This book attempts to draw lessons from the experiences of developed as well as developing countries in carrying out telecommunications reform. Contributors come from academia as well as from stakeholders in telecommunications policy in a dozen countries mostly in the Asia Pacific region. Globally the telecommunications industry is undergoing major changes; technological advances in the form of a vast number of new digitised services; ownership shifts as state owned carriers in many countries become fully or partly privatized; and a general transition from monopolistic to more competitive market environments. The economic and regulatory experiences derived from these changes are explored and analyzed using the USA, the UK, Australia, and Singapore to represent developed and newly industrialized countries, and China, India, Indonesia, Malaysia, the Philippines, Sri Lanka, Thailand, and Vietnam as examples of developing countries. The conclusions outlined in this timely volume hold important lessons for these as well as for other countries.
