Kaminsky,2005-08-02 Behind the velvet ropes and closed curtains buried in the back lots you ll find the darker side of the spotlight It s where stars are created overnight and burn out just as quick Where deals are made to be broken and fame and fortune are paid for in blood With an outstanding ensemble cast of today s brightest talents Mystery Writers of America presents this collection of all new short stories of movies music murder and mayhem will take you from vaudeville to Vegas from the bright lights to the back alleys and make it chillingly clear that in the world of entertainment if you want to make it you may have to step on some people or over their dead bodies **The Business of Martyrdom** Jeffrey W Lewis,2012-04-15 The Business of Martyrdom is the only comprehensive history of suicide bombing from its origins in Imperial Russia to the present day It makes use of a framework from the history and philosophy of technology to explain the diffusion and evolution of suicide bombing over the past several decades It is primarily a work of synthesis meant to reach a

broad audience and endeavors to integrate as much of the recent scholarly literature as possible including reconciling explanatory mechanisms that seem to be at odds with one another In addition this book is able to draw on very recent changes in suicide bombing in the years 2008 2010 that allow it to have a slightly different perspective than earlier studies For the first time the global number of suicide attacks has declined significantly for three years in a row This book therefore has the advantage of addressing the phenomenon of suicide bombing as a bounded phenomenon with limits to its growth and diffusion To this point the impression that suicide bombers are the smartest bombs yet created has been widespread but confined to the area of metaphor Drawing well established ideas from the history of technology *The Business of Martyrdom* argues that the metaphor should be taken literally Suicide bombing is a technology that has been invented and re invented at different times in different areas but always for the same purpose resolving a mismatch in military capabilities between antagonists by utilizing the available cultural and human resources Over the past several years analysts have produced a large number of monographs and articles examining suicide bombing The best contributions in this new and growing literature have shed considerable light on the complexity of suicide bombing in practice particularly regarding the structure of the organizations that deploy suicide bombers and the relationships between these organizations and the recruits whom they utilize in their attacks Nevertheless nagging inconsistencies and questions remain These inconsistencies can be explained by examining suicide bombing as a technological system that integrates human beings cultures and devices and directs them toward specific ends Such an analysis requires that neither the individual bombers nor their sponsoring organizations be the basic unit of discussion Instead the bombers must be understood as components within a much larger system that has been shaped by a host of social cultural and operational constraints throughout its existence Integrating insights from the historical analysis of other technological systems with the recent literature specifically devoted to suicide bombing therefore allows *The Business of Martyrdom* to develop a fuller understanding of suicide bombing as a unified yet diverse phenomenon

**The Business of America** Graham Thompson, 2004-03-20 The Business of America examines the complex linking of business and nationhood in post war United States literature against the backdrop of changing concepts of the nation in the field of American Studies The first part of the book examines how white male literary culture has been largely hostile to business during this period and how it has represented transnational shifts in the nature of business as threats to supposedly American values like the individual the family or freedom The book charts the way that such an uneasiness towards business relies upon a discourse about America business and empire that is increasingly untenable in the post war world By way of comparison The Business of America looks at how literature by women and by writers from different racial ethnic and sexual groups often deals with business from the more localised angle of work Graham Thompson shows how this attention to work provides a less abstract and more oppositional approach to the connection between business and America
