### **The NexStar User's Guide** Michael

Swanson, 2012-12-06 Michael Swanson's online discussions with literally thousands of NexStar owners made it clear that there was a desperate need for a book such as this one that provides a complete detailed guide to buying using and maintaining NexStar telescopes. Although this book is highly comprehensive it is suitable for beginners there is a chapter on Astronomy Basics and experts alike. Celestron's NexStar telescopes were introduced in 1999 beginning with their first computer controlled go to model a 5 inch. More models appeared in quick succession and Celestron's new range made it one of the two dominant manufacturers of affordable go to telescopes. Hand-held Visions DeeDee Halleck, 2002 For almost forty years DeeDee Halleck has been involved in a variety of projects that involve media making by non professionals. Her goal has been to develop a critical sense of the potential and limitations of mediated communication through practical exercises that generate a sense of both individual and non hierarchical group power over the various apparatus of media and electronic technology. Hand Held Visions is a collection of essays presentations and lectures that she has written throughout this process. Halleck starts with a discussion of her own development as a teacher producer and an active participant in the struggle for media democracy. She gives the reader a historical first person perspective on the community based media movement and a sense of the determination and resolve that have enabled often fragile and much embattled organizations and individuals to survive in a climate dominated by global media corporations that are in direct opposition to their work.
