Valuing Chaparral Emma C. Underwood, Hugh D. Safford, Nicole A. Molinari, Jon E. Keeley, 2018-04-09 Chaparral shrubland ecosystems are an iconic feature of the California landscape and a highly biodiverse yet highly flammable backdrop to some of the fastest growing urban areas in the United States Chaparral type ecosystems are a common element of all of the world's Mediterranean type climate regions of which California is one yet there is little public appreciation of the intrinsic value and the ecosystem services that these landscapes provide Valuing Chaparral is a compendium of contributions from experts in chaparral ecology and management with a focus on the human relationship with chaparral ecosystems Chapters cover a wide variety of subjects ranging from biodiversity to ecosystem services like water provision erosion control carbon sequestration and recreation from the history of human interactions with chaparral to current education and

conservation efforts and from chaparral restoration and management to scenarios of the future under changing climate land use and human population Valuing Chaparral will be of interest to resource managers the research community policy makers and the public who live and work in the chaparral dominated landscapes of California and other Mediterranean type climate regions *Contributions from the Botanical Laboratory and the Morris Arboretum of the University of Pennsylvania* University of Pennsylvania.
