**Laying the Ghost** Caít Oliver,2013-02-22 A husband's obsession with historic reenactments threatens to tear his small family apart when they purchase an old house that may be haunted. A jealous wife and a young son with second sight complicate matters as the ghost of a young soldier, a survivor of the Battle of Culloden, Scotland's last stand against the English, inhabits their life. His insistence that a bloodied relic in their possession be returned to the soil of Scotland wreaks havoc upon their world. An unexpected brush with death, the exposure of a beloved leader as a fraud, and a view into the reality of history puts things into rightful perspective. **Monthly Weather Review**, 1921 **Art and Visual Perception**

Rudolf Arnheim, 1956 *Mesophotic Marvels* Barrett Williams, ChatGPT, 2025-08-15 Embark on a voyage to the mesophotic twilight, the ocean's dim frontier where sunlight fades and life glows in neon whispers. *Mesophotic Marvels* invites curious minds to a guided tour of a realm that balances mystery with measurable science, revealing how creatures adapt, communicate, and survive in a light-limited world. This immersive eBook unpacks the science of dim seas with clarity and wonder. Discover how light fades with depth and which colors still survive in the blue-green veil. Meet the dazzling diversity that thrives here, from corals and their symbionts to the lanternfish and the glow-bearing invertebrates that light up the night. Learn how bioluminescence and fluorescence function and how signals, color, pattern, and timing become the language of life in the dark. See how visual systems evolve to snatch every photon and how camouflage, lures, and counter-illumination shape the daily drama of predator and prey. Follow the coral connection as light management and fluorescent cues influence growth, communication, and camouflage. Peek into microhabitats where glow emerges from crevices, overhangs, and detritus-rich pockets that hum with activity. Explore the tools scientists use to study this realm, from submersibles and ROVs to low-light imaging and field experiments, alongside the field notes that turn observations into insight. The story stretches beyond biology to the biogeography of glow and the far-reaching impacts of climate change on light dynamics and life in twilight. Designed for ocean enthusiasts, students, divers, of curiosity, and anyone drawn to the delicate artistry of life under dim light, this book blends science with vivid storytelling and practical guidance for observing the twilight realm. Welcome to *Mesophotic Marvels*, your invitation to wonder, exploration, and stewardship in the dimly lit corners of our blue planet. Buy now and join the discovery. **The Mammoth Book of Travel in Dangerous Places** John Keay, 2010-04-29

The great explorers were the celebrities of their day; the romance and danger of their daring expeditions captured the public imagination and the world's headlines to an extraordinary degree. Not all of them lived to tell the tale, of course, but those who emerged triumphant from jungle, desert, or polar wasteland were hailed as if returning from beyond the grave. Journalists vied for their stories, and publishers rushed their first-hand accounts of exciting and dangerous journeys into print for a wide and voracious readership. Acclaimed travel historian John Keay introduces this selection of the best of these first-hand narratives, including those of John Ross and John Franklin writing about their experiences in the Arctic, Richard Burton's account of his search for the

source of the Nile John Speke on Lake Victoria David Livingstone and Henry Stanley s adventures in central Africa Alexander McKenzie s first crossing of America and Meriwether Lewis s encounter with the Shoshonee Robert Peary and Roald Amundsen s voyages to the poles and the poignant last words of William Wills in Australia and Robert Scott s In Extremis Keay includes the experiences of four remarkable twentieth century explorers Hiram Bingham on the discovery of Machu Picchu Wilfred Thesiger on Arabia s Empty Quarter Edmund Hillary on reaching the summit of Everest and Harry St John Bridger Philby facing despair and defeat in the Arabian desert The Popular Science Monthly ,1878 **A New Approach to I.C.S.E. **Empty Spaces** Jordan Abel, 2024-02-06 A hypnotic and mystifying exploration of land and legacy investigating what it means to be an intergenerational Indigenous survivor of Residential Schools Jordan Abel s new work grows out of the groundbreaking visual expression in his recently published NISHGA a book that combined nonfiction with photography concrete poetry and literary inquiry Whereas NISHGA integrated descriptions of the landscape from James Fenimore Cooper s settler classic The Last of

the Mohicans into visual pieces Empty Spaces reinscribes those words on the page itself and in doing so subjects them to bold rewritings Reimagining the nineteenth century text from the contemporary perspective of an urban Nisga a person whose relationship to land and traditional knowledge and spiritual traditions was severed by colonial violence Abel attempts to answer his research question of what it means to be Indigenous without access to familial territory Engaging the land through fiction and metaphor Abel creates an eerie looping and atmospheric rendering of place that evolves despite the violent and reckless histories of North America The result is a bold and profound new vision of history that decenters human perception and forgoes Westernized ways of seeing Rather than turning to characters and dialogue to explore truth Abel invites us to instead understand that the land knows everything that can and will happen even as the world lurches toward uncertainty
