The Broken Image Man Science And Society:

The Broken Image Floyd W. Matson, 1964 Donated by Sydney Harris *The Broken Image; Man, Science and Society*, by Floyd W. Matson Floyd W. Matson, 1964 The Broken Image Floyd M. Matson, 1966 The Broken Image Floyd N. Matson, 1966 *The American Deists* Kerry S. Walters, 2021-10-08 Challenging carved in stone tenets of Christianity deism began sprouting in colonial America in the early eighteenth century was flourishing nicely by the American Revolution and for all intents and purposes was dead by 1811 Despite its hasty demise deism left a theological legacy Christian sensibility would never be quite the same Bringing together the works of six major American deists Benjamin Franklin Thomas Jefferson Ethan Allen Thomas Paine Elihu Palmer and Philip Frenau and the Frenchman Comte de Volney whose writings greatly influenced the American deists Kerry Walters has created the fullest analysis yet of deism and rational religion in colonial and early America In addition to presenting a chronological collection of several works by each author he provides a description of deism's historical roots its major themes its social and political implications and the reasons for its eventual demise as a movement Essential readings from the three major deistic periodicals of the period Temple of Reason Prospect and the Theophilanthropist also are included in the volume This is the first time they have been reprinted since their original publication American deism is more than merely an antiquated philosophical position possessing only historical interest Walters contends Its search for a religion based upon the ideals of reason nature and humanitarianism rather than the blind faith scriptural inerrancy and miracles preached by Christian churches at the time continues to offer insight of real significance Metatheory in Social Science Donald Winslow Fiske, Richard A. Shweder, 1986-03-15 What is the nature of the social sciences What kinds of knowledge can they and should they hope to create Are objective viewpoints possible and can universal laws be discovered Questions like these have been asked with increasing urgency in recent years as some philosophers and researchers have perceived a crisis in the social sciences Metatheory in Social Science offers many provocative arguments and analyses of basic conceptual frameworks for the study of human behavior These are offered primarily by practicing researchers and are related to problems in disciplines as diverse as sociology psychology psychiatry anthropology and philosophy of science While various points of view are expressed in these nineteen essays they have in common several themes including the comparison of social and natural science the role of knowledge in meeting the demands of society and its pressing problems and the nature and role of subjectivity in science Some authors hold that subjectivity cannot be studied scientifically others argue that it can and must be if progress in knowledge is to be made The essays demonstrate the philosophical pluralism they discuss and give a wide range of alternative positions on the future of the social and behavioral sciences in a postpositivist intellectual world *Politics in the Human Interest* William David Du Bois, R. Dean Wright, 2007-01-01 This book presents the striking proposition that by paying attention to what's been learned about human behavior we can develop a political agenda that is in the human interest Such values provide the basis for an

action oriented sociology Politics in the Human Interest explores the theoretical foundation of a humanistic sociology It is a call for the return to the original progressive agenda that knowledge about human behavior can be used to create social progress and a better world

The Crisis of Democratic Theory Edward A. Purcell Jr.,2014-04-23 Widely acclaimed for its originality and penetration this award winning study of American thought in the twentieth century examines the ways in which the spread of pragmatism and scientific naturalism affected developments in philosophy social science and law and traces the effects of these developments on traditional assumptions of democratic theory

The Construction of Homosexuality David F. Greenberg,2008-10-29 At various times homosexuality has been considered the noblest of loves a horrible sin a psychological condition or grounds for torture and execution David F Greenberg s careful encyclopedic and important new book argues that homosexuality is only deviant because society has constructed or defined it as deviant The book takes us over vast terrains of example and detail in the history of homosexuality

Obama's Challenge and the Politics of Change Don Ayre,2009-03-01 First of a series of books based on the spiritual wanderings of the author and others with the intent of sharing ideas about peace and harmony and of responding effectively to Obama s personal challenge of change

[The Routledge Handbook of Dehumanization](#) Maria Kronfeldner,2021-02-25 A striking feature of atrocities as seen in genocides civil wars or violence against certain racial and ethnic groups is the attempt to dehumanize to deny and strip human beings of their humanity Yet the very nature of dehumanization remains relatively poorly understood The Routledge Handbook of Dehumanization is the first comprehensive and multidisciplinary reference source on the subject and an outstanding survey of the key concepts issues and debates within dehumanization studies Organized into four parts the Handbook covers the following topics The history of dehumanization from Greek Antiquity to the 20th century contextualizing the oscillating boundaries dimensions and hierarchies of humanity in the history of the West How dehumanization is contemporarily studied with respect to special contexts as part of social psychology as part of legal studies or literary studies and how it connects to the idea of human rights disability and eugenics the question of animals and the issue of moral standing How to tackle its complex facets with respect to the perpetrator s and the target s perspective metadehumanization and selfdehumanization rehumanization social death status and interdependence as well as the fear we show toward robots that become too human for us Conceptual and epistemological questions on how to distinguish different forms of dehumanization and neighboring phenomena on why dehumanization appears so paradoxical and on its connection to hatred essentialism and perception Essential reading for students and researchers in philosophy history psychology and anthropology this Handbook will also be of interest to those in related disciplines such as politics international relations criminology legal studies literary studies gender studies disability studies or race and ethnic studies as well as readers from social work political activism and public policy

from automobility to the popular phenomenon known as the tailgate party from German sociologist George Simmel to Canadian Media Guru Marshall McLuhan all in the interests of exploring North American obsession with play and particularly the intersection between education work and leisure The A.S.M.R. Asheru Romanha, 2024-02-12 This book shows the automatic spontaneous intelligent design from a feedback loop between the right hemisphere matching by form and the resulting sacred fractal geometry of self-similar sexual mimicry in the four-dimensional human body He shows how this is done through the ASMR and thrill intelligence The missing link is no longer missing His book is a magnum opus on the alchemy of this subject *Technical Fouls* John Kurt Jacobsen, 2018-02-07 What is it that shapes the direction of technological progress in advanced industrial societies Is it science Technology itself Or is it something even more powerful and all-encompassing like power or money or politics John Kurt Jacobsen addresses this topic by investigating how contemporary democratic capitalist states govern the development and deployment of their scientific and technological resources He examines the interaction of ideology profits and power and their combined effect upon technology policy in democracies The social function of science has been a contentious area of scholarly study throughout the second half of the twentieth century Although the book focuses mainly on the United States for the sake of instructive comparison it also studies technological development of other societies including the former Soviet Union and China Some competing accounts of technical change across the borders include laissez-faire cultural and neo-Marxist markets In fact with regard to laissez-faire markets even to inquire if science has a social function is to deviate from the appropriate images of economic development What is always politically at stake is who will rule the next stage in production due to each swing in technology which will in turn be associated with a new structure of control Most recently the microchip revolution and cyberspace are the most highly publicized candidates for the next upswing in technology and thus the next new structure of control The explanatory focus of the book is on ideology or on ideas about how technology works and should work and the three key areas of policy contention discussed are industrial development military uses and the environment Students and scholars of science technology and sociology should find this book useful in coming to terms with the fundamental questions underlying the development of technology today **The Planetary Emergency** Kent D. Shifferd, 2021-02-02 Earth and its inhabitants face an unprecedented crisis the human-caused destruction of the planet's life support systems Deteriorating climate bringing super storms mass forest fires melting glaciers droughts extreme heat and rising seas a decline in food production soil loss water pollution and declining fisheries all threaten the future of life on earth with a looming extinction event not seen for 60 million years Beginning in the 17th century we developed a civilization based on radical materialism exploitation of natural resources and the myth of endless economic growth For all its technological wonders this hypercivilization has proven unsustainable This book explores ways we can create an ecocivilization compatible with the laws and limits of nature a new way of living already developing with new technologies new forms of social organization and a new story about

ourselves and the Earth **The Lyric Self in Zen and E.E. Cummings** Michael Buland Burns,Rima Snyder,2015-04-03 The Lyric Self offers a precise and thorough examination of Zen based on classical and contemporary scholarly works as well as the author s personal experience Eight themes that are common to the practice of Zen Buddhism and the poetry of E E Cummings are compared and explored with an emphasis on their respective value to contemporary psychology and education It is the premise of The Lyric Self that both Zen and Cummings poetry are profoundly concerned with individual awareness and that they both employ an unorthodox use of words to break through the static structures of conventional language and thought **Unity in Diversity** Nicolas A. Nyiri,Rod Preece,2006-01-01 The Interdisciplinary Research Seminar developed by Professor Nicolas A Nyiri of the Political Science Department was initiated three years ago The purpose has been to encourage and foster interdisciplinary research papers and colloquia which are now being published under the editorship of Professor N A Nyiri and Dr Rod Preece Contributors have been drawn from several centres and it is planned to expand the sources of papers in the future The work that has been accomplished has served to bring scholars from diverse fields together and to encourage others to share in the exploration and expansion of critical thinking in a number of areas It is expected that the publication of the first volume will open the way to an ever widening interest in this core area of a university s life critical thinking and dissemination of the knowledge gained From the foreword by Dr Neale Tayler Vice President Academic Wilfrid Laurier University **Nursing Research** Patricia L.
