Clandestine Crossings David Spener,2009 Clandestine Crossings delivers an in depth description and analysis of the experiences of working class Mexican migrants at the beginning of the twenty first century as they enter the United States surreptitiously with the help of paid guides known as coyotes Drawing on ethnographic observations of crossing conditions in the borderlands of South Texas as well as interviews with migrants coyotes and border officials Spener details how migrants and coyotes work together to evade apprehension by U S law enforcement authorities as they cross the border In so doing he seeks to dispel many of the myths that misinform public debate about undocumented immigration to the United States The hiring of a coyote Spener argues is one of the principal strategies that Mexican migrants have developed in response to intensified U S border enforcement Although this strategy is typically portrayed in the press as a sinister organized crime phenomenon Spener argues that it is better understood as the resistance of working class Mexicans to an economic model and set of immigration policies in North America that increasingly resemble an apartheid system In the absence of adequate employment opportunities in Mexico and legal mechanisms for them to work in the United States migrants and coyotes draw on their social connections and cultural knowledge to stage successful border crossings in spite of the ever greater dangers placed in their path by government authorities Terrestrial Vegetation of California, 3rd Edition Michael Barbour,Todd Keeler-Wolf,Allan A. Resource Publication, 1982 **Wolf Depredation on Livestock in Minnesota** Steven H. Fritts, 1982 Depredation by wolves on cattle sheep and other livestock in Minnesota currently is a minor problem except to a few individual farmers Indices to the seriousness of the problem are available only from recent years so historical trends cannot be detected Most losses occur in summer when livestock are released to graze in open and wooded pasture Results of the U S Fish and Wildlife Service's depredation control program in 1979 and 1980 suggest that highly restricted trapping coupled with other management methods has potential for reducing both livestock losses and the number of wolves that need to be killed Waterfowl and Their Wintering Grounds in Mexico, 1937-64 George Bradford Saunders, Dorothy Chapman Saunders, 1981
