Who Controls the Internet? Jack Goldsmith, Tim Wu, 2006-03-17 Is the Internet erasing national borders Will the future of the Net be set by Internet engineers rogue programmers the United Nations or powerful countries Who s really in control of what s happening on the Net In this provocative new book Jack Goldsmith and Tim Wu tell the fascinating story of the Internet s challenge to governmental rule in the 1990s and the ensuing battles with governments around the world It s a book about the fate of one idea that the Internet might liberate us forever from government borders and even our physical selves We learn of Google s struggles with the French government and Yahoo s capitulation to the Chinese regime of how the European Union sets privacy standards on the Net for the entire world and of eBay s struggles with fraud and how it slowly learned to trust the FBI In a decade of events the original vision is uprooted as governments time and time again assert their power to direct the future of the Internet The destiny of the Internet over the next decades argue Goldsmith and Wu will reflect the interests of powerful nations and the conflicts within and between them While acknowledging the many attractions of the earliest visions of the Internet the authors describe the new order and speaking to both its surprising virtues and unavoidable vices Far from destroying the Internet the experience of the last decade has lead to a quiet rediscovery of some of the oldest functions and justifications for territorial government While territorial governments have unavoidable problems it has proven hard to replace what legitimacy governments have and harder yet to replace the system of rule of law that controls the unchecked evils of anarchy While the Net will change some of the ways that territorial states govern it will not diminish the oldest and most fundamental roles of government and challenges of governance Well written and filled with fascinating examples including colorful portraits of many key players in Internet history this is a work that is bound to stir heated debate in the cyberspace community Wireless Internet Applications and Architecture Mark

Beaulieu, 2002 This guide for developers and architects presents a technical overview of wireless Internet technology applications and content issues The text begins with a discussion of basic wireless concepts and technological trends Next the construction of messaging browsing and interactive and conversational voice portal applications is described The final section is devoted to the architecture of the wireless Internet Coverage extends to a discussion of mCommerce servers Annotation copyrighted by Book News Inc Portland OR **Information Technology and Constructivism in Higher**

Cannavo, 2007-06-22 In America today we see rampant development unsustainable resource exploitation and commodification ruin both natural and built landscapes disconnecting us from our surroundings and threatening our fundamental sense of place Meanwhile preservationists often respond with a counterproductive stance that rejects virtually any change in the landscape In *The Working Landscape* Peter Cannav identifies this zero sum conflict between development

and preservation as a major factor behind our contemporary crisis of place Cannav offers practical and theoretical alternatives to this deadlocked polarized politics of place by proposing an approach that embraces both change and stability and unifies democratic and ecological values creating a working landscape Place Cannav argues is not just an object but an essential human practice that involves the physical and conceptual organization of our surroundings into a coherent enduring landscape This practice must balance development which he calls founding and preservation Three case studies illustrate the polarizing development preservation conflict the debate over the logging of old growth forests in the Pacific Northwest the problem of urban sprawl and the redevelopment of the former site of the World Trade Center in New York City Cannav suggests that regional democratic governance is the best framework for integrating development and preservation and he presents specific policy recommendations that aim to create a working landscape in rural suburban and urban areas A postscript on the mass exile displacement and homelessness caused by Hurricane Katrina considers the implications of future climate change for the practice of place

**The Future of Ideas** Lawrence Lessig, 2002-10-22 The Internet revolution has come Some say it has gone In *The Future of Ideas* Lawrence Lessig explains how the revolution has produced a counterrevolution of potentially devastating power and effect Creativity once flourished because the Net protected a commons on which widest range of innovators could experiment But now manipulating the law for their own purposes corporations have established themselves as virtual gatekeepers of the Net while Congress in the pockets of media magnates has rewritten copyright and patent laws to stifle creativity and progress Lessig weaves the history of technology and its relevant laws to make a lucid and accessible case to protect the sanctity of intellectual freedom He shows how the door to a future of ideas is being shut just as technology is creating extraordinary possibilities that have implications for all of us Vital eloquent judicious and forthright *The Future of Ideas* is a call to arms that we can ill afford to ignore

**The Place of Law** Austin Sarat, Lawrence Douglas, Martha Umphrey, 2006-04-03 It has long been standard practice in legal studies to identify the place of law within the social order And yet as *The Place of Law* suggests the meaning of the concept of the place of law is not self evident This book helps us see how the law defines territory and attempts to keep things in place it shows how law can be and is used to create particular kinds of places differentiating for example individual property from public land And it looks at place as a metaphor that organizes the way we see the world This important new book urges us to ask about the usefulness of metaphors of place in the design of legal regulation

*Inventing Future Cities* Michael Batty, 2018-12-11 How we can invent but not predict the future of cities We cannot predict future cities but we can invent them Cities are largely unpredictable because they are complex systems that are more like organisms than machines Neither the laws of economics nor the laws of mechanics apply cities are the product of countless individual and collective decisions that do not conform to any grand plan They are the product of our inventions they evolve In *Inventing Future Cities* Michael Batty explores what we need to understand about cities in order to invent their future Batty outlines certain themes principles that apply to all cities He investigates not the invention of artifacts but inventive processes Today form is becoming ever more divorced from function information networks now shape the traditional functions of cities as places of exchange and innovation By the end of this century most of the world's population will live in cities large or small sometimes contiguous and always connected in an urbanized world it will be increasingly difficult to define a city by its physical boundaries Batty discusses the coming great transition from a world with few cities to a world of all cities argues that future cities will be defined as clusters in a hierarchy describes the future high frequency real time streaming city considers urban sprawl and urban renewal and maps the waves of technological change which grow ever more intense and lead to continuous innovation an unending process of creative destruction out of which future cities will emerge

*Pittsburgh and the Appalachians* Joseph L. Scarpaci, 2010-06-15 Few American cities reflect the challenges and promise of a twenty first century economy better than Pittsburgh and its surrounding region Once a titan of the industrial age Pittsburgh flourished from the benefits of its waterways central location and natural resources bituminous coal to fire steel furnaces salt and sand for glass making gas oil and just enough ore to spark an early iron industry Today like many cities located in the manufacturing triangle that stretches from Boston to Duluth to St Louis Pittsburgh has made the transition to a service based economy Pittsburgh and the Appalachians presents a collection of eighteen essays that explore the advantages and disadvantages that Pittsburgh and its surrounding region face in the new global economy from the perspectives of technology natural resources workforce and geography It offers an extensive examination of the processes and factors that have transformed much of industrial America during the past half century and shows how other cities can learn from the steps Pittsburgh has taken through

redevelopment green space acquisition air and water quality improvement cultural revival and public private partnerships to create a more livable economically viable region for future populations      Charlotte, NC William Graves (Ph. D.), Heather A. Smith, 2010 The rapid evolution of Charlotte North Carolina from regional backwater to globally ascendant city provides stark contrasts of then and now Once a regional manufacturing and textile center Charlotte stands today as one of the nation's premier banking and financial cores with interests reaching broadly into global markets Once defined by its biracial and bicultural character Charlotte is now an emerging immigrant gateway drawing newcomers from Latin America and across the globe Once derided for its sleepy nine to five uptown Charlotte's center city has been wholly transformed by residential gentrification corporate headquarters construction and amenity based redevelopment And yet despite its rapid transformation Charlotte remains distinctively southern globalizing not yet global This book brings together an interdisciplinary team of leading scholars and local experts to examine Charlotte from multiple angles Their topics include the banking industry gentrification boosterism architecture city planning transit public schools NASCAR and the African American and Latino communities United in the conviction that the experience of this Sunbelt city center of the nation's fifth largest metropolitan area offers new insight into today's most pressing urban and suburban issues the contributors to Charlotte NC The Global Evolution of a New South City ask what happens when the external forces of globalization combine with a city's internal dynamics to reshape the local structures landscapes and identities of a southern place
