## **The Canadian Health System:**

The Canadian Health System Lee Soderstrom, 1978      **Treating Health Care** Raisa Deber, 2018-01-18 Canada has been among the world leaders in recognizing the multiple factors that impact health. Focusing on Canada's health care system, Raisa B. Deber provides brief descriptions of some key facts and concepts necessary to understand health care policy in Canada and place it in an international context. An accessible guide, *Treating Health Care* unpacks key concepts to provide informed discussions that help us understand and diagnose Canada's health care system and to clarify which proposed changes are likely to improve it and which are not. This book provides background information to clarify such concepts as determinants of health, how health systems are organized and financed, including international comparisons, health economics, health ethics, and roles and responsibilities of different stakeholders, including government providers and patients. It then addresses some key issues, including equity, efficiency, access, and wait times, quality improvement, and patient safety, and coverage and payment models. Using analysis rather than advocacy, Deber provides a toolkit to help understand health care and health policy.

**THE CANADIAN HEALTH SYSTEM** M. CLEMENT HALL, 2013-10-25 Canada began a health system from the time the first settlers arrived. The systems have changed. They continue to change, and perhaps continued change is inevitable and perpetual. The one element that all agree about: a system of health care for all is part of the national character and will not be abandoned.

Learning Outcomes outline the knowledge that you should gain in each chapter. Key Terms open each chapter and include page references for definitions. Student-friendly learning aids include summary tables and boxes, photographs, figures, and illustrations. Review questions at the end of every chapter test your comprehension of the material. **Strategies to Improve the Canadian Healthcare System**

Deanna Di Gregorio, 2011 Research Paper postgraduate from the year 2010 in the subject Health Science grade 89.0% The University of Western Ontario language English abstract The Canada Health Act (CHA) of 1984 was enacted with the mandate to protect, promote and restore the physical and mental well-being of residents of Canada and to facilitate reasonable access to health services without financial or other barriers. L. Hughes Marsh personal communication September 20, 2010. The Act has five principles: public administration, comprehensiveness, universality, portability, and accessibility. Canadian Health Care, 2004. The CHA principles have assisted in creating the universal, glorious and free healthcare system that historically Canadians have been so proud to adopt as part of their identity. The 2010 Report Card, however, suggests that this attitude is shifting. When compared with six other developed nations on the performance of their healthcare systems, Canada ranked sixth, only placing ahead of the United States, the one country that did not have universal healthcare coverage. Factors measured include quality of care, access, efficiency, equity, and health outcomes. These findings suggest that Canadians no longer hold the same value for their once glorified universal healthcare system. Instead, the system receives an abundance of criticism for its inability to provide quality care to all citizens and is thus currently facing many challenges and structural reforms. This report will outline three recommendations to improve the current Canadian healthcare system: going lean in healthcare, establishing universal prescription drug coverage programs, and incorporating virtual health practices into the Canadian healthcare system.

*Canadian Health Care and the State* Christopher David Naylor, 1992. Canada's state-funded health care system is in trouble and fundamental questions are being raised about the connection between medicine and the public sector. This collection of historical essays explores diverse aspects of medical care and ideology in their relation to the Canadian state and to parallel institutions such as the military.
