domain knowledge by evaluating the textual similarity between bug reports and source code files and API specification documents plus bug fixing and code alteration history For a given bug report the ranking function is constructed based on the linear combination of weighted features where the features are trained on previously solved bug reports In addition to replication of the mentioned technique I have extended the study by evaluating the role of different text preprocessing techniques such as Stemming and Lemmatization and also a randomized selection of training folds on the overall performance of the ranking model I found that Lemmatization of the words and randomized selection of the training folds have an adverse effect on the performance of the ranking model and consequently having lower accuracy and precision of the results

Abstract      *Die, Bug, Die* Les Martin,1997-01-01 When killer roaches attack the small town of Miller s Grove agents Mulder and Scully investigate the possibility that a swarm of alien insects has invaded the earth
