Soul Mate Biology Gregor Majdic, 2021-02-26 Love one of the most profound of human emotions love that accompanies us from puberty to old age love that follows us from ancient times to modern from ancient writings through the Bible and the texts of medieval scribes to modern day books and movies Through the millennia love has lost none of its secrecy charm attractiveness craziness even in this digital age when we are overwhelmed by information But what is love Where does this emotion originate Are we humans the only living beings feeling this emotion Can love be explained by some chemical reactions in our brains Is love just a trick of nature or is love some kind of higher feeling We do not have definite answers to any of these questions nevertheless neuroscience behavioral science and others have provided us with some at least partial answers We know today a great deal more than ever before about what is happening in the brain when we are madly in love We understand why our hearts beat faster when we see the person we love we know why we sweat and why we feel anxious when the loved one is away from us and we have some ideas about how feelings of attachment form in the brain This book guides you through the complicated labyrinth of genes molecules and brain cells that are involved in the feelings of love attachment affection and also simple sexual reproduction

Anatomy of Spirituality: Portrait of the Soul Chander Behl, 2015-04-27 The domain of spirituality separated from its theological overburden believes in the existence of a spiritual self presumed to be distinctly separate from the psychological self The spiritual eternal self also known as the soul or spirit sometimes supported by an overarching Spirit is asserted to be operating behind the ephemeral self This book takes a contrarian stance it argues that the premise of the soul concept is obtained through the magic of language maintained through the marvel of the brain s biochemistry and sustained through the mirage of the psychological juggernauts of the brain The magic the marvel and the mirage together bring about subtle shifts as the linguistic brain suppresses many psychological details habitually applies mental templates such as inversions and dichotomies and enhances its language by coining religious and spiritual metaphors The consequence of these changes is that the usual flickering self

begins to be impressed by itself believing it is buttressed by something transcendental and eternal within the soul or the spirit The self although indoctrinated during its formative years also begins to assimilate and accept the opinion that the overwhelming weight of religious doctrines and dogmas the overburden signifies as the legitimate proof for the eternal soul
