Telematics -- Transportation And Spatial Development Hans M. Soekkha, 1990-12 The field of telematics an integration of telecommunications and informatics is one of the new electronic technologies which merges communication and information processes by using computer networks and is expanding rapidly It is expected that developments in this field will have a strong impact on future transportation and locational decisions as well as on the behaviour of companies and individuals This Proceedings volume contains the papers that were held during the First International Symposium Telematics Transportation and Spatial Development The Hague 14 15 April 1988 The lectures held covered current and expected developments in telematics and the effects of applications of telematics on the economy transportation and spatial planning The main topics discussed were Telematics as a new technology Telematics as substitute for physical transport Telematics as an optimization of existing transportation techniques and processes Telematics as a factor in spatial reorganization

Telematics and Work J.H. Erik Andriesson, Robert A. Roe, 2013-05-24 This volume is part of a publication series emerging from an international interdisciplinary study group on New Technologies and Work NeTWork NeTWork is sponsored by the Werner Reimers Foundation Bad Homburg Germany and the Maison des Sciences de l Homme Paris The NeTWork study group has set itself the task of intellectually penetrating various problem domains posed by the introduction and spread of new

technologies in work settings This problem focus requires interdisciplinary co operation The usual mode of operating is to identify an important problem within the NeTWork scope to attempt to prestructure it and then to invite original contributions from European researchers or research teams actively involved in relevant analytic or developmental work A specific workshop serves to cross fertilize the different approaches and to help to integrate more fully the individual contributions The concept of telematics refers to the integration of computer telecommunication and information technologies It alludes to the opportunities presented by the technical means to communicate and transfer data over large distances by intelligent equipment Teleshopping teleconferencing teleworking and telebanking are but a few examples of a development which influences both public and private environments Both households and workplaces are likely to be thoroughly changed by telematics This publication emphasises the application of telematics in working environments The central questions of the book are How will the present and future development of telematics effect the nature and organization of work and under which conditions will this development be optimal From the various contributions it is clear that telematics is not a single direct cause or determinant of particular changes in work and organization The development and application of telematics depend on decision making of actors at a political scene both outside and inside the work organizations The effects of the use of these applications appear to be co determined by many other factors In fact the technology interacts with political economic and social factors in a complex process that shapes new organizational forms and work relationships

Industrial Engineering, Management Science and Applications 2015 Mitsuo Gen, Kuinam J. Kim, Xiaoxia Huang, Yabe Hiroshi, 2015-05-18 This volume provides a complete record of presentations made at Industrial Engineering Management Science and Applications 2015 ICIMSA 2015 and provides the reader with a snapshot of current knowledge and state of the art results in industrial engineering management science and applications The goal of ICIMSA is to provide an excellent international forum for researchers and practitioners from both academia and industry to share cutting edge developments in the field and to exchange and distribute the latest research and theories from the international community The conference is held every year making it an ideal platform for people to share their views and experiences in industrial engineering management science and applications related fields
