The Buildings Of Ancient Rome:

The Buildings of Ancient Rome Helen Leacroft,Richard Leacroft,1969 Describes the construction of the aqueducts bridges baths and the Pantheon which reflect the Roman way of life and the technological inventiveness of the architects of ancient Rome   **Roman Architecture** Frank Sear,1983 Frank Sear traces the evolution of architecture during the four centuries from the late Republic when Roman building came of age to A D 330 when Constantine moved the empire s capital to Constantinople More than 200 photographs maps and drawings illustrate a discussion ranging over the extent of the empire from Italy and North Africa and to the European and eastern provinces Sear elucidates the complex development of Roman architecture by studying in detail the one site he feels to be the most significant and representative of a given period or province and by placing each site in its historical and cultural context Incorporating the latest archaeological findings Sear treats much more than stylist innovations he carefully considers the building methods and materials used by Roman architects and engineers and he pays close attention to the conditions under which the buildings were erected This updated edition of Roman Architecture includes a full bibliography   **The Architecture of Rome** Ulrich Fürst,1998 Architects and artists have always acknowledged over the centuries that Rome is rightly called the eternal city Rome is eternal above all because it was always young always in its prime Here the buildings that defined the West appeared over more than 2000 years here the history of European architecture was written The foundations were laid even in ancient Roman times when the first attempts were made to design interiors and thus make space open to experience as something physical And at that time the Roman architects also started to develop building types that are still valid today thus creating the cornerstone of later Western architecture In it Rome s primacy remained unbroken whether it was with old St Peter s as the first medieval basilica or new St Peter s as the building in which Bramante and Michelangelo developed the High Renaissance or with works by Bernini and Borromini whose rich and lucid spatial forms were to shape Baroque as far as Vienna Bohemia and Lower Franconia and also with Modern buildings of which there are many unexpected pearls to be found in Rome All this is comprehensible only if it is presented historically i e in chronological sequence and so the guide has not been arranged topographically as usual but chronologically This means that one is not led in random sequence from a Baroque building to an ancient or a modern one but the historical development is followed successively Every epoch is preceded by an introduction that identifies its key features This produces a continuous lavishly illustrated history of the architecture of Rome and thus at the same time of the whole of the West Practical handling is guaranteed by an alphabetical index and detailed maps whose information does not just immediately illustrate the historical picture but also makes it possible to choose a personal route through history   *Roman Architecture* Nigel Rodgers,2006 An authoritative illustrated account of the building of Rome and the cities of her Empire explore the glorious architectural heritage of temples and palaces circuses amphitheatres basilicas and baths triumphal arches columns and monuments wit   **A Companion to Roman**
