultures in a fascinating exploration of one of the twentieth century's most important discoveries and one of the world's most provocative pieces of evidence in the roiling debate between creationism and evolution

A Strange Tongue John D. Green,2002 This book is the product of both historical and personal interest in the grounds of religious conviction It deals with the practice and development of the tradition of discernment of spirits in the late fourteenth century England and sixteenth century Spain as reflected in the classical texts of the mystics of the periods Julian of Norwich the Cloud Author and Walter Hilton in England and Ignatius of Loyola and John of the Cross in Spain The tradition of discernment came into being at the very beginning of the Church's history and has been appropriated adapted and developed throughout its history The book explores how the tradition is expanded and maintains continuity with its origins and suggests that it reaches some apogee in sixteenth century Spain for Christian lives of apostolic mission and contemplation It illustrates how the cultural circumstances of the times moulded the manner in which the experiences of the mystics were perceived Discernment of Spirits is about how Christians reach some conviction that the stirrings within consciousness which seem to originate so strangely and yet beckon so persistently are real in the sense of authentically divine They are stirrings which call for a response in the lives of mystics Rowan Williams at the beginning of his influential book *The Wound of Knowledge* refers to the intractable strangeness of the

ground of belief that must constantly be allowed to challenge the fixed assumptions of religiosity it is a given whose question to each age is fundamentally one and the same This book illustrates how the question is addressed in the texts of the mystics In our own time the strange stirrings which intimate the question tend to be drowned by a multiplicity of competing voices The suggestion is made that when we listen to the voices of the past we may be encouraged to wonder about the question posed by the stirrings within our own consciousness hitherto unheard or dismissed as simply strange
