Test Pilot Brian Johnson, 2011-06-20 Test pilots dashing and courageous young men or foolhardy gamblers In this fully illustrated book written by the producer of the BBC1 television series of the same name we follow the ups and downs of a group of trainee test pilots at Boscombe Down in Wiltshire Beginning with the exacting selection procedure we discover what personal and professional qualities a pilot needs in order to become a test pilot Only six UK and twelve foreign students are chosen each year and once selected the pressure on them steadily mounts As the students learn to push each aircraft s performance to its limits they too are being mentally and physically stretched further than ever before Training is given on both fixed and rotary wing aircraft and by the end of the course each student is fully conversant with the different techniques necessary to fly each type They learn how to recover safely from spins how to cope with sudden failures of equipment in mid flight and how to land an aircraft with no power All the time they are assessing each aircraft s capabilities and the scope of the on board technology The final part of the course is the preview exercise when every student is required to evaluate an aircraft he has never flown before and to make a formal presentation to his tutors and examiners Using a number of remarkably frank interviews with students and tutors Brian Johnson explores the process of becoming a test pilot and reveals both the stresses and successes of the year The RAF has given its full support to both the book and the television programmes and thus has enabled Brian Johnson to produce a unique and authoritative account of the training for one of the

most responsible and exciting jobs in modern aviation **Speed** Gilliland|Keith Dunnivant Bob Gilliland (Dunnivant), Keith Dunnivant, 2021-06 On December 22 1964 at a small closely guarded airstrip in the desert town of Palmdale California Lockheed test pilot Bob Gilliland stepped into a strange looking aircraft and roared into aviation history Developed at the super secret Skunk Works the SR 71 Blackbird was a technological marvel In fact more than a half century later the Mach 3 plus titanium wonder designed by Clarence L Kelly Johnson remains the world s fastest jet It took a test pilot with the right combination of intelligence skill and nerve to make the first flight of the SR 71 and the thirty eight year old Gilliland had spent much of his life pushing the edge In Speed one of America s greatest test pilots collaborates with acclaimed journalist Keith Dunnivant to tell his remarkable story How he was pushed to excel by his demanding father How a lucky envelope at the U S Naval Academy altered the trajectory of his life How he talked his way into U S Air Force fighters at the dawn of the jet age despite being told he was too tall How he made the conscious decision to trade the security of the business world for the dangerous life of an experimental test pilot including time at the clandestine base Area 51 working on the Central Intelligence Agency s Oxcart program The narrative focuses most intently on Gilliland s years as the chief test pilot of the SR 71 as he played a leading role in the development of the entire fleet of spy planes while surviving several emergencies that very nearly ended in disaster Waging the Cold War at 85 000 feet the SR 71 became an unrivaled intelligence gathering asset for the U S Air Force invulnerable to enemy defenses for a quarter century Gilliland s work with the SR 71 defined him especially after the Cold War when many of the secrets began to be revealed and the plane emerged from the shadows not just as a tangible museum artifact but as an icon that burrowed deep into the national consciousness Like the Blackbird itself Speed is a story animated by the power of ambition and risk taking during the heady days of the American Century
