**The Modern Caribbean Economy, Volume I** Nikolaos Karagiannis, Debbie A. Mohammed, 2016-09-16 Caribbean economies have been faced with mounting challenges arising from the increasing pace of economic globalization. The financial crisis of 2007 further exacerbated economic instability due to high foreign debt, lack of competitiveness, declining productivity and high unemployment and underemployment. This in turn has precipitated increasing social and environmental problems including poverty, inequality, crime and violence and environmental degradation, all of which require new perspectives and policy approaches for transformative change and sustainable development. In this two-volume multidisciplinary edited book, *The Modern Caribbean Economy Volume I* provides scholars and practitioners with alternative theoretical perspectives and concrete policy recommendations, while *Volume II* discusses economic, industrial and social problems facing the Caribbean along with pragmatic proposals to successfully deal with these while building local resilience and enhancing institutional strength in the region.

Perspectives on Canadian Federalism R. D. Olling, M. W. Westmacott, 1988 In *Perspectives on Canadian Federalism* R. D. Olling and M. W. Westmacott have assembled a stimulating collection of studies that examine the unique features of Canadian federalism. A mix of classic writings, recent articles and specially commissioned essays, this volume devotes particular attention to the controversial institutional and procedural changes that have occurred during the 1970s and 1980s. back cover

**Service Industries in Regional Development** William J. Coffey, James John McRae, 1989 This document presents a broad empirical picture of the national regional and urban structure of the Canadian economy It identifies the factors which may be causing the relative shift towards employment in service industries and occupations and shows that the lack of actual data on interregional flows of service outputs effectively precludes the empirical testing of regional general equilibrium models involving service industries It concludes by bringing forth the regional policy implications embedded in the conceptual and empirical work on service industries Comparative Political and Economic Perspectives on the MENA Region Erdoğdu, M. Mustafa, Christiansen, Bryan, 2015-12-22 The region that includes the Middle East and Northern Africa MENA faces a diverse set of cultural political and economic issues Exploring the countries that are considered to be a part of the MENA region as well as comparing this region to the rest of the developing and developed world provides essential insight into the current state of the region as well and its future outlook *Comparative Political and Economic Perspectives on the MENA Region* takes a critical approach to analyzing the socio economic development of the MENA Region and the role of politics and various social issues in this development Highlighting research based perspectives from global leaders on topics such as decentralization international affairs the Arab Spring foreign direct investment and education in the Middle East and Northern Africa this publication is designed for library reference section inclusion and meets the research needs of

**Getting It Right** Harley McGee, 1992-11-16 Getting It Right is the first insider's account of this period of regional development in Canada Harley McGee draws on his experience with the government at senior regional and departmental levels and on primary and secondary sources to examine the evolution of federal regional development policies and the structures developed between 1970 and 1991 to implement them He dispels some of the myths and challenges some of the perceptions about the manner in which regional development has been tackled by governments in Canada He explores the federal provincial dimensions of regional development as well as the difficulty of reconciling the perceived dichotomy between national and regional policies McGee argues that the 1982 move away from the DREE model of regional development was a mistake and suggests that the predilection of governments for reorganising existing instruments of regional development policy and creating new ones has been detrimental to regional economies Mindful of the new realities of the global economy within which Canada and its regions must compete and of the promise threat of rapidly changing technology McGee identifies the need for a new order of priorities with which governments can meet these challenges and opportunities

**Thinking Outside the Box** Keith G. Banting, Richard P. Chaykowski, Steven F. Lehrer, 2015-11-30 Building on the work presented in Styran and Taylor's This Great National Object which told the story of the first three Welland canals built in the nineteenth century This Colossal Project chronicles an impressive milestone in the history of Canadian technological achievement and nation building

**Modern State Intervention in the Era of Globalisation** Nikolaos Karagiannis, Zagros Madjd-Sadjadi, 2007-06-26 Modern State Intervention in the Era of Globalisation is a thoughtful and well researched assessment of the evolving role of the state in the contemporary world economy This work is provocative because it goes against the predominant arguments in favor of a minimal state as commonly asserted by neoclassical economics Instead Karagiannis and Madjd Sadjadi think outside of the box and produce both theoretical arguments and evidence from important cases such as the EU Singapore and Hong Kong to support the idea of a viable and continuing role for the Developmental State The scholarship underlying this very readable book which includes contemporary material as well as ancient economic thought is truly impressive Readers will be left with much to reconsider about the benefits of globalisation Patrick James University of Southern California US

**The Theory, Practice and Potential of Regional Development** Kelly Vodden, David J.A. Douglas, Sean Markey, Sarah Minnes, Bill Reimer, 2019-07-04 Canadian regional development today involves multiple actors operating within nested scales from local to national and even international levels Recent approaches to making sense of this complexity have drawn on concepts such as multi level governance relational assets integration innovation and learning regions These new regionalist concepts have become increasingly global in their formation and application yet there has been little critical analysis of Canadian regional development policies and programs

or the theories and concepts upon which many contemporary regional development strategies are implicitly based This volume offers the results of five years of cutting edge empirical and theoretical analysis of changes in Canadian regional development and the potential of new approaches for improving the well being of Canadian communities and regions with an emphasis on rural regions It situates the Canadian approach within comparative experiences and debates offering the opportunity for broader lessons to be learnt This book will be of interest to policy makers and practitioners across Canada and in other jurisdictions where lessons from the Canadian experience may be applicable At the same time the volume contributes to and updates regional development theories and concepts that are taught in our universities and colleges and upon which future research and analysis will build
