**In Search of Dark Matter** Ken Freeman,Geoff McNamara,2006-08-25 The dark matter problem is one of the most fundamental and profoundly difficult to solve problems in the history of science Not knowing what makes up most of the known universe goes to the heart of our understanding of the Universe and our place in it In Search of Dark Matter is the story of the emergence of the dark matter problem from the initial erroneous discovery of dark matter by Jan Oort to contemporary explanations for the nature of dark

matter and its role in the origin and evolution of the Universe Written for the educated non scientist and scientist alike it spans a variety of scientific disciplines from observational astronomy to particle physics Concepts that the reader will encounter along the way are at the cutting edge of scientific research However the themes are explained in such a way that no prior understanding of science beyond a high school education is necessary

*A Scheme of Heaven: The History of Astrology and the Search for our Destiny in Data* Alexander Boxer, 2020-01-14 An illuminating look at the surprising history and science of astrology civilization s first system of algorithms from Babylon to the present day Humans are pattern matching creatures and astrology is the universe s grandest pattern matching game In this refreshing work of history and analysis data scientist Alexander Boxer examines classical texts on astrology to expose its underlying scientific and mathematical framework Astrology he argues was the ancient world s most ambitious applied mathematics problem a monumental data analysis enterprise sustained by some of history s most brilliant minds from Ptolemy to al Kindi to Kepler Thousands of years ago astrologers became the first to stumble upon the powerful storytelling possibilities inherent in numerical data To correlate the configurations of the cosmos with our day to day lives astrologers relied upon a scheme of heaven or horoscope showing the precise configuration of the planets at a particular instant in time as viewed from a particular place on Earth Although recognized as pseudoscience today horoscopes were once considered a cutting edge scientific tool Boxer teaches us how to read these esoteric charts and appreciate the complex astronomical calculations needed to generate them by diagramming how the heavens appeared at important moments in astrology s history from the assassination of Julius Caesar as viewed from Rome to the Apollo 11 lunar landing as seen from the surface of the Moon He then puts these horoscopes to the test using modern data sets and statistical science arguing that today s data scientists do work similar to astrologers of yore By looking back at the algorithms of ancient astrology he suggests we can better recognize the patterns that are timeless characteristics of our own pattern matching tendencies At once critical rigorous and far ranging *A Scheme of Heaven* recontextualizes astrology as a vast technological project spanning continents and centuries that foreshadowed our data driven world today

**Surveying the Skies** Gareth Wynn-Williams, 2016-06-17 Since the time of Galileo astronomy has been driven by technological innovation With each major advance has come the opportunity and enthusiasm to survey the sky in a way that was not possible before It is these surveys of discovery that are the subject of this book In the first few chapters the author discusses what astronomers learned from visible light surveys first with the naked eye then using telescopes in the seventeenth century and photography in the nineteenth century He then moves to the second half of the twentieth century when the skies started to be swept by radio infrared ultraviolet x ray and gamma ray telescopes many of which had to be flown in satellites above the Earth s atmosphere These surveys led to the discovery of pulsars quasars molecular clouds protostars bursters and black holes He then returns to Earth to describe several currently active large scale projects that methodically collect images photometry and spectra that are then stored in vast publicly

accessible databases Dr Wynn Williams also describes several recent microsurveys detailed studies of small patches of sky that have led to major advances in our understanding of cosmology and exoplanets [English Mechanic and Mirror of Science and Art](#) ,1925 [Pendulum](#) Amir D. Aczel,2007-11-01 In 1851 struggling self taught physicist L on Foucault performed a dramatic demonstration inside the Panth on in Paris By tracking a pendulum s path as it swung repeatedly across the interior of the large ceremonial hall Foucault offered the first definitive proof before an audience that comprised the cream of Parisian society including the future emperor Napoleon III that the earth revolves on its axis Through careful primary research world renowned author Amir Aczel has revealed the life of a gifted physicist who had almost no formal education in science and yet managed to succeed despite the adversity he suffered at the hands of his peers The range and breadth of Foucault s discoveries is astonishing He gave us the modern electric compass devised an electric microscope invented photographic technology and made remarkable deductions about color theory heat waves and the speed of light Yet until now so little has been known about his life Richly detailed and evocative Pendulum tells of the illustrious period in France during the Second Empire of Foucault s relationship with Napoleon III a colorful character in his own right and most notably of the crucial triumph of science over religion Dr Aczel has crafted a fascinating narrative based on the life of this most astonishing and largely unrecognized scientist whose findings answered many age old scientific questions and posed new ones that are still relevant today **Deep-Sky Companions: Southern Gems** Stephen James O'Meara,2013-04-08 In Southern Gems Stephen James O Meara makes a detour beneath the southern skies presenting a fresh list of 120 deep sky objects for southern hemisphere stargazers to observe Showcasing many exceptional objects catalogued by the pioneering observer James Dunlop known as the Messier of the southern skies all are visible through small to moderate sized telescopes or binoculars under dark skies The list features some of the blackest dark nebulae icy blue planetary nebulae and magnificent galaxies of all types Each object is accompanied by beautiful photographs and sketches original finder charts visual histories and up to date astrophysical background information Whether you live in the southern hemisphere or are just visiting this new Deep Sky Companion will make a perfect observing partner whatever your background There is no other southern sky guide like it on the market [Here and Hereafter](#) Léon Denis,1909 **TELESCOPE Rx - The BIG Book on Equipping, Maintaining and Using a Telescope** Clay Sherrod,2017-02-09 The investment in our love of space and skygazing can be high All too often we are led to believe that we did not have enough equipment or have the wrong equipment or we are not doing things right Telescope Rx is intended to provide solid and practical advice on everything from setting up a telescope eyepieces important accessories and even computer or smart phone programs to run the telescope then turning that telescope into a nightly research tool with projects for every night you wish to pursue This is your directory to properly outfit your telescope without spending lots of money what the functions of astronomical telescope are pitfalls to avoid in purchasing and ultimately your guide to pursue some serious scientific studies with your telescope after you have

Levy,2010-09-09 For many millennia the starry night sky has been a source of wonder and awe to men and women who have tried to unravel the mystery of the billion distant lights that fill the heavens after dark The story of the great discoverers who succeeded in explaining part of the mystery is told here with the joy and infectious enthusiasm that only a fellow discoverer can convey David Levy codiscoverer of Comet Shoemaker Levy 9 with his wife Wendee Wallach Levy evokes that marvelous moment of Eureka as he masterfully relates each story He gives the reader a glimpse of the enthralling adventure of cosmic discovery through stories of the most famous and brilliant astronomers Beyond their personal accomplishments these scientists expanded all of humanity s understanding of the universe and our place within it For example Galileo s breathtaking discovery of the moons of Jupiter new worlds that refused to orbit the sun challenged the whole doctrine of the earth being the center of the universe With the start of the 20th century Shapley pushed back the envelope that had been opened by Galileo by proving that the center of our galaxy is very far beyond our own sun And

Hubble showed that even our galaxy is but a tiny part of a universe that is rapidly expanding In describing these milestones of science Levy reveals his own spirited conversations with such luminaries of the imagination as the discoverer of the planet Pluto Clyde Tombaugh and one of the world s greatest science fiction writers Sir Arthur C Clarke Through Levy s unique perspective on cosmic discovery he is able to connect his own personal life story with that of astronomers of the past and by extension with the history of the whole universe As the codiscoverer of the spectacular comet that crashed into Jupiter Levy formulated a whole new range of exciting questions about the universe Do comets serve to transport the elements of life from one planet to the next What is the evidence that a large comet once hit the earth Will the earth someday be in danger of colliding with another such comet and will we have the technology to stop it This fascinating book will excite any of us who have stared at the night sky in awe and amazement David Levy and Wendee Wallach Levy Vail AZ are continuing their ongoing search for new comets David Levy is the president of the Jarnac Observatory science editor for PARADE magazine a contributing editor to Sky and Telescope and Sky News magazines and the author of Starry Nights The Quest for Comets and Impact Jupiter among other books     [The Search for Extra Terrestrial Intelligence](#) David Lamb,2005-07-26 Is the Search for Extra Terrestrial Intelligence a genuine scientific research programme David Lamb evaluates claims and counter claims and examines recent attempts to establish contact with other intelligent life forms He considers the benefits and drawbacks of this communication how we should communicate and whether we actually can He also assesses competing theories on the origin of life on Earth discoveries of former solar planets proposals for space colonies and the consequent technical and ethical issues
